Costs Eliminated

10M+

Users Served

3

Companies Founded

Full-stack engineer with 13+ years shipping robust, tested products used by 10M+ users. I work across the stack in TypeScript and design the data models, integrations, and reliability behind data-intensive systems (Kafka, PostgreSQL, Elastic Search, ClickHouse), on a modern cloud stack (GCP, Terraform, Kubernetes, Docker, GitHub Actions). Fintech and compliance are familiar ground: I built a cross-border tax and compliance platform (SwissNRI), an explainable trading-signal system (PulseView), and financial data products at Obermatt. As a three-time founder, the impact of equity on entrepreneurship is not abstract to me, and I mentor, review, and raise engineering standards wherever I land.

WORK EXPERIENCE

LumApps · Lead AI Engineer

03/2026 - Present

TypeScript Python GCP Data Modeling APIs Neo4j Integrations Testing

- Designed and shipped production services on GCP in TypeScript and Python, owning architecture, data flows, and rollout.
- Built a knowledge-graph data layer (Neo4j) integrating 5+ systems (Salesforce, HubSpot, product usage): complex data modeling and integrations.
- Instrumented every release with tracing, evals, and cost telemetry, and reported outcomes to C-level. Robust and measurable by design.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

TypeScript Vue Java Kubernetes AWS Kafka PostgreSQL Elastic Search ClickHouse Microservices Testing
GitHub Actions

- Owned end-to-end architecture for multiple products used by 10M+ users (TypeScript, Vue, Java, Kubernetes, AWS): robust, modular, and tested by design.
- Led a search platform revamp across 3 teams (indexing and ranking) over a data stack of Kafka, PostgreSQL, Elastic Search and ClickHouse: complex data transformations at scale.
- Architected the Employee Referral system end to end: became the top revenue channel (\$1.5M+ generated, \$500K ARR), designed for a 99.99% SLA. A financial feature with reliability that customers trust.
- Hired and mentored engineers, ran code reviews, and set engineering standards as deputy tech lead.

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

Architecture Review FinTech Scalability Mentoring System Design

- Reviewed architecture and scalability across 20+ startups, many in fintech, informing investment decisions.
- Mentored engineers and advised on engineering standards and culture that ships.

Dronistics · Founding Engineer

08/2018 - 03/2020

TypeScript Vue Java PostgreSQL AWS Docker CI/CD APIs Testing

- Shipped a full-stack platform (Vue, TypeScript, Java, PostgreSQL, AWS) with real-time APIs and data flows. 500+ deliveries, 99.5% safety record, zero incidents.
- Built the cloud infrastructure and CI/CD from scratch, with reliability that enabled partnerships with Unilever and a CES showcase.

EPFL, Laboratory of Intelligent Systems (Robogen) · Research Engineer

08/2016 - 07/2018

C++ Python AWS Distributed Computing Teaching

- Built Robogen, an open-source platform (C++, Python), and scaled the pipeline on AWS. Secured AWS Cloud Credits for Research; featured on the AWS Public Sector Blog.
- Taught 20+ master's students hands-on, an early habit of raising the bar in other engineers.

ENTREPRENEURIAL PROJECTS

Co-Founder & Technical Lead

AI-native cross-border tax and compliance platform for a regulated domain. Full-stack build with compliance-first data handling: guardrails and regulatory logic built before features, citations back to source regulation. Zero-to-MVP in 3 months.

Founder & Builder

Real-time market intelligence built solo, from data integrations and signal logic to the web frontend. Complex financial data transformations turned into explainable signals; if the model can't explain a signal, it doesn't ship. Live retail users.

Founder & Builder

AI product built end-to-end on Replit: a vision pipeline turns inspection photos into structured records, then agents turn records into multilingual, marketing-ready listings. A full-stack product shipped solo from data model to UI.

EDUCATION

Quantic School of Business and Technology	2019 - 2020
<i>MBA Business Administration</i>	
EIT Digital	2014 - 2016
<i>Master (Programme) Innovation & Entrepreneurship</i>	
Eindhoven University of Technology (TU/e)	2015 - 2016
<i>MSc (Netherlands) Embedded Networking</i>	
KTH Royal Institute of Technology	2014 - 2015
<i>MSc (Sweden) Embedded Systems</i>	
Amrita Vishwa Vidyapeetham	2010 - 2014
<i>Bachelor of Engineering Electronics and Communication</i>	

CERTIFICATES

MongoDB for Java Developers
MongoDB University
Building Modern Java Applications
AWS
Build LLM Apps with LangChain
DeepLearning.AI
Microsoft Certified Professional (MCPS)
Microsoft

AWARDS

Appreciation from John T. Chambers (ex-CEO, Cisco Systems)
Cisco Systems
Recognized for contributions to strategic projects within Cisco's ecosystem
AWS Cloud Credits for Research
Amazon Web Services (2020)
TI India Analog Design Contest Winner
Texas Instruments
KTH Opportunities Fund
KTH Royal Institute of Technology
