

Anand Bhaskaran

Senior AI GTM Engineer / GenAI & Agentic Systems / Production LLM Architect / C-level Advisor

📍 Zurich, Switzerland · ✉ anandbaskaran3193@gmail.com · 📞 +41763043193 · [in anandb3](#) · [🌐 anandbhaskaran](#) · [📺 anand-creations](#)

\$1.5M+	\$337K	10M+	3
Revenue Shipped	Costs Eliminated	Users Served	Companies Founded

10+ years architecting production AI systems, including GenAI and agentic workflows, with direct C-level reporting. Currently own enterprise GenAI end-to-end at Beekeeper: a LangGraph/knowledge-graph agentic layer, an LLM + RAG translation pipeline that eliminated \$337K in vendor cost, and Langfuse-instrumented evaluation harnesses behind both — plus a search platform serving 10M+ users on AWS Kubernetes. Deep AWS roots: ran large-scale evolutionary AI on AWS at EPFL (featured on the AWS Public Sector Blog; awarded AWS Cloud Credits for Research). Founder-operator across three fintech/AI ventures and a startup mentor at Tenity. Regular speaker on agentic AI who translates unbounded GenAI potential into measurable customer outcomes.

WORK EXPERIENCE

LumApps · Senior AI GTM Engineer 03/2026 - Present

LangChain AI Agents RAG OpenAI FastAPI GCP MLOps Responsible AI Sales Enablement Python

- Owns enterprise GenAI transformation end-to-end: production agentic architecture, governance, and sales enablement. Reports directly to C-level on outcomes.
- Architected and deployed production agentic AI for outbound sales (LangChain, FastAPI, GCP, OpenAI). 2x open rates, 2x approved opportunities, 2 to 3 hours saved per rep per day across SDR and AE teams.
- Owns company-wide GenAI strategy, governance, and responsible AI guardrails. Reports directly to C-level on outcomes, not progress.
- Drives GTM and field enablement: partners with Sales, Marketing, and CS to turn AI capability into pipeline, demos, and customer-facing motions.

Beekeeper AG · Senior Software Engineer (Technical Lead) 03/2020 - 02/2026

OpenAI Claude LangChain CrewAI Strands Agents Langfuse RAG AI Agents MLOps AWS Kubernetes Kafka PostgreSQL Elastic Search ClickHouse Python Java GitHub Actions

- Saved \$337K in annual vendor translation costs with an in-house LLM pipeline (OpenAI, GitHub Actions, evaluation harness) shipped in 6 weeks. 12K+ assets translated; product team iterates without external gatekeepers.
- Built an AI Onboarding Specialist (RAG over product docs, LLM-driven flow) giving every new signup personalized high-touch guidance at scale. 100% of customers guided through setup, time-to-first-value reduced without adding headcount.
- Built the agentic and GenAI stack (CrewAI, Strands Agents, LangChain, Langfuse) with evaluation, tracing, and governance.
- Built GenAI demo system for Sales: auto-generates personalized content from Salesforce data so every pitch is custom-built per customer. Improved demo speed and close rates.
- Hired, mentored, and led the AI engineering team. Mentor engineers who now ship agentic features; deputy tech lead.

Tenity · Startup Mentor & Technology Evaluation Panelist 06/2024 - Present

AI Strategy GenAI Adoption MLOps Startup Evaluation Technical Mentoring Scalability

- Evaluated 20+ startups on AI readiness, GenAI architecture, and scalability to inform seed-to-VC investment decisions.
- Mentored Opt Alpha on scaling ML-driven algorithmic trading systems for high-frequency production workloads.
- Advised portfolio founders on AI strategy, MLOps, and turning GenAI prototypes into reliable production systems.

Dronistics · Founding Engineer 08/2018 - 03/2020

AWS Docker CI/CD Java Vue PostgreSQL Real-time Systems Autonomous Systems Logistics Optimization

- Built cloud infrastructure and CI/CD pipeline on AWS from scratch. Enterprise-grade reliability that enabled partnerships with Unilever and a CES Las Vegas showcase.
- Shipped end-to-end autonomous drone delivery platform (Vue, Java, PostgreSQL on AWS). 500+ successful deliveries, every flight a live test for autonomous systems in the real world.
- Engineered real-time flight control APIs and logistics optimization algorithms. 40% faster deliveries, 99.5% safety record, zero incidents.

AWS

EC2

S3

Genetic Algorithms

Neural Networks

Evolutionary AI

Robotics

C++

Python

Webots

- Migrated the Robogen simulation pipeline to AWS (EC2, S3) for large-scale parallel evolution runs impractical on local hardware. Secured AWS Cloud Credits for Research; work featured on the AWS Public Sector Blog.
- Engineered Robogen, an open-source platform for co-evolution of robot bodies and neural-network brains via genetic algorithms.
- Teaching Assistant for Evolutionary Robotics at EPFL. Supervised 20+ master's students through hands-on projects in genetic algorithms, neural controllers, and embodied AI.
- Foundational AI experience (optimization, search, fitness landscapes, learning from environment) that informs how I architect modern LLM and agentic systems today.

ENTREPRENEURIAL PROJECTS

PulseView - Explainable AI Market Intelligence · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & Builder

Real-time market intelligence platform where AI agents generate AND justify trading signals from technical and news data. Core product principle: if the model can't explain the signal, it doesn't ship. Explainability over complexity.

- Agentic pipeline that fetches live market and news data, runs analysis, and produces signals with grounded explanations.
- Built for my own portfolio first; opened to retail users after self-validation. Now serving live users with real-time feeds.

Proplab - AI Real Estate Tools · <https://proplab.io>09/2025 - Present

Founder & Builder

MVP for a fully digital, image-backed, timestamped property inspection protocol that replaces paper, clipboards, and WhatsApp photos. AI marketing assistant in build to auto-generate property listings from inspection data.

- Shipped MVP replacing paper-based inspection workflows with structured, image-backed, timestamped records.
- Building AI marketing assistant that auto-generates property listings from inspection data.

SwissNRI - Cross-border Fintech Platform · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

First digital platform for Swiss-Indian families navigating FEMA, DTAA, and Swiss regulations.

- Zero-to-MVP in 3 months. Compliance guardrails for both jurisdictions built before features.
- Customer feedback loops drove 40% uplift in satisfaction. Roadmap owned by what users actually asked for.

EDUCATION		CERTIFICATES	AWARDS
Quantic School of Business and Technology	2019 - 2020	Building Modern Java Applications AWS	AWS Cloud Credits for Research Amazon Web Services (2020)
MBA Business Administration		Build LLM Apps with LangChain DeepLearning.AI	Funded the Robogen migration to AWS at EPFL for large-scale evolutionary AI experiments.
EIT Digital	2014 - 2016	Microsoft Certified Professional (MCPS)	Appreciation from John T. Chambers (ex-CEO, Cisco Systems)
Master (Programme) Innovation & Entrepreneurship		Microsoft	Cisco Systems
Eindhoven University of Technology (TU/e)	2015 - 2016	MongoDB for Java Developers MongoDB University	Recognized for contributions to strategic projects within Cisco's ecosystem
MSc (Netherlands) Embedded Networking			TI India Analog Design Contest Winner Texas Instruments
KTH Royal Institute of Technology	2014 - 2015		KTH Opportunities Fund KTH Royal Institute of Technology
MSc (Sweden) Embedded Systems			
Amrita Vishwa Vidyapeetham	2010 - 2014		
Bachelor of Engineering Electronics and Communication
