Technical Leadership

- Team Leadership
- Technical Strategy
- Mentoring
- Cross-functional Collaboration
- Engineering Excellence
- Product Ownership

Machine Learning & AI

- Generative AI
- AI Product Design
- LLM Applications
- AI Agents
- OpenAI APIs
- RAG Pipelines

Full Stack Development

- Java
- Python
- TypeScript
- Vue.js
- Microservices
- API Development

DevOps & Infrastructure

- AWS
- CI/CD
- Kubernetes
- Docker
- Monitoring & Observability
- Deployment Automation

Summary

AI-driven Senior Software Engineer with over 10 years of experience in developing and deploying machine learning solutions. Successfully delivered advanced generative AI systems, optimizing operational efficiency and saving \$337K in costs. Proven track record of collaboratively designing scalable applications while mentoring engineers and driving innovation across multifaceted projects that enhance user engagement.

Work Experience

- Beekeeper AG

Senior Software Engineer (Technical Lead)

03/2020 - Present

Technical Lead driving innovation in Generative AI solutions and scalable platforms, enhancing customer engagement and revenue growth.

 - Led architectural design and launch of Employee Referral System (99.99% SLA) — generated \$1.5M+ revenue including \$500K ARR through agile methodologies and customer-focused iteration
 - Spearheaded development of Beekeeper's Templating Engine — reduced setup time by 90% and now powers 15% of all platform assets, significantly enhancing user engagement
 - Engineered robust search interface accommodating 10M+ users — substantially elevated user engagement and accelerated platform adoption rate
 - Designed and deployed advanced generative AI translation systems using GitHub Actions and OpenAI APIs — saved \$337K and accelerated go-to-market since Jan 2024
 - Mentored junior engineers and acted as technical hiring manager, fostering a culture of continuous learning and high-quality code delivery
 - Drove cross-functional initiatives leading to key features like Employee Referral and Search Revamp, enhancing product offerings and user experience
 - Collaborated with product managers to run A/B experiments, deriving insights that informed product iterations and improved customer satisfaction

Tenity

Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

Mentor and panelist providing strategic guidance on generative AI solutions and scalability to emerging tech startups.

- Conducted thorough technology evaluations for seed-to-VC startups, facilitating growth and enabling them to devise impactful, scalable solutions
- Advised startups on technical hiring and AI adoption strategies, directly contributing to increased operational efficiency and innovation

Dronistics

Founding Software Application Developer

08/2016 - 03/2020

Founding engineer of an autonomous drone delivery system, driving innovation in logistics with a focus on performance optimization.

- Engineered an autonomous drone delivery platform — successfully conducted over 500 last-mile deliveries
- Reduced delivery times by 40% with real-time flight control APIs and logistics optimization algorithms while maintaining a 99.5% safety record
- Delivered complete cloud infrastructure and DevOps pipeline enabling scalable operations for strategic enterprise partnerships

EPFL — Laboratory of Intelligent Systems (Robogen)

Research Software Developer

01/2017 - 01/2020

Led engineering efforts for Robogen, an innovative open-source platform integrating AI and robotics for advanced research.

- Spearheaded migration to AWS, enhancing platform capabilities and securing AWS Research Credits, featured on the AWS Research Blog
- Supervised over 20 master's students in robotics and AI research projects, fostering the next generation of tech innovators
- Contributed to impactful research in artificial evolution, earning recognition in academia and industry

Product & Business

- A/B Testing
- Revenue Generation
- Go-to-Market
- Stakeholder Management
- Strategic Roadmaps
- Innovation Practices

Languages

English (Professional Working)
German (Beginner)

Certificates

- Building Modern Java Applications - AWS
- Build LLM Apps with LangChain - DeepLearning.AI
- Microsoft Certified Professional (MCPS) - Microsoft
- MongoDB for Java Developers - MongoDB University

Interests

AI & Creativity

Startup Mentoring

Generative AI Applications

Scalable Systems

Awards

- AWS Cloud Credits for Research - Amazon Web Services (2020)
- KTH Opportunities Fund - KTH Royal Institute of Technology
- TI India Analog Design Contest Winner - Texas Instruments

Entrepreneurial Projects

PulseView - AI Market Intelligence · https://pulse-view.anand-creations.com Founder & AI Product Builder	05/2025 - Present
- Built AI-powered real-time stock market analysis platform, enabling traders to generate and explain trading signals. - Focused on explainable AI to enhance clarity and speed in financial decision-making. - Transitioned from a personal tool to a public platform, broadening access for retail traders.	
SwissNRI - Cross-border Fintech Platform · https://www.swissnri.com Co-Founder & Technical Lead	01/2024 - Present
- Led the development of a unique platform catering to cross-border financial challenges for Indian nationals in Switzerland. - Achieved a 40% increase in user satisfaction through customer-driven product iterations. - Implemented compliance-first design addressing key regulatory requirements across multiple jurisdictions.	
Proplab - AI Real Estate Tools · https://proplab.io Founder & AI Product Builder	09/2025 - Present
- Designed a digitalized property inventory inspection system that replaced manual workflows, enhancing operational efficiency. - Currently developing an AI marketing assistant that automates listing creation, significantly increasing property visibility. - Implemented structured inspection protocols with AI and image processing technologies.	
Education	
Quantic School of Business and Technology MBA Business Administration	2019 - 2020
EIT Digital Master (Programme) Innovation & Entrepreneurship	2014 - 2016
Eindhoven University of Technology (TU/e) MSc (Netherlands) Embedded Networking	2015 - 2016
KTH Royal Institute of Technology MSc (Sweden) Embedded Systems	2014 - 2015
Amrita Vishwa Vidyapeetham Bachelor of Engineering Electronics and Communication	2010 - 2014
Blog Posts & Talks	
AI and creativity Front Conference (Talk) Keynote presentation exploring the intersection of artificial intelligence and human creativity, demonstrating how AI can augment rather than replace creative processes in product development.	
From Infinite possibilites to finite Results AI for the rest of Us, UK (Talk) Strategic framework presentation on transforming unlimited AI potential into measurable business outcomes through systematic implementation and practical constraint design.	
Designing Robots Through Artificial Evolution AWS Public Sector Blog Featured technical article showcasing breakthrough research in evolutionary robotics, demonstrating how AWS cloud infrastructure enables large-scale artificial evolution simulations for autonomous system design.
