

\$1.5M+	\$337K	10M+	3
Revenue Shipped	Costs Eliminated	Users Served	Companies Founded

Solution architect who turns AI and cloud into things customers and partners can actually ship: functional demos, proofs of concept, and enablement, not slideware. 13+ years across public cloud (GCP and AWS: compute, networking, microservices, Kubernetes), most recently building production AI on GCP Vertex AI at LumApps. I translate business outcomes into technical plans and back again for executives (MBA), and I have run the pre-sales enablement motion in practice: a GenAI demo system at Beekeeper that auto-generated customer-tailored demos and lifted close rates, plus workshops, keynotes, and hackathons that enable 1-to-many. I advise partners and startups on architecture and AI readiness (Tenity, 20+ evaluations) and stay accountable to ROI.

WORK EXPERIENCE

LumApps · Senior AI Engineer

03/2026 - Present

- GCPVertex AIAI Solution ArchitecturePre-Sales EnablementReference ArchitecturesRAGMulti-Agent SystemsBusiness-to-TechnologyROIPython

- Built production AI agents on GCP Vertex AI, plus functional AI demos and enablement that sales teams use to accelerate cycles. 2x conversions, forecast \$1M in quarterly revenue.
- Authored a reusable AI reference architecture (knowledge-graph retrieval) that downstream teams build on: the kind of replicable enterprise asset partners can deliver from.
- Translated business goals into technical plans and back for executives, reporting ROI to C-level against baselines and KPIs.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

- AWSKubernetesMicroservicesCloud-Native ArchitectureGenAI DemosPre-SalesSolution EngineeringJavaPythonElastic SearchGitHub Actions

- Built a GenAI demo system for Sales that auto-generated customer-tailored demos from live CRM data, accelerating sales cycles and lifting close rates. Pre-sales enablement in practice.
- Owned cloud-native architecture (AWS, Kubernetes, microservices) for products used by 10M+ users. Set reference patterns and technical standards across teams.
- Designed a distributed templating engine and reusable asset framework now powering 15% of all assets created on the platform. Replicable enterprise assets at scale.
- Hired and mentored engineers and co-owned GTM launches with Sales and Product, each instrumented so we could prove ROI within a week.

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

- Technical AdvisoryArchitecture ReviewAI ReadinessEnablementStakeholder Influence

- Acted as pre-sales technical authority across 20+ startups: architecture review, AI readiness, and go/no-go input for investment decisions.
- Mentored teams and advised on AI strategy and architecture: the 1-to-many enablement and technical influence this role runs on.

Dronistics · Founding Engineer

08/2018 - 03/2020

- AWSCloud ArchitectureAPIsCI/CDPartnershipsReal-time Systems

- Built cloud infrastructure and APIs on AWS from scratch. Enterprise-grade reliability that landed a partnership with Unilever and a showcase at CES Las Vegas.
- Shipped an end-to-end platform with real-time APIs and logistics optimization. 500+ deliveries, 99.5% safety record, zero incidents.

AWS

Machine Learning

Technical Workshops

Python

C++

- Migrated the simulation pipeline to AWS for large-scale parallel runs. Secured AWS Cloud Credits for Research; work featured on the AWS Public Sector Blog.
- Taught 20+ master's students hands-on: technical workshops and enablement at scale.

ENTREPRENEURIAL PROJECTS

Anand Creations - AI Solutions & Enablement Practice · <https://anand-creations.com>06/2024 - Present

Founder & Principal Solution Architect

Independent practice: I embed with a customer's team, run discovery and workshops, and turn AI into working demos, proofs of concept, and reusable reference architectures they can deliver from. Flagship: the GTM AI Brain, a knowledge-graph retrieval layer every agent shares.

- Distill each engagement into reusable modules and reference architectures so the next partner or team ships faster: the operating leverage this role rewards.

SwissNRI - Cross-border Fintech Platform · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

AI-native cross-border tax and compliance platform. RAG-grounded assistant answers DTAA, FEMA and Swiss tax questions with citations back to the regulation; compliance-first design with guardrails built before features. Zero-to-MVP in 3 months.

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & Builder

Real-time market intelligence built solo, from agent runtime and market integrations to the web frontend. A multi-agent system that generates signals with the evidence chain that justifies them; if the model can't explain a signal, it doesn't ship. Live retail users.

EDUCATION

Quantic School of Business and Technology	2019 - 2020
<i>MBA Business Administration</i>	
EIT Digital	2014 - 2016
<i>Master (Programme) Innovation & Entrepreneurship</i>	
Eindhoven University of Technology (TU/e)	2015 - 2016
<i>MSc (Netherlands) Embedded Networking</i>	
KTH Royal Institute of Technology	2014 - 2015
<i>MSc (Sweden) Embedded Systems</i>	
Amrita Vishwa Vidyapeetham	2010 - 2014
<i>Bachelor of Engineering Electronics and Communication</i>	

CERTIFICATES

Building Modern Java Applications
AWS
Build LLM Apps with LangChain
DeepLearning.AI
Microsoft Certified Professional (MCPS)
Microsoft
MongoDB for Java Developers
MongoDB University

AWARDS

AWS Cloud Credits for Research
Amazon Web Services (2020)
Appreciation from John T. Chambers (ex-CEO, Cisco Systems)
Cisco Systems
Recognized for contributions to strategic projects within Cisco's ecosystem
TI India Analog Design Contest Winner
Texas Instruments
KTH Opportunities Fund
KTH Royal Institute of Technology
