10M+

Users Served

3

Companies Founded

AI-native full-stack engineer with 13+ years shipping production software end to end for 10M+ users: TypeScript and Java backends, Vue frontends, PostgreSQL at scale. Deep in financial markets: I run my own algo-trading signal platform (PulseView) and serve as technical mentor to OptAlpha, advising them on scaling high-frequency algorithmic trading systems in production. Currently building production multi-agent AI systems at LumApps that 2x outbound conversions and forecast \$1M in quarterly revenue. Remote for 7+ years, running my own forward deployed practice (Anand Creations) embedded directly with client engineering teams.

WORK EXPERIENCE

LumApps · Lead Software Engineer

03/2026 - Present

TypeScript Python GCP Vertex AI PostgreSQL LangChain LangGraph Google ADK MCP AG-UI FastAPI
Multi-Agent Systems ReAct RAG Evaluation Pipelines LangSmith Observability On-Call Neo4j Graphiti Salesforce

- Built and deployed production multi-agent workflows for outbound sales on Python, LangGraph and Google ADK over GCP Vertex AI, using ReAct, self-reflection and hierarchical delegation, with tools exposed over MCP servers and agent state streamed to the UI over AG-UI. 2x open rates, 2x approved opportunities, 2 to 3 hours saved per rep per day. Forecast: \$4M in approved opportunities per quarter; at 25% conversion, \$1M in quarterly revenue.
- Designed AI Brain, a temporal knowledge graph on Graphiti and Neo4j that unifies 5+ silos (Salesforce, HubSpot, Pendo, conversation transcripts, product usage) into one time-aware memory every agent reads and writes. Event-driven ingest over Pub/Sub, a query and write-back contract per agent, and a freshness layer that flags stale facts, grounding RAG retrieval to cut hallucinations.
- Led technical discovery through production: agent architecture, eval pipelines, agent tracing (LangSmith), tool-selection tuning, and cost-per-request instrumentation, with on-call for global production systems. Reports directly to C-level on outcomes, not progress.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

TypeScript PostgreSQL Java Vue Python REST APIs Elastic Search Kubernetes AWS Kafka OpenAI LangChain
ClickHouse Jenkins GitHub Actions Observability Grafana Datadog Logz.io On-Call

- Architected Employee Referral System end-to-end, owning both the Vue frontend and Java/PostgreSQL backend. Became the platform's top revenue channel (\$1.5M+ generated, \$500K ARR). Designed for 99.99% SLA because customer trust is measured in uptime.
- Designed distributed templating engine that cut customer setup time 90%. Powers 15% of all platform assets for 10M+ users. Owned architecture end-to-end: robust, modular, performant by design, not by accident.
- Replaced \$337K in annual vendor translation costs with an LLM pipeline built in 6 weeks. 12K+ assets translated, product team now iterates without external gatekeepers.

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

Algorithmic Trading AI Strategy Startup Evaluation Scalability

- Mentored Opt Alpha on scaling high-frequency algorithmic trading systems in production.
- Evaluated 20+ startups on technical architecture, scalability, and AI readiness to inform seed-to-VC investment decisions.

Dronistics · Founding Engineer

08/2018 - 03/2020

PostgreSQL Vue Java REST APIs AWS Docker Real-time Systems Flight Control APIs Logistics Optimization

- Shipped end-to-end autonomous drone delivery platform (Vue/Java/PostgreSQL). 500+ successful deliveries, every flight a live UX test for autonomous systems in the real world.
- Engineered real-time flight control APIs and logistics optimization algorithms. 40% faster deliveries, 99.5% safety record, zero incidents.

Anand Creations - Forward Deployed Engineering Practice · <https://anand-creations.com>06/2024 - Present

Founder & Principal Forward Deployed Engineer

Independent, fully remote forward deployed practice (7+ years remote): I embed with a customer's team, run technical discovery, and ship production agentic AI inside their environment, from a one-week AI Opportunity Assessment through evals, tracing, and rollout. Also the home for the AI products I build and run.

- Flagship engagement, the GTM AI Brain: a temporal knowledge graph (Graphiti on Neo4j) unifying 5+ silos (Salesforce, HubSpot, Pendo, conversations, product usage) into one time-aware memory every agent reads and writes, with event-driven ingest over Pub/Sub and a per-agent query and write-back contract.

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & Builder

Real-time market intelligence built for my own trading portfolio first, then opened to retail traders. AI agents generate AND justify trading signals from technical and news data, with explainability and evaluation built in: if the model can't explain the signal, it doesn't ship. Now serving live users on real-time feeds.

SwissNRI - AI Cross-border Fintech · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

AI-native cross-border tax and compliance platform for Swiss-Indian families, replacing spreadsheets and expensive advisors. RAG-grounded assistant answers DTAA, FEMA and Swiss tax questions in plain language with citations back to the regulation; compliance-first agentic design flags risk before users file, with regulatory guardrails built before features. Zero-to-MVP in 3 months, 40% uplift in satisfaction.
