3	\$4M	\$337K	10M+
Companies Founded	Quarterly Pipeline (AI Agent)	Costs Eliminated	Users Served

Three-time founder who ships production AI agents that move company metrics. At LumApps, built outbound sales agents forecast to generate \$4M in approved opportunities per quarter; at Beekeeper led AI products for 10M+ frontline workers; founding engineer at EPFL spin-off Dronistics (Unilever partnership, CES showcase). On the side: PulseView (explainable trading AI, live users), Proplab (AI for real-estate ops), SwissNRI (cross-border fintech, 0-to-MVP in 3 months). Building toward a category-defining AI company; bias to ship, low ego, high standards.

WORK EXPERIENCE

LumApps · Senior AI Engineer 03/2026 - Present

AI AgentsLangChainFastAPIPythonOpenAIGCPRAGNeo4jGraphitiZep0-to-1

- Built and deployed production AI agents for outbound sales (LangChain, FastAPI, GCP). 2x open rates, 2x approved opportunities, 2 to 3 hours saved per rep per day. Forecast: \$4M in approved opportunities per quarter.
- Built AI Brain, an intelligent context layer (Neo4j + Graphiti + Zep) that unifies conversation data, usage analytics, and notes. Surfaces patterns that drive company strategy across product, sales, and CS.
- Reports directly to C-level on outcomes, not progress. Owns company-wide AI governance and sales enablement strategy.

Beekeeper AG · Senior Software Engineer (Technical Lead) 03/2020 - 02/2026

AI AgentsOpenAIClaudeLangChainCrewAISTRANDS AGENTSLangfusePythonJavaVueKubernetesAWSPostgreSQLClickHouseHiringGTM

- Architected Employee Referral System end-to-end as Tech Lead reporting to CIO. Top revenue channel on the platform: \$1.5M+ generated, \$500K ARR, 99.99% SLA. Built the team and ran GTM with Sales and PM.
- Replaced \$337K in annual vendor translation costs with an LLM pipeline shipped in 6 weeks (GitHub Actions + OpenAI). 12K+ assets translated; product team iterates without external gatekeepers.
- Built AI Onboarding Specialist giving every new signup personalized, high-touch guidance at scale. 100% of customers guided without adding headcount.
- Hired and mentored the AI engineering cohort. Hired for craft and curiosity; grew engineers who now lead features independently.

Tenity · Startup Mentor & Technology Evaluation Panelist 06/2024 - Present

VC DiligenceAI StrategyStartup EvaluationMentoringFounder Coaching

- Evaluated 20+ startups on technical architecture, scalability, and AI readiness to inform seed-to-VC investment decisions.
- Mentored Opt Alpha on scaling high-frequency algorithmic trading systems in production.

Dronistics (EPFL Spin-off) · Founding Engineer 08/2018 - 03/2020

Founding EngineerVueJavaPostgreSQLAWSDockerci/cdReal-time Systems0-to-1

- Shipped end-to-end autonomous delivery platform (Vue, Java, PostgreSQL, AWS) with real-time flight control APIs and logistics optimization. 500+ deliveries powering a Unilever partnership and a CES Las Vegas showcase. 40% faster, 99.5% safety, zero incidents.
- Built cloud infrastructure and CI/CD pipeline from scratch. Enterprise-grade reliability that earned customer trust from the first deployment.

EPFL, Laboratory of Intelligent Systems (Robogen) · Research Engineer 08/2016 - 07/2018

C++PythonAWSGenetic AlgorithmsNeural NetworksEvolutionary AIRoboticsWebots

- Engineered Robogen, an open-source platform for co-evolution of robot bodies and brains via genetic algorithms.
- Migrated the simulation pipeline to AWS for large-scale parallel evolution runs impractical on local hardware. Secured AWS Cloud Credits for Research; work featured on the AWS Public Sector Blog.
- Foundational AI experience (optimization, search, fitness landscapes, learning from environment) that informs how I approach modern LLM and agentic systems today.

PulseView - Explainable AI Market Intelligence · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & Builder

Real-time AI agents that generate AND justify trading signals from technical and news data. Built for my own portfolio first, then opened to retail traders. Core principle: if the model cannot explain the signal, it does not ship.

- Built the full stack solo: agent runtime, real-time market data integrations, signal generation and justification layer, web frontend. Live retail users.
- Wedge into a \$10B+ retail-trading TAM: explainability as the product, not a feature. Institutional-grade analysis priced for the retail trader.

Proplab - AI for Real Estate Operations · <https://proplab.io>09/2025 - Present

Founder & Builder

Property inspections run on paper, clipboards, and WhatsApp photos. Redesigned the workflow before automating it: built MVP for a fully digital, image-backed, timestamped inspection process. Now building the AI marketing assistant on top.

- Shipped MVP replacing paper-based inspection workflows with structured, image-backed, timestamped records.
- Wedge into the SMB real-estate vertical: tools that small teams can adopt without a six-month rollout.

SwissNRI - Cross-border Fintech for Swiss-Indians · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

Swiss-Indian families navigating FEMA, DTAA, and Swiss regulations had zero digital help, just spreadsheets and expensive advisors. Built the first platform addressing this underserved market.

- Zero-to-MVP in 3 months. Compliance-first design: regulatory guardrails for both jurisdictions built before features. Early users acquired through community partnerships.
- Customer feedback loops drove 40% uplift in satisfaction. Roadmap owned by what users actually asked for.
