\$337K

Costs Eliminated

10M+

Users Served

3

Companies Founded

Engineer who ships production AI agents that move metrics, not demos. Built and deployed agent systems with LangChain, OpenAI, Claude, and Strands at LumApps and Beekeeper. 2x outbound conversions, \$337K in vendor cost eliminated, 10M+ users served. Verification-first by instinct: at PulseView the rule is if the model cannot explain the signal, it does not ship. Founder-mode comfort moving backend to frontend to infra in the same day; 3 companies built on the side.

WORK EXPERIENCE

LumApps · Senior AI Engineer

03/2026 - Present

AI Agents LangChain FastAPI Python OpenAI GCP RAG Orchestration Salesforce OAuth

- Built and deployed production AI agents for outbound sales. 2x open rates, 2x approved opportunities, 2 to 3 hours saved per rep per day across SDR and AE teams.
- Designed the agent runtime and orchestration (LangChain, FastAPI, GCP) with integrations across Salesforce, email, and internal CRM tooling. Shipped directly to prod, reported to C-level on outcomes not progress.
- Expanded scope to own company-wide AI governance and agent strategy: where agents are trusted to act, where humans verify, how outcomes get measured.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

AI Agents OpenAI Claude LangChain CrewAI Strands Agents Langfuse Python Java Vue Kubernetes AWS
Kafka PostgreSQL Elastic Search ClickHouse GitHub Actions

- Built AI Onboarding Specialist that gives every new signup personalized, high-touch guidance at scale. 100% of customers guided through setup without adding headcount. Same shape as an AI coworker living inside the product surface.
- Replaced \$337K in annual vendor translation costs with an LLM pipeline built in 6 weeks (GitHub Actions + OpenAI). 12K+ assets translated, product team now iterates without external gatekeepers.
- Built GenAI demo system for sales. Orchestrates content generation from Salesforce data so every pitch feels custom-built for that customer. Improved demo speed and close rates.
- Architected Employee Referral System end-to-end. Became the platform's top revenue channel (\$1.5M+ generated, \$500K ARR). Designed for 99.99% SLA because customer trust is measured in uptime.

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

AI Strategy Startup Evaluation Scalability Technical Mentoring Algorithmic Trading

- Evaluated 20+ startups on technical architecture, scalability, and AI readiness to inform seed-to-VC investment decisions.
- Mentored Opt Alpha on scaling algorithmic trading systems. Optimized reliability and performance for high-frequency production workloads.

Dronistics · Founding Engineer

08/2018 - 03/2020

Vue Java PostgreSQL AWS Docker CI/CD Real-time Systems Flight Control APIs

- Shipped end-to-end autonomous delivery platform (Vue, Java, PostgreSQL, AWS) with real-time flight control APIs and logistics optimization. 500+ deliveries, 40% faster, 99.5% safety record, zero incidents.
- Built cloud infrastructure and CI/CD pipeline from scratch. Enterprise-grade reliability that enabled partnerships with Unilever and a CES showcase.

EPFL, Laboratory of Intelligent Systems (Robogen) · Research Engineer

08/2016 - 07/2018

C++ Python AWS Genetic Algorithms Neural Networks Evolutionary AI Robotics Webots

- Engineered Robogen, an open-source platform for co-evolution of robot bodies and brains via genetic algorithms. Morphology and neural control evolved together through artificial selection.
- Migrated the simulation pipeline to AWS for large-scale parallel evolution runs impractical on local hardware. Secured AWS Cloud Credits for Research; work featured on the AWS Public Sector Blog.
- Foundational AI experience (optimization, search, fitness landscapes, learning from environment) that informs how I approach modern LLM and agentic systems today.

PulseView - AI Market Intelligence

https://pulse-view.anand-creations.com

05/2025 - Present

Founder & Builder

AI agents that generate AND justify trading signals using technical and news data. Core principle: if the model cannot explain the signal, it does not ship. Verification before output, every time.

- Built the full stack solo: agent runtime, real-time market data integrations, signal generation and justification layer, web frontend.
- Live retail users after self-validating on my own portfolio. Explainability as the product, not a feature.

Proplab - AI Real Estate Tools

https://proplab.io

09/2025 - Present

Founder & Builder

Property inspections run on paper, clipboards, and WhatsApp photos. Built MVP for a fully digital, image-backed, timestamped inspection workflow that replaces the entire manual process.

- Shipped MVP replacing paper-based inspection workflows with structured, image-backed, timestamped records.
- Building AI marketing assistant that auto-generates property listings from inspection data. One workflow, zero copy-paste.

SwissNRI - Cross-border Fintech Platform

https://www.swissnri.com

01/2024 - Present

Co-Founder & Technical Lead

Swiss-Indian families navigating FEMA, DTAA, and Swiss regulations had zero digital help. Just spreadsheets and expensive advisors. Built the first platform addressing this.

- Zero-to-MVP in 3 months. Compliance-first design: regulatory guardrails for both jurisdictions built before features.
- Customer feedback loops drove 40% uplift in satisfaction. Roadmap owned by what users actually asked for.

EDUCATION

Quantic School of Business and Technology	2019 - 2020
<i>MBA Business Administration</i>	
EIT Digital	2014 - 2016
<i>Master (Programme) Innovation & Entrepreneurship</i>	
Eindhoven University of Technology (TU/e)	2015 - 2016
<i>MSc (Netherlands) Embedded Networking</i>	
KTH Royal Institute of Technology	2014 - 2015
<i>MSc (Sweden) Embedded Systems</i>	
Amrita Vishwa Vidyapeetham	2010 - 2014
<i>Bachelor of Engineering Electronics and Communication</i>	

CERTIFICATES

Build LLM Apps with LangChain
DeepLearning.AI
Building Modern Java Applications
AWS
Microsoft Certified Professional (MCPS)
Microsoft
MongoDB for Java Developers
MongoDB University

AWARDS

Appreciation from John T. Chambers (ex-CEO, Cisco Systems)
Cisco Systems Recognized for contributions to strategic projects within Cisco's ecosystem
AWS Cloud Credits for Research
Amazon Web Services (2020)
TI India Analog Design Contest Winner
Texas Instruments
KTH Opportunities Fund
KTH Royal Institute of Technology
