Companies Founded

Forward deployed engineer who ships production agentic AI into customer environments and stays accountable to the metric. 13+ years of shipping AI to real users, now through my own practice, Anand Creations: I embed with teams, lead technical discovery, and build multi-agent systems end to end. Current engagement LumApps, where agents on Python, LangGraph and GCP 2x outbound conversions and forecast \$1M in quarterly revenue, backed by a temporal knowledge-graph AI brain that unifies 5+ silos into one memory for every agent; earlier, a Beekeeper LLM pipeline that cut \$337K in vendor cost. I wire AI into existing systems over APIs and MCP servers, instrument every release with evals, granular tracing, and cost-per-request telemetry, and turn field patterns into reusable modules.

WORK EXPERIENCE

Lumapps · Senior AI Engineer

03/2026 - Present

Python TypeScript GCP Vertex AI LangChain LangGraph Google ADK MCP AG-UI FastAPI Multi-Agent Systems ReAct RAG Vector Databases Evaluation Pipelines Observability Neo4j Graphiti

- Shipped production multi-agent workflows for outbound sales on Python, LangGraph and Google ADK over GCP Vertex AI, using ReAct, self-reflection and hierarchical delegation with tools exposed via MCP servers. 2x open rates, 2x approved opportunities, 2 to 3 hours saved per rep per day. Forecast: \$4M in approved opportunities per quarter; at 25% conversion, \$1M in quarterly revenue.
- Built AI Brain, a context layer that ingests structured and unstructured signals (conversation data, usage analytics, notes) into a Neo4j and Graphiti knowledge graph, powering RAG retrieval for downstream agents.
- Led technical discovery through production: agent architecture, evaluation harnesses, granular tracing, and latency and cost-per-request instrumentation, with agent state streamed to the frontend over AG-UI.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

Python TypeScript LangChain CrewAI Strands Agents Langfuse RAG OpenAI Claude Java Vue Kubernetes AWS Kafka PostgreSQL GitHub Actions

- Replaced \$337K in annual vendor translation costs with an in-house LLM pipeline built in 6 weeks (GitHub Actions, OpenAI APIs, evaluation gates). 12K+ key-value pairs translated; product team iterates without external gatekeepers.
- Wired a GenAI demo system into Salesforce and live customer data, auto-generating personalized streams from name, description, and CRM context: connective tissue between AI and legacy data silos. Improved demo speed and close rates.
- Built AI Onboarding Specialist, a personalized agent that gives every new signup high-touch guided setup at scale. 100% of customers guided through onboarding without adding headcount.
- Hired and mentored the AI engineering cohort (deputy tech lead of FUEL). Co-built with PM and Sales on launches with instrumentation so we knew within a week if it moved the needle.

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

Technical Discovery AI Strategy AI Readiness Startup Evaluation Scalability

- Led technical discovery sessions with founders and engineering teams across 20+ startups on architecture, scalability, and AI readiness to inform seed-to-VC investment decisions.
- Mentored Opt Alpha on scaling high-frequency algorithmic trading systems in production; advised multiple portfolio companies on AI strategy and engineering culture.

Dronistics · Founding Engineer

08/2018 - 03/2020

Python Java Vue PostgreSQL AWS Docker CI/CD Real-time Systems Flight Control APIs Logistics Optimization

- Shipped end-to-end autonomous drone delivery platform (Vue, Java, PostgreSQL, AWS). 500+ successful last-mile deliveries; partnerships with Unilever and a showcase at CES Las Vegas.
- Engineered real-time flight control APIs, logistics optimization, and CI/CD from scratch. 40% faster deliveries, 99.5% safety record, zero incidents.

C++

Python

AWS

Genetic Algorithms

Neural Networks

Evolutionary AI

Robotics

Webots

- Engineered Robogen, an open-source platform for co-evolution of robot bodies and brains via genetic algorithms. Morphology and neural control evolve together through artificial selection.
- Migrated the simulation pipeline to AWS for large-scale parallel evolution runs impractical on local hardware. Secured AWS Cloud Credits for Research; work featured on the AWS Public Sector Blog.
- Foundational AI experience (optimization, search, fitness landscapes, learning from environment) that informs how I approach modern LLM and agentic systems today.

ENTREPRENEURIAL PROJECTS

Anand Creations - Forward Deployed Engineer as a Service · <https://anand-creations.com>

06/2024 - Present

Founder & Principal Forward Deployed Engineer

Independent forward-deployed practice: embed with a customer's team, run technical discovery, and jointly ship production agentic AI in their environment, from a one-week AI Opportunity Assessment through evals, tracing, and rollout. Also the home for the AI products I build and run.

- Flagship case study, the GTM AI Brain: a temporal knowledge graph (Graphiti on Neo4j) that unifies 5+ silos (Salesforce, HubSpot, Pendo, conversation transcripts, product usage) into one time-aware memory every agent reads and writes. Event-driven ingest over Pub/Sub on GCP, a query and write-back contract per agent, and a freshness layer that flags stale facts for re-fetch.

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>

05/2025 - Present

Founder & Builder

Real-time market intelligence platform. Multi-agent system that generates AND justifies trading signals from technical and news data, with explainability and evaluation built in from day one: if the model can't explain the signal, it doesn't ship. Built for my own portfolio first, now serving live retail users.

SwissNRI - Cross-border Fintech Platform · <https://www.swissnri.com>

01/2024 - Present

Co-Founder & Technical Lead

AI-native cross-border tax and compliance platform for Indians in Switzerland. RAG-grounded assistant answers DTAA, FEMA and Swiss tax questions with citations back to source regulation; agents flag cross-border risk before users file. Zero-to-MVP in 3 months, 40% uplift in satisfaction.

EDUCATION

Quantic School of Business and Technology	2019 - 2020
MBA Business Administration	
EIT Digital	2014 - 2016
Master (Programme) Innovation & Entrepreneurship	
Eindhoven University of Technology (TU/e)	2015 - 2016
MSc (Netherlands) Embedded Networking	
KTH Royal Institute of Technology	2014 - 2015
MSc (Sweden) Embedded Systems	
Amrita Vishwa Vidyapeetham	2010 - 2014
Bachelor of Engineering Electronics and Communication	

CERTIFICATES

Build LLM Apps with LangChain
DeepLearning.AI
Building Modern Java Applications
AWS
Microsoft Certified Professional (MCPS)
Microsoft
MongoDB for Java Developers
MongoDB University

AWARDS

Appreciation from John T. Chambers (ex-CEO, Cisco Systems)
Cisco Systems
Recognized for contributions to strategic projects within Cisco's ecosystem
AWS Cloud Credits for Research
Amazon Web Services (2020)
TI India Analog Design Contest Winner
Texas Instruments
KTH Opportunities Fund
KTH Royal Institute of Technology
