\$4M

Quarterly Pipeline (AI Agent)

\$337K

Costs Eliminated

10M+

Users Served

3

Companies Founded

Forward-deployed by instinct: ship production AI agents inside customer systems, not slideware. Built outbound agents at LumApps forecast to generate \$4M in approved opportunities per quarter. Shipped AI products at Beekeeper for 10M+ frontline workers across retail, logistics, manufacturing, hospitality; partnered with Unilever on autonomous delivery at Dronistics. Comfortable in the messy middle between AI, process, and customer; founded 3 companies, biased to ship, low ego.

WORK EXPERIENCE

LumApps · Senior AI Engineer

03/2026 - Present

AI Agents LangChain FastAPI Python OpenAI GCP RAG MCP Evals Prompt Engineering Salesforce Integrations

- Built and deployed production AI agents for outbound sales (LangChain, FastAPI, GCP) with integrations across Salesforce, email, and internal CRM tooling. Own the full feedback loop with SDR and AE teams.
- Outcomes the GTM org measures by: 2x open rates, 2x approved opportunities, 2 to 3 hours saved per rep per day. Forecast to generate \$4M in approved opportunities per quarter.
- Expanded scope to own company-wide AI governance and sales enablement. Working sessions with sales leaders on where agents act, where humans verify, how outcomes are measured.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

AI Agents OpenAI Claude LangChain CrewAI Strands Agents Langfuse Evals Prompt Engineering Python Java
Vue Kubernetes AWS PostgreSQL ClickHouse GitHub Actions Webhooks APIs

- Built AI Onboarding Specialist that guides every new customer through setup with personalized, high-touch AI. 100% of customers guided without adding headcount. Same shape as an FDE engagement, productized.
- Replaced \$337K in annual vendor translation costs with an LLM pipeline (GitHub Actions + OpenAI) shipped in 6 weeks. 12K+ assets translated; product team iterates without external gatekeepers.
- Designed distributed templating engine that cut customer setup time 90% by redesigning the workflow, not automating the broken one. Powers 15% of all platform assets for 10M+ users.
- Co-owned GTM launches with Product and Sales (Seasonal Templates, Re-ignite Revenue, Sentiment Analysis). Each shipped with instrumentation so we knew within a week if it moved the customer's needle.

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

AI Strategy Technical Consulting Startup Evaluation Scalability Stakeholder Management

- Evaluated 20+ startups on technical architecture, scalability, and AI readiness to inform seed-to-VC investment decisions.
- Mentored Opt Alpha on scaling high-frequency algorithmic trading systems in production.

Dronistics · Founding Engineer

08/2018 - 03/2020

Vue Java PostgreSQL AWS Docker CI/CD APIs Logistics Optimization Real-time Systems

- Shipped end-to-end autonomous delivery platform (Vue, Java, PostgreSQL, AWS) with real-time flight control APIs and logistics optimization. 500+ deliveries powering a Unilever CPG partnership and a CES Las Vegas showcase. 40% faster, 99.5% safety, zero incidents.
- Built cloud infrastructure and CI/CD pipeline from scratch. Enterprise-grade reliability that earned customer trust from the first deployment.

EPFL, Laboratory of Intelligent Systems (Robogen) · Research Engineer

08/2016 - 07/2018

C++ Python AWS Genetic Algorithms Neural Networks Evolutionary AI Robotics Webots

- Engineered Robogen, an open-source platform for co-evolution of robot bodies and brains via genetic algorithms.
- Migrated the simulation pipeline to AWS for large-scale parallel evolution runs impractical on local hardware. Secured AWS Cloud Credits for Research; work featured on the AWS Public Sector Blog.
- Foundational AI experience (optimization, search, fitness landscapes, learning from environment) that informs how I approach modern LLM and agentic systems today.

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & Builder

AI agents that generate AND justify trading signals using technical and news data. Core principle: if the model cannot explain the signal, it does not ship. Verification before output, every time.

- Built the full stack solo: agent runtime, real-time market data integrations, signal generation and justification layer, web frontend.
- Live retail users after self-validating on my own portfolio. Explainability as the product, not a feature.

Proplab - AI Real Estate Tools · <https://proplab.io>09/2025 - Present

Founder & Builder

Property inspections ran on paper, clipboards, and WhatsApp photos. Redesigned the workflow before automating it: built MVP for a fully digital, image-backed, timestamped inspection process.

- Shipped MVP replacing paper-based inspection workflows with structured, image-backed, timestamped records.
- Building AI marketing assistant that auto-generates property listings from inspection data. One workflow, zero copy-paste.

SwissNRI - Cross-border Fintech Platform · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

Swiss-Indian families navigating FEMA, DTAA, and Swiss regulations had zero digital help. Just spreadsheets and expensive advisors. Built the first platform addressing this.

- Zero-to-MVP in 3 months. Compliance-first design: regulatory guardrails for both jurisdictions built before features.
- Customer feedback loops drove 40% uplift in satisfaction. Roadmap owned by what users actually asked for.

EDUCATION

Quantic School of Business and Technology	2019 - 2020
MBA Business Administration	
EIT Digital	2014 - 2016
Master (Programme) Innovation & Entrepreneurship	
Eindhoven University of Technology (TU/e)	2015 - 2016
MSc (Netherlands) Embedded Networking	
KTH Royal Institute of Technology	2014 - 2015
MSc (Sweden) Embedded Systems	
Amrita Vishwa Vidyapeetham	2010 - 2014
Bachelor of Engineering Electronics and Communication	

CERTIFICATES

Build LLM Apps with LangChain
DeepLearning.AI
Building Modern Java Applications
AWS
Microsoft Certified Professional (MCPS)
Microsoft
MongoDB for Java Developers
MongoDB University

AWARDS

Appreciation from John T. Chambers (ex-CEO, Cisco Systems)
Cisco Systems
Recognized for contributions to strategic projects within Cisco's ecosystem
AWS Cloud Credits for Research
Amazon Web Services (2020)
TI India Analog Design Contest Winner
Texas Instruments
KTH Opportunities Fund
KTH Royal Institute of Technology
