

Anand Bhaskaran

Principal Frontend Platform & AI Engineer · Microfrontends, SDKs & Agent UIs · Distributed Systems · AWS · FinTech

Zurich, Switzerland · anandbaskaran3193@gmail.com · +41763043193 · in anandb3 · anandbhaskaran · anand-creations.com

10M+	15%	\$1.5M+	3
Users Served	Platform Assets (Shared Framework)	Revenue Shipped	Companies Founded

Principal-level engineer and hands-on architect who designs frontend platforms many teams build on, now building production AI on top. At Beekeeper I owned a microfrontends and module-federation architecture across web and hybrid mobile (Android, iOS) for products used by 10M+ users, distributing shared components and reusable frameworks so teams shipped independently (one now powers 15% of all platform assets). Today at LumApps I build production multi-agent AI systems with agent-native UIs, keeping modern AI fluency close to the platform. FinTech is home turf (trading, cross-border compliance, investment research), and I lead by example: hands-on, mentoring teams, and advising on technical strategy, with distributed-systems depth on AWS and continuous delivery.

WORK EXPERIENCE

LumApps · Senior AI Engineer 03/2026 - Present

TypeScript AI Agents AG-UI LLMs APIs GCP Python Architecture Technical Strategy

- Build production multi-agent AI systems on GCP (TypeScript, Python), including agent-native UIs streamed to the frontend over AG-UI: hands-on across the stack. 2x conversions, forecast \$1M in quarterly revenue.
- Designed clean APIs and integration boundaries between agents and 5+ external systems (Salesforce, HubSpot, product usage).
- Set engineering standards and report technical strategy to C-level.

Beekeeper AG · Senior Software Engineer (Technical Lead) 03/2020 - 02/2026

Microfrontends Module Federation Webpack TypeScript JavaScript Vue Hybrid Mobile Shared Components / SDKs AWS
Kubernetes Kafka CI/CD Java

- Owned a microfrontends and module-federation architecture across web and hybrid mobile (Android, iOS): distributed shared components and reusable frameworks so many teams shipped independently.
- Shipped a reusable framework (distributed templating engine) now powering 15% of all assets created on the platform (10M+ users): component distribution at scale.
- Architected fault-tolerant distributed systems on AWS and Kubernetes (Kafka, PostgreSQL, Elastic Search, ClickHouse) with CI/CD and test automation safe for continuous release.
- Led 3 teams, mentored the engineering cohort, and raised code-quality and testing standards across the org.

Tenity · Startup Mentor & Technology Evaluation Panelist 06/2024 - Present

Architecture Review Scalability FinTech Technical Influence Mentoring

- Reviewed platform and frontend architecture, scalability, and quality across 20+ startups, many in fintech.
- Mentored teams and influenced technical direction across organizations without direct authority.

Dronistics · Founding Engineer 08/2018 - 03/2020

Vue JavaScript APIs AWS CI/CD Java Production Operations

- Built the full-stack platform end to end (Vue frontend, Java, PostgreSQL, AWS) with real-time APIs, and operated it in production. 500+ deliveries, 99.5% safety, zero incidents.
- Built the CI/CD pipeline and cloud infrastructure from scratch, with reliability that earned partnerships with Unilever and a CES showcase.

EPFL, Laboratory of Intelligent Systems (Robogen) · Research Engineer 08/2016 - 07/2018

Distributed Computing AWS C++ Python Teaching

- Built Robogen, an open-source platform (C++, Python), and scaled a distributed pipeline on AWS. Secured AWS Cloud Credits for Research; featured on the AWS Public Sector Blog.
- Taught 20+ master's students hands-on, an early habit of raising the engineering bar in others.

Anand Creations - Engineering Practice · <https://anand-creations.com>06/2024 - Present

Founder & Principal Engineer

Independent practice: I architect and build full-stack products end to end, then distill them into reusable components, libraries, and reference architectures other teams build on. Hands-on across frontend, APIs, cloud, and CI/CD.

- Own the full stack solo, from frontend and APIs to cloud and delivery, and turn each build into reusable components and patterns.

PulseView - FinTech Market Intelligence · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & Builder

A real-time fintech platform built solo, from data pipelines and APIs to the web frontend where users access and act on live market data. Full-stack ownership with a customer-facing UI and explainable outputs.

SwissNRI - Cross-border FinTech Platform · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

AI-native cross-border tax and compliance platform for a regulated fintech domain. Web frontend plus a RAG-grounded backend with security and regulatory guardrails built before features. Zero-to-MVP in 3 months.
