Companies Founded

Technical leader who stays on the tools: as Tech Lead at Beekeeper I owned architecture end-to-end (Employee Referral System, \$1.5M+ revenue channel), was acting hiring manager for AI roles, and mentored engineers who now lead features independently as deputy tech lead of FUEL. I've founded three companies (Anand Creations, SwissNRI, PulseView), so I know what it takes to build an engineering effort from zero, not just direct one. Currently embedded at LumApps building production multi-agent AI systems on LangGraph, Google ADK, and MCP that 2x outbound conversions, the agentic-AI team experience this role wants, built by someone who ships, not just researches. 13+ years measuring myself by customer outcomes and revenue impact, not process compliance.

WORK EXPERIENCE

LumApps · Lead Software Engineer

03/2026 - Present

Python TypeScript LangChain LangGraph Google ADK MCP GCP Vertex AI AG-UI Multi-Agent Systems RAG Evaluation Pipelines LangSmith Observability FastAPI Neo4j Graphiti On-Call Salesforce

- Built and deployed production multi-agent workflows for outbound sales on Python, LangGraph and Google ADK over GCP Vertex AI, using ReAct, self-reflection and hierarchical delegation, with tools exposed over MCP servers and agent state streamed to the UI over AG-UI. 2x open rates, 2x approved opportunities, 2 to 3 hours saved per rep per day. Forecast: \$4M in approved opportunities per quarter; at 25% conversion, \$1M in quarterly revenue.
- Designed AI Brain, a temporal knowledge graph on Graphiti and Neo4j that unifies 5+ silos (Salesforce, HubSpot, Pendo, conversation transcripts, product usage) into one time-aware memory every agent reads and writes. Event-driven ingest over Pub/Sub, a query and write-back contract per agent, and a freshness layer that flags stale facts, grounding RAG retrieval to cut hallucinations.
- Led technical discovery through production: agent architecture, eval pipelines, agent tracing, tool-selection tuning, and cost-per-request instrumentation, with on-call for global production systems. Reports directly to C-level on outcomes, not progress.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

Java Python TypeScript Vue Kubernetes AWS Technical Hiring Mentoring OpenAI LangChain Kafka PostgreSQL Elastic Search Jenkins GitHub Actions ClickHouse Observability Grafana Datadog Logz.io On-Call

- Architected Employee Referral System end-to-end as Tech Lead reporting to CIO. Became the platform's top revenue channel (\$1.5M+ generated, \$500K ARR). Designed for 99.99% SLA because customer trust is measured in uptime.
- Built and mentored the AI engineering cohort as acting hiring manager for AI roles: defined the bar, ran the process, closed candidates, and grew engineers who now lead features independently. Deputy tech lead of FUEL.
- Led Search Platform revamp across 3 teams. Redesigned indexing and ranking to surface what users mean to find, not just what they typed. Measurable lift in user engagement.
- Replaced \$337K in annual vendor translation costs with an LLM pipeline built in 6 weeks. 12K+ assets translated, product team now iterates without external gatekeepers.

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

Technical Hiring Engineering Culture AI Strategy Startup Evaluation Scalability

- Advised multiple portfolio companies on technical hiring, AI strategy, and building engineering cultures that actually ship.
- Evaluated 20+ startups on technical architecture, scalability, and AI readiness to inform seed-to-VC investment decisions.

Dronistics · Founding Engineer

08/2018 - 03/2020

Vue Java PostgreSQL AWS Docker Terraform CI/CD Real-time Systems

- Shipped end-to-end autonomous drone delivery platform (Vue/Java/PostgreSQL) from zero as a founding engineer. 500+ successful deliveries, every flight a live UX test for autonomous systems in the real world.
- Built reliability in from day one, enabling enterprise partnerships with Unilever and a showcase at CES Las Vegas.

Anand Creations - Forward Deployed Engineering Practice · <https://anand-creations.com>06/2024 - Present

Founder & Principal Forward Deployed Engineer

Independent forward deployed practice: I embed with a customer's team, run technical discovery, and ship production agentic AI inside their environment, from a one-week AI Opportunity Assessment through evals, tracing, and rollout. Also the home for the AI products I build and run.

- Flagship engagement, the GTM AI Brain: a temporal knowledge graph (Graphiti on Neo4j) unifying 5+ silos (Salesforce, HubSpot, Pendo, conversations, product usage) into one time-aware memory every agent reads and writes, with event-driven ingest over Pub/Sub and a per-agent query and write-back contract.

SwissNRI - AI Cross-border Fintech · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

AI-native cross-border tax and compliance platform for Swiss-Indian families, replacing spreadsheets and expensive advisors. RAG-grounded assistant answers DTAA, FEMA and Swiss tax questions in plain language with citations back to the regulation; compliance-first agentic design flags risk before users file, with regulatory guardrails built before features. Zero-to-MVP in 3 months, 40% uplift in satisfaction.

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & Builder

Real-time market intelligence built for my own trading portfolio first, then opened to retail traders. AI agents generate AND justify trading signals from technical and news data, with explainability and evaluation built in: if the model can't explain the signal, it doesn't ship. Now serving live users on real-time feeds.
