Companies Founded

Hands-on principal engineer who architects, reviews, and ships agentic systems in production. Built and operates the AI agent platform at LumApps: multi-agent orchestration, knowledge-graph grounding (Neo4j, Graphiti, Zep), evaluation and observability via Langfuse. 10+ years owning the technical core of products used by 10M+ users; technical lead at Beekeeper across CrewAI, Strands Agents, OpenAI, and LangChain. Three companies founded on the side, so I know what owning a product feels like.

WORK EXPERIENCE

LumApps · Senior AI Engineer

03/2026 - Present

[Python](#) [LangChain](#) [FastAPI](#) [Multi-Agent Systems](#) [Neo4j](#) [Graphiti](#) [Zep](#) [Langfuse](#) [OpenAI](#) [RAG](#) [Evaluation Pipelines](#)
[GCP](#)

- Architected and shipped production multi-agent systems for outbound sales. Tool design, reasoning loops, grounding, context windows. 2x open rates, 2x approved opportunities, 2 to 3 hours saved per rep per day. Forecast: \$4M approved opportunities per quarter, \$1M revenue at 25% conversion.
- Built AI Brain, a knowledge-graph context layer (Neo4j, Graphiti, Zep) that grounds production agents in structured business intelligence. Unifies 8+ data silos so agents reason over typed relationships, not vector chunks.
- Owned the reliability layer: Langfuse for evaluation and observability, replay-driven evals on a golden set, prompt regression gates before rollout. Agent behaviour measurable and dependable, not vibes.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

[Python](#) [Java](#) [TypeScript](#) [Vue](#) [OpenAI](#) [Claude](#) [LangChain](#) [CrewAI](#) [Strands Agents](#) [Langfuse](#) [Multi-Agent Systems](#)
[Kubernetes](#) [AWS](#) [Kafka](#) [PostgreSQL](#) [Elastic Search](#) [Microfrontends](#)

- Built and operated multiple production AI systems on real traffic: AI Onboarding Specialist, GenAI demo generator, LLM translation pipeline. Real users, real failure modes, full evaluation and observability stack (Langfuse, CrewAI, Strands Agents).
- Replaced \$337K in annual vendor translation costs with an LLM pipeline shipped in 6 weeks. 12K+ assets translated. Same-day turnaround vs the vendor's 2 weeks.
- Led Search Platform revamp across 3 teams. Redesigned indexing, ranking, and retrieval; raised the engineering bar on code review, CI, and modular architecture for downstream AI components.
- Hired and mentored the AI engineering cohort. Set engineering standards for AI code: modular components, evaluation harnesses, observability by default. Engineers now lead AI features independently.

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

[AI Architecture](#) [Multi-Agent Systems](#) [Cloud-Native](#) [Startup Evaluation](#) [Technical Mentoring](#)

- Evaluated 20+ startups on production AI architecture, multi-agent design, and cloud-native scalability. Findings inform seed-to-VC investment decisions.
- Advised portfolio companies on agentic workflows, evaluation pipelines, and engineering standards that ship to real users.

Dronistics · Founding Engineer

08/2018 - 03/2020

[Vue](#) [Java](#) [PostgreSQL](#) [AWS](#) [Docker](#) [CI/CD](#) [Real-time Systems](#) [Autonomous Systems](#)

- Architected and shipped the end-to-end platform (Vue, Java, PostgreSQL, AWS). 500+ autonomous deliveries; partnerships with Unilever and a CES showcase. Production-grade reliability from day one.
- Built CI/CD pipeline and cloud infrastructure from scratch. Real-time flight control APIs and logistics optimization: 40% faster deliveries, 99.5% safety record, zero incidents.

C++

Python

AWS

Genetic Algorithms

Neural Networks

Evolutionary AI

Robotics

Webots

- Engineered Robogen, an open-source platform for co-evolution of robot bodies and brains via genetic algorithms. Distributed multi-agent simulation across artificial selection cycles.
- Migrated the simulation pipeline to AWS for large-scale parallel evolution runs. Secured AWS Cloud Credits for Research; work featured on the AWS Public Sector Blog.
- Foundational AI experience (optimization, search, fitness landscapes, learning from environment) that directly informs how I architect agent reasoning loops today.

ENTREPRENEURIAL PROJECTS

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>

05/2025 - Present

Founder & Builder

Production agentic system that carries market analysis through to a finished, explainable result. Built for my own trading portfolio first, then opened to retail traders.

- Real-time multi-agent system that generates signals AND justifies them. Live users, real money, evaluation loop on every signal. Core principle: if the model can't justify the signal, it doesn't ship.

Proplab - AI for Real Estate · <https://proplab.io>

09/2025 - Present

Founder & AI Product Builder

AI-native platform for small real estate teams. Vision models turn inspection photos into structured records; LLM agents turn those records into marketing-ready listings, end-to-end.

- End-to-end agent workflow from photo capture to published listing: vision pipeline extracts structured signals, LLM agents generate multilingual listings, human approval gate before publish.

SwissNRI - AI Cross-border Fintech · <https://www.swissnri.com>

01/2024 - Present

Co-Founder & Technical Lead

AI-native platform for Swiss-Indian families navigating FEMA, DTAA, and Swiss tax regulations. Zero digital alternatives existed: just spreadsheets and expensive advisors.

- RAG-grounded tax assistant that answers cross-border compliance questions with citations back to the source regulation. AI agents flag DTAA and FEMA risks before users file.

EDUCATION	CERTIFICATES	AWARDS
Quantic School of Business and Technology 2019 - 2020 MBA Business Administration	Build LLM Apps with LangChain DeepLearning.AI Microsoft Certified Professional (MCPS) Microsoft Building Modern Java Applications AWS MongoDB for Java Developers MongoDB University	Appreciation from John T. Chambers (ex-CEO, Cisco Systems) Cisco Systems Recognized for contributions to strategic projects within Cisco's ecosystem AWS Cloud Credits for Research Amazon Web Services (2020) TI India Analog Design Contest Winner Texas Instruments KTH Opportunities Fund KTH Royal Institute of Technology
