Companies Founded

Full-stack product engineer who owns problems end to end: research, spec, design, and ship, with a metric attached and a customer on the other side. Currently at LumApps, embedding directly with stakeholders to build production multi-agent systems on GCP that 2x outbound conversions and forecast \$1M in quarterly revenue, reporting outcomes straight to C-level. Built and owned platform-defining systems at Beekeeper for 10M+ users: an employee referral engine that became the top revenue channel (\$1.5M+), a distributed templating abstraction now powering 15% of all platform assets, and an in-house LLM pipeline that killed \$337K in vendor spend in 6 weeks. 13+ years shipping across the full stack, from React/Vue frontends to Postgres-backed services, with the product judgment to decide what's worth building.

WORK EXPERIENCE

LumApps · Senior AI Product Engineer

03/2026 - Present

TypeScript Python GCP Vertex AI LangChain LangGraph Google ADK MCP AG-UI FastAPI Multi-Agent Systems
ReAct RAG Vector Databases Evaluation Pipelines LangSmith Observability On-Call Neo4j Graphiti Salesforce

- Led technical discovery through production: agent architecture, eval pipelines, agent tracing (LangSmith), tool-selection tuning, and cost-per-request instrumentation, with on-call for global production systems. Reports directly to C-level on outcomes, not progress.
- Built and deployed production multi-agent workflows for outbound sales on Python, LangGraph and Google ADK over GCP Vertex AI, using ReAct, self-reflection and hierarchical delegation, with tools exposed over MCP servers and agent state streamed to the UI over AG-UI. 2x open rates, 2x approved opportunities, 2 to 3 hours saved per rep per day. Forecast: \$4M in approved opportunities per quarter; at 25% conversion, \$1M in quarterly revenue.
- Designed AI Brain, a temporal knowledge graph on Graphiti and Neo4j that unifies 5+ silos (Salesforce, HubSpot, Pendo, conversation transcripts, product usage) into one time-aware memory every agent reads and writes. Event-driven ingest over Pub/Sub, a query and write-back contract per agent, and a freshness layer that flags stale facts, grounding RAG retrieval to cut hallucinations.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

TypeScript PostgreSQL Java Vue Python Kubernetes AWS OpenAI LangChain Kafka Elastic Search Jenkins
GitHub Actions ClickHouse Claude Langfuse CrewAI Strands Agents Observability Grafana Datadog Logz.io On-Call

- Architected Employee Referral System end-to-end. Became the platform's top revenue channel (\$1.5M+ generated, \$500K ARR). Designed for 99.99% SLA because customer trust is measured in uptime.
- Designed distributed templating engine that cut customer setup time 90%. Powers 15% of all platform assets for 10M+ users. Customers go from zero to live in minutes, not days.
- Replaced \$337K in annual vendor translation costs with an LLM pipeline built in 6 weeks. 12K+ assets translated, product team now iterates without external gatekeepers.

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

AI Strategy Startup Evaluation Technical Mentoring Scalability

- Evaluated 20+ startups on technical architecture, scalability, and AI readiness to inform seed-to-VC investment decisions.
- Advised multiple portfolio companies on technical hiring, AI strategy, and building engineering cultures that actually ship.

Dronistics · Founding Engineer

08/2018 - 03/2020

PostgreSQL Vue Java AWS Docker Terraform Infrastructure as Code CI/CD Real-time Systems Flight Control APIs
Logistics Optimization

- Shipped end-to-end autonomous drone delivery platform (Vue/Java/PostgreSQL). 500+ successful deliveries, every flight a live UX test for autonomous systems in the real world.
- Engineered real-time flight control APIs and logistics optimization algorithms. 40% faster deliveries, 99.5% safety record, zero incidents.

Anand Creations - Forward Deployed Engineering Practice · <https://anand-creations.com>06/2024 - Present

Founder & Principal Forward Deployed Engineer

Independent forward deployed practice: I embed with a customer's team, run technical discovery, and ship production agentic AI inside their environment, from a one-week AI Opportunity Assessment through evals, tracing, and rollout. Also the home for the AI products I build and run.

- Flagship engagement, the GTM AI Brain: a temporal knowledge graph (Graphiti on Neo4j) unifying 5+ silos (Salesforce, HubSpot, Pendo, conversations, product usage) into one time-aware memory every agent reads and writes, with event-driven ingest over Pub/Sub and a per-agent query and write-back contract.

SwissNRI - AI Cross-border Fintech · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

AI-native cross-border tax and compliance platform for Swiss-Indian families, replacing spreadsheets and expensive advisors. RAG-grounded assistant answers DTAA, FEMA and Swiss tax questions in plain language with citations back to the regulation; compliance-first agentic design flags risk before users file, with regulatory guardrails built before features. Zero-to-MVP in 3 months, 40% uplift in satisfaction.

Proplab - AI for Real Estate · <https://proplab.io>09/2025 - Present

Founder & AI Product Builder

Property inspections run on paper, clipboards, and WhatsApp photos. Built an AI-native MVP: vision models turn inspection photos into structured records; LLM agents turn those records into marketing-ready listings.

- LLM listing generator turns inspection records into multilingual, marketing-ready property listings end-to-end. One agent workflow, zero copy-paste from photo to published listing.

EDUCATION

Quantic School of Business and Technology	2019 - 2020
<i>MBA Business Administration</i>	
EIT Digital	2014 - 2016
<i>Master (Programme) Innovation & Entrepreneurship</i>	
Eindhoven University of Technology (TU/e)	2015 - 2016
<i>MSc (Netherlands) Embedded Networking</i>	
KTH Royal Institute of Technology	2014 - 2015
<i>MSc (Sweden) Embedded Systems</i>	
Amrita Vishwa Vidyapeetham	2010 - 2014
<i>Bachelor of Engineering Electronics and Communication</i>	

CERTIFICATES

Building Modern Java Applications
AWS
Build LLM Apps with LangChain
DeepLearning.AI
Microsoft Certified Professional (MCPS)
Microsoft
MongoDB for Java Developers
MongoDB University

AWARDS

Appreciation from John T. Chambers (ex-CEO, Cisco Systems)
Cisco Systems
Recognized for contributions to strategic projects within Cisco's ecosystem
AWS Cloud Credits for Research
Amazon Web Services (2020)
TI India Analog Design Contest Winner
Texas Instruments
KTH Opportunities Fund
KTH Royal Institute of Technology
