AI & Machine Learning

- Generative AI
- AI Agents
- LLM Applications
- OpenAI APIs
- AI Product Design
- Translation Systems

Cloud Infrastructure & DevOps

- AWS
- Containerization
- Terraform
- CI/CD
- Docker
- Kubernetes

Technical Leadership

- System Architecture
- Team Leadership
- Technical Strategy
- Mentoring
- Cross-functional Collaboration
- Engineering Excellence

Full Stack Development

- Java
- Python
- Microservices
- API Development
- PostgreSQL
- Kafka

Summary

Experienced AI Software Engineer with over 10 years in full-stack development and architectural design, specializing in AI agents and cloud solutions. Led teams to implement scalable systems on AWS, achieving \$1.5M+ in revenue and significant cost savings. Proficient in Python, CI/CD, and containerization, fostering quality-driven, collaborative environments.

Work Experience

Beekeeper AG 03/2020 - Present
Senior Software Engineer (Technical Lead)

Technical Lead specializing in AI-powered features and scalable system architectures, responsible for high-impact projects that enhanced platform reliability and user engagement.

- Led architectural design and launch of Employee Referral System, achieving 99.99% SLA and generating \$1.5M+ revenue including \$500K ARR through agile methodologies.
- Spearheaded development of Beekeeper's Templating Engine, reducing setup time by 90% and enhancing user engagement, now powering 15% of all platform assets.
- Engineered a robust search interface handling 10M+ users, significantly improving user engagement and accelerating platform adoption rates.
- Mentored junior engineers, creating a growth-focused environment that improved developer velocity and code quality.
- Designed and deployed an advanced Generative AI translation system, saving \$337K and accelerating go-to-market efforts for new features.
- Drove cross-functional initiatives across Product and GTM, leading projects that included AI-driven solutions and customer-centric features.

Tenity 06/2024 - Present
Startup Mentor & Technology Evaluation Panelist

Mentor and evaluator for startups, focusing on scalable AI strategies and innovation practices, helping them to refine technical directions.

- Provided critical guidance on scalability and innovative practices to seed-to-VC startups, facilitating their growth trajectories.
- Conducted thorough evaluations of emerging technologies, enabling startups to develop impactful and scalable AI solutions.

Dronistics 08/2016 - 03/2020
Founding Software Application Developer

Founding engineer for an autonomous drone delivery system, pioneering technology used in over 500 last-mile deliveries.

- Developed a full software/cloud stack for Dronistics, partnering with firms such as Unilever, enhancing operational capabilities.
- Architected robust APIs for real-time flight control and logistics optimization, reducing delivery times by 40% while maintaining a 99.5% safety record.

EPFL — Laboratory of Intelligent Systems (Robogen) 01/2017 - 01/2020
Research Software Developer

Key contributor to an open-source AI platform for evolving robot morphologies and control systems, enhancing research capabilities in robotics.

- Led the engineering of the Robogen platform, driving advancements in AI and robotics research recognized in industry publications.
- Spearheaded AWS migration efforts, resulting in enhanced capabilities and exposure for the project.

Product & Business

- Product Ownership
- Revenue Generation
- Go-to-Market
- A/B Testing
- Stakeholder Management
- Strategic Roadmaps

Languages

English (Professional Working)
German (Beginner)

Certificates

- Building Modern Java Applications - AWS
- Build LLM Apps with LangChain - DeepLearning.AI
- Microsoft Certified Professional (MCPS) - Microsoft
- MongoDB for Java Developers - MongoDB University

Interests

AI & Creativity

AI Agents

Cloud Infrastructure

Scalable Systems

Startup Innovation

Awards

- AWS Cloud Credits for Research - Amazon Web Services (2020)
- KTH Opportunities Fund - KTH Royal Institute of Technology
- TI India Analog Design Contest Winner - Texas Instruments

Entrepreneurial Projects

PulseView - AI Market Intelligence · https://pulse-view.anand-creations.com Founder & AI Product Builder	05/2025 - Present
- Built a real-time stock market analysis platform leveraging AI agents to generate and explain trading signals. - Implemented explainable AI for financial analysis, focusing on speed and clarity. - Transformed a personal tool into a public resource for retail traders and investors.	
Proplab - AI Real Estate Tools · https://proplab.io Founder & AI Product Builder	09/2025 - Present
- Designed and built an MVP for a digital property inspection system, streamlining workflows with AI technology. - Currently leading the development of an AI-powered marketing assistant to automate real estate listings. - Established structured inspection protocols utilizing image processing and AI.	
SwissNRI - Cross-border Fintech Platform · https://www.swissnri.com Co-Founder & Technical Lead	01/2024 - Present
- Launched the first platform addressing cross-border financial challenges for Indian nationals in Switzerland. - Led development from concept to MVP in 3 months, driving high user acquisition through strategic partnerships. - Created compliance-first solution addressing critical regulations across multiple jurisdictions.	
Education	
Quantic School of Business and Technology MBA Business Administration	2019 - 2020
EIT Digital Master (Programme) Innovation & Entrepreneurship	2014 - 2016
Eindhoven University of Technology (TU/e) MSc (Netherlands) Embedded Networking	2015 - 2016
KTH Royal Institute of Technology MSc (Sweden) Embedded Systems	2014 - 2015
Amrita Vishwa Vidyapeetham Bachelor of Engineering Electronics and Communication	2010 - 2014
Blog Posts & Talks	
AI and creativity Front Conference (Talk) Keynote presentation exploring the intersection of artificial intelligence and human creativity, demonstrating how AI can augment rather than replace creative processes in product development.	
Agentic AI: Simple ReAct Agent The Compounding Curiosity (Substack) Technical tutorial series introducing practical implementation of ReAct (Reasoning + Acting) agents, demonstrating how to build autonomous AI systems that combine reasoning capabilities with actionable decision-making for real-world applications.	04/2025
From Infinite possibilites to finite Results AI for the rest of Us, UK (Talk) Strategic framework presentation on transforming unlimited AI potential into measurable business outcomes through systematic implementation and practical constraint design.
