Companies Founded

AI software engineer who ships agentic AI from ideation to production, not just prototypes. At LumApps I built multi-agent workflows on LangGraph and Google ADK over GCP Vertex AI, with ReAct and hierarchical delegation, plus AI Brain, a temporal knowledge graph grounding RAG retrieval across 5+ data silos: 2x open rates, 2x approved opportunities, \$1M forecast quarterly revenue. At Beekeeper I replaced a \$337K annual vendor contract with an in-house LLM pipeline in 6 weeks, running eval pipelines, tracing (LangSmith), and cost-per-request instrumentation for production systems serving 10M+ users. Fintech-adjacent by choice: an AI-native cross-border tax platform (SwissNRI) with regulatory guardrails and citation-backed answers, and a market intelligence platform (PulseView) that generates and justifies trading signals with evaluation built in.

WORK EXPERIENCE

LumApps · Lead Software Engineer

03/2026 - Present

Python LangChain LangGraph Google ADK GCP Vertex AI RAG MCP AG-UI Multi-Agent Systems ReAct
Evaluation Pipelines LangSmith Observability TypeScript FastAPI Neo4j Graphiti On-Call Salesforce

- Built and deployed production multi-agent workflows for outbound sales on Python, LangGraph and Google ADK over GCP Vertex AI, using ReAct, self-reflection and hierarchical delegation, with tools exposed over MCP servers and agent state streamed to the UI over AG-UI. 2x open rates, 2x approved opportunities, 2 to 3 hours saved per rep per day. Forecast: \$4M in approved opportunities per quarter; at 25% conversion, \$1M in quarterly revenue.
- Designed AI Brain, a temporal knowledge graph on Graphiti and Neo4j that unifies 5+ silos (Salesforce, HubSpot, Pendo, conversation transcripts, product usage) into one time-aware memory every agent reads and writes. Event-driven ingest over Pub/Sub, a query and write-back contract per agent, and a freshness layer that flags stale facts, grounding RAG retrieval to cut hallucinations.
- Led technical discovery through production: agent architecture, eval pipelines, agent tracing (LangSmith), tool-selection tuning, and cost-per-request instrumentation, with on-call for global production systems. Reports directly to C-level on outcomes, not progress.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

Python OpenAI Claude LangChain CrewAI Strands Agents Langfuse Java TypeScript Vue Kubernetes AWS
Kafka PostgreSQL Elastic Search ClickHouse Jenkins GitHub Actions Observability Grafana Datadog Logz.io On-Call

- Replaced \$337K in annual vendor translation costs with an LLM pipeline (GitHub Actions + OpenAI APIs) built in 6 weeks. 12K+ assets translated, product team now iterates without external gatekeepers.
- Built AI Onboarding Specialist giving every new signup personalized, high-touch guidance at scale. 100% of customers guided through setup, time-to-first-value reduced without adding headcount.
- Built and mentored the AI engineering cohort. Hired for craft and curiosity, grew engineers who now lead features independently.

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

AI Strategy Startup Evaluation Technical Mentoring Scalability

- Evaluated 20+ startups on technical architecture, scalability, and AI readiness to inform seed-to-VC investment decisions.
- Advised multiple portfolio companies on technical hiring, AI strategy, and building engineering cultures that actually ship.

Dronistics · Founding Engineer

08/2018 - 03/2020

Python Java PostgreSQL REST APIs Docker AWS Real-time Systems Logistics Optimization

- Shipped end-to-end autonomous drone delivery platform (Vue/Java/PostgreSQL). 500+ successful deliveries, every flight a live UX test for autonomous systems in the real world.
- Engineered real-time flight control APIs and logistics optimization algorithms. 40% faster deliveries, 99.5% safety record, zero incidents.

Anand Creations - Forward Deployed Engineering Practice · <https://anand-creations.com>06/2024 - Present

Founder & Principal Forward Deployed Engineer

Independent forward deployed practice: I embed with a customer's team, run technical discovery, and ship production agentic AI inside their environment, from a one-week AI Opportunity Assessment through evals, tracing, and rollout. Also the home for the AI products I build and run.

- Flagship engagement, the GTM AI Brain: a temporal knowledge graph (Graphiti on Neo4j) unifying 5+ silos (Salesforce, HubSpot, Pendo, conversations, product usage) into one time-aware memory every agent reads and writes, with event-driven ingest over Pub/Sub and a per-agent query and write-back contract.

SwissNRI - AI Cross-border Fintech · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

AI-native cross-border tax and compliance platform for Swiss-Indian families, replacing spreadsheets and expensive advisors. RAG-grounded assistant answers DTAA, FEMA and Swiss tax questions in plain language with citations back to the regulation; compliance-first agentic design flags risk before users file, with regulatory guardrails built before features. Zero-to-MVP in 3 months, 40% uplift in satisfaction.

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & Builder

Real-time market intelligence built for my own trading portfolio first, then opened to retail traders. AI agents generate AND justify trading signals from technical and news data, with explainability and evaluation built in: if the model can't explain the signal, it doesn't ship. Now serving live users on real-time feeds.
