Forward deployed engineer who owns AI initiatives from discovery through production. Full-time Lead Software Engineer at LumApps: I build multi-agent workflows that unify Salesforce, HubSpot and other systems of record into one agent memory, ship in weeks not quarters, and stay on-call for what I ship. 13+ years running production software for customers, not just writing it: replaced a \$337K vendor contract with an LLM pipeline shipped in 6 weeks at Beekeeper, founding engineer for an autonomous drone delivery platform at Dronistics, and founder of Anand Creations, a forward deployed practice and the home for the GenAI products I build and ship myself. I ship the 20% that unblocks the customer's real problem, not the 80% that looks good in a demo.

WORK EXPERIENCE

LumApps · Lead Software Engineer03/2026 - Present

PythonTypeScriptGCPVertex AILangChainLangGraphGoogle ADKMCPAG-UIFastAPIMulti-Agent Systems

ReActRAGSalesforceEvaluation PipelinesLangSmithObservabilityOn-CallNeo4jGraphiti

- Own AI agent delivery end-to-end, from discovery through production and on-call, staying accountable for what I ship: a you-build-it-you-run-it model.
- Built and deployed production multi-agent workflows for outbound sales on Python, LangGraph and Google ADK over GCP Vertex AI, integrating tools over MCP servers with agent state streamed to the UI over AG-UI. 2x open rates, 2x approved opportunities, 2 to 3 hours saved per rep per day. Forecast: \$1M in quarterly revenue.
- Led technical discovery through production: agent architecture, eval pipelines, agent tracing (LangSmith), tool-selection tuning, and cost-per-request instrumentation, with on-call for global production systems.

Beekeeper AG · Senior Software Engineer (Technical Lead)03/2020 - 02/2026

JavaPythonTypeScriptVueSalesforceKubernetesAWSOpenAILangChainKafkaPostgreSQLElastic Search

JenkinsGitHub ActionsClickHouseClaudeLangfuseCrewAISTrands AgentsObservabilityGrafanaDatadogLogz.io

On-Call

- Replaced \$337K in annual vendor translation costs with an LLM pipeline built in 6 weeks (prototype to production). 12K+ assets translated, product team now iterates without external gatekeepers.
- Architected Employee Referral System end-to-end. Became the platform's top revenue channel (\$1.5M+ generated, \$500K ARR). Designed for 99.99% SLA because customer trust is measured in uptime.
- Built GenAI demo system for sales that auto-generates personalized content from Salesforce data so every pitch feels custom-built for that customer. Improved demo speed and close rates.
- Ran observability and on-call for global production systems (Grafana, Datadog, Logz.io): logs, metrics, dashboards, and alerting for everything I shipped.

Tenity · Startup Mentor & Technology Evaluation Panelist06/2024 - Present

AI StrategyStartup EvaluationTechnical MentoringAlgorithmic TradingScalability

- Evaluated 20+ startups on technical architecture, scalability, and AI readiness to inform seed-to-VC investment decisions.
- Advised multiple portfolio companies on technical hiring, AI strategy, and building engineering cultures that actually ship.

Dronistics · Founding Engineer08/2018 - 03/2020

VueJavaPostgreSQLAWSDockerTerraformInfrastructure as CodeCI/CDReal-time SystemsFlight Control APIs

Logistics Optimization

- Shipped end-to-end autonomous drone delivery platform (Vue/Java/PostgreSQL). 500+ successful deliveries, every flight a live UX test for autonomous systems in the real world.
- Built cloud infrastructure and DevOps pipeline from scratch. Enterprise-grade reliability that enabled partnerships with Unilever and a CES showcase.

Anand Creations - Forward Deployed Engineering Practice · <https://anand-creations.com>06/2024 - Present

Founder & Principal Forward Deployed Engineer

Independent forward deployed engineering practice, currently the home for the AI products I design, build, and run on my own (SwissNRI, Proplab, PulseView). Open to forward-deployed client engagements: embedding with a team, running technical discovery, and shipping production agentic AI end to end.

- Take my own products from zero to production end to end: multi-agent systems, RAG grounding, eval pipelines, and observability, the same playbook I bring to any engagement.

SwissNRI - AI Cross-border Fintech · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

AI-native cross-border tax and compliance platform for Swiss-Indian families, replacing spreadsheets and expensive advisors. RAG-grounded assistant answers DTAA, FEMA and Swiss tax questions in plain language with citations back to the regulation; compliance-first agentic design flags risk before users file, with regulatory guardrails built before features. Zero-to-MVP in 3 months, 40% uplift in satisfaction.

Proplab - AI for Real Estate · <https://proplab.io>09/2025 - Present

Founder & AI Product Builder

Property inspections run on paper, clipboards, and WhatsApp photos. Built an AI-native MVP: vision models turn inspection photos into structured records; LLM agents turn those records into marketing-ready listings.

- Vision pipeline extracts structured signals (room type, condition, defects) from inspection photos; LLM agents turn those records into multilingual, marketing-ready listings end to end, zero copy-paste from photo to published listing.
