Companies Founded

Owns AI transformation strategy, governance, and rollout at LumApps; reports directly to C-level on outcomes (production AI agents forecast to generate \$4M in approved opportunities per quarter). Six years technical lead at Beekeeper delivering AI products to 10M+ frontline workers across high-availability environments: shipped \$1.5M+ in new revenue and eliminated \$337K in vendor cost via LLM automation. Three companies founded on the side, plus startup advisory at Tenity including HFT mentoring. MBA, EPFL research background, hands-on with agentic AI and LLMs every day.

WORK EXPERIENCE

LumApps · Senior AI Engineer

03/2026 - Present

AI Transformation AI Strategy Governance ROI Roadmap Agentic AI LLMs Executive Reporting Change Management Python
LangChain Neo4j GCP

- Owns AI transformation strategy and governance across the company. Defines the AI roadmap with ROI metrics, evaluates technology choices, and drives adoption across a matrix organisation. This is the Head of AI Transformation mandate, executed from inside.
- Shipped production AI agents for outbound sales: 2x open rates, 2x approved opportunities, 2 to 3 hours saved per rep per day. Forecast: \$4M in approved opportunities per quarter, \$1M revenue at 25% conversion. AI translated directly into competitive edge.
- Built AI Brain, a knowledge-graph context layer (Neo4j, Graphiti, Zep) that grounds production agents in structured business intelligence. Surfaces patterns that drive executive decisions across product, sales, and CS.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

High-Availability Systems AI Transformation Cost Optimisation Cross-functional Leadership Hiring & Mentoring Java Python
OpenAI LangChain Kubernetes AWS

- Replaced \$337K in annual vendor translation costs with an LLM pipeline shipped in 6 weeks. 12K+ assets translated. Operational excellence: cheaper, faster, higher-quality delivery from day one.
- Architected Employee Referral System end-to-end. \$1.5M+ revenue, \$500K ARR. Designed for 99.99% SLA: high-availability environments, real customers, real money at stake.
- Built multiple production AI systems (AI Onboarding Specialist, GenAI demo generator, Sentiment Analysis) that accelerated product cycles and removed manual gatekeepers. Shipped each with instrumentation and ROI tracking from day one.
- Co-owned GTM launches across Product and Sales. Hired and mentored the AI engineering cohort. Change agent across a matrix of three teams; engineers now lead AI features independently.

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

AI Strategy Advisory Technology Evaluation High-Frequency Trading ROI Assessment Portfolio Mentoring

- Evaluated 20+ startups on AI readiness, architecture, and ROI potential. Findings inform seed-to-VC investment decisions; the closest analog to evaluating and selecting AI technologies at scale.
- Mentored Opt Alpha on scaling high-frequency algorithmic trading in production. Direct exposure to high-availability, low-latency environments where seconds and uptime translate to revenue.

Obermatt · Technical Product Manager (concurrent side role)

07/2018 - 01/2021

Product Management Roadmap Ownership Process Transformation Matrix Organisation Docker Agile

- Built strategic roadmaps that improved customer satisfaction and retention. Translated business priorities into engineering execution across a matrix of stakeholders.
- Drove process change: agile adoption (productivity up 20%) and CI/CD with Docker (deployment times down 30%). Operational excellence in microcosm.

Safety-Critical Systems

High-Availability

Real-time APIs

AWS

Cloud Architecture

Enterprise Delivery

- Architected end-to-end platform that enabled enterprise partnerships with Unilever and a CES Las Vegas showcase. Safety-critical real-time systems with zero tolerance for downtime.
- 500+ autonomous deliveries; 40% faster, 99.5% safety record, zero incidents. High-availability environment where every flight had revenue and reputation on the line.

EPFL Research

AI Foundations

AWS

Teaching & Mentoring

C++

Python

- Engineered Robogen at one of Europe's leading AI labs. Foundational AI work (optimization, search, fitness landscapes) that informs how I evaluate modern LLM and agentic systems today.
- Migrated simulation pipeline to AWS; secured AWS Cloud Credits for Research; work featured on the AWS Public Sector Blog.
- Teaching Assistant for Evolutionary Robotics. Supervised 20+ master's students; early reps at translating complex AI concepts to non-expert audiences.

ENTREPRENEURIAL PROJECTS

Founder & Builder

Founded an explainable AI market intelligence platform. Live agentic system delivering trading signals to real users, real money. Closest founder-built analog to a trading/betting environment.

- Real-time multi-agent system that generates AND justifies trading signals. Live users, real money, evaluation loop on every signal. Built solo while owning AI transformation at LumApps.

Co-Founder & Technical Lead

Co-founded an AI-native platform for Swiss-Indian families navigating FEMA, DTAA, and Swiss tax regulations. AI in a regulated, high-compliance environment.

- RAG-grounded tax assistant with citations to source regulation; AI agents flag compliance risks before users file. Zero-to-MVP in 3 months in a high-stakes regulated domain.

Founder & AI Product Builder

Founded an AI-native platform that remakes the property inspection workflow end-to-end. Vision models + LLM agents replacing a paper-and-WhatsApp process.

- End-to-end agent workflow from photo capture to published listing. Example of using AI to radically remake a core business function rather than just automate around it.

EDUCATION	CERTIFICATES	AWARDS
Quantic School of Business and Technology 2019 - 2020 MBA Business Administration	Build LLM Apps with LangChain DeepLearning.AI Building Modern Java Applications AWS Microsoft Certified Professional (MCPS) Microsoft MongoDB for Java Developers MongoDB University	Appreciation from John T. Chambers (ex-CEO, Cisco Systems) Cisco Systems Recognized for contributions to strategic projects within Cisco's ecosystem AWS Cloud Credits for Research Amazon Web Services (2020) TI India Analog Design Contest Winner Texas Instruments KTH Opportunities Fund KTH Royal Institute of Technology
EIT Digital 2014 - 2016 Master (Programme) Innovation & Entrepreneurship		
Eindhoven University of Technology (TU/e) 2015 - 2016 MSc (Netherlands) Embedded Networking		
KTH Royal Institute of Technology 2014 - 2015 MSc (Sweden) Embedded Systems		
Amrita Vishwa Vidyapeetham 2010 - 2014 Bachelor of Engineering Electronics and Communication
