Companies Founded

Rare combination of authentic Physical AI domain depth and commercial AI-shipping track record. Built Robogen at EPFL (open-source platform for co-evolution of robot bodies and brains via genetic algorithms, scaled to AWS for parallel simulation, taught the subject to 20+ master's students). Founding engineer at Dronistics where 500+ autonomous deliveries powered partnerships with Unilever and a CES showcase. Built production AI agents at LumApps that generated a forecast \$4M/quarter pipeline, founded three companies, and speak fluently with VC-backed founders and CTOs. MBA-trained on turning technical wins into repeatable commercial motions.

WORK EXPERIENCE

LumApps · Senior AI Engineer

03/2026 - Present

Pipeline Generation AI Agents Sales Enablement GTM Strategy Python LangChain FastAPI GCP OpenAI Claude

- Built and deployed production AI agents for outbound pipeline generation. 2x open rates, 2x approved opportunities; forecast \$4M in approved opportunities per quarter at 25% conversion. Personal proof of how AI moves pipeline metrics.
- Owns company-wide AI transformation strategy, governance, and sales enablement. Translates frontier AI capability into category-defining commercial motion.
- Built AI Brain, the intelligent context layer unifying conversation data, usage analytics, and notes; surfaces deal patterns that inform sales playbooks across product, sales, and CS.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

GTM Launches Sales Plays Salesforce AI Agents OpenAI Claude LangChain CrewAI Strands Agents Python Java
Vue Kubernetes AWS Inference Optimization

- Co-owned GTM launches with Product and Sales (Seasonal Templates, Re-ignite Revenue, Employee Referral, Sentiment Analysis). Codified what worked into reusable launch playbooks; each shipped with instrumentation so the bet was proven or killed within a week.
- Built GenAI demo system for Sales: auto-generates personalized content from Salesforce data so every pitch feels custom-built for that customer. Improved demo speed and close rates.
- Architected Employee Referral System end-to-end. Became the platform's top revenue channel (\$1.5M+ generated, \$500K ARR). Designed for 99.99% SLA because customer trust is measured in uptime.
- Replaced \$337K in annual vendor translation contract with an in-house LLM pipeline in 6 weeks. Direct vendor spend control and proof of compute-cost ROI reasoning.

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

VC-backed Startups AI Strategy Founder Advisory Infrastructure Scalability

- Evaluated 20+ venture-backed startups on technical architecture, scalability, and AI readiness. Same lens used to engage founder and CTO buyers.
- Mentored portfolio companies including Opt Alpha on scaling AI and infrastructure systems in production. Speak the language of the builders, not just the buyer.

Dronistics · Founding Engineer

08/2018 - 03/2020

Autonomous Systems Robotics Real-time Control Cloud Infrastructure AWS Optimization APIs

- Shipped end-to-end autonomous drone delivery platform (real-time control APIs, cloud, optimization). 500+ live deliveries, 40% faster deliveries, 99.5% safety record, zero incidents. Hands-on with autonomous systems running in the real world.
- Built cloud infrastructure and CI/CD pipeline from scratch. Enterprise-grade reliability that secured partnerships with Unilever and a CES Las Vegas showcase.

RoboticsSimulationEmbodied AIGenetic AlgorithmsNeural NetworksAWS GPUC++PythonWebots

- Engineered Robogen, an open-source platform where robot bodies and brains co-evolve via genetic algorithms. Rare research direction at the intersection of morphology, neural control, and simulation. Directly relevant to Physical AI and embodied intelligence.
- Migrated the simulation pipeline to AWS for large-scale parallel evolution runs impractical on local hardware. Secured AWS Cloud Credits for Research; work featured on the AWS Public Sector Blog. First-hand experience of compute-intensive simulation workloads on cloud GPU.
- Teaching Assistant for Evolutionary Robotics at EPFL. Supervised 20+ master's students through hands-on projects in genetic algorithms, neural controllers, and embodied AI. Comfortable teaching the builders.

ENTREPRENEURIAL PROJECTS

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>

05/2025 - Present

Founder & Builder

Consumption-based AI product. Real-time AI agents that generate AND justify trading signals using technical and news-based data. Self-funded, self-validated, opened to live users.

- Built and operate a consumption-based AI product end-to-end: model choice, prompt design, cost-to-serve, customer acquisition. Founder empathy with the AI-native buyer.
- Live users on real-time market feeds. Direct experience of how compute and inference costs shape unit economics.

Proplab - AI Real Estate Tools · <https://proplab.io>

09/2025 - Present

Founder & Builder

Indie AI initiative replacing paper-based property inspections with structured, image-backed, timestamped digital records, plus an AI marketing assistant.

- Shipped MVP replacing paper-based inspection workflows with structured, image-backed, timestamped records.
- Building AI marketing assistant that auto-generates property listings from inspection data.

SwissNRI - Cross-border Fintech Platform · <https://www.swissnri.com>

01/2024 - Present

Co-Founder & Technical Lead

Cross-border SaaS for Swiss-Indian families navigating FEMA, DTAA, and Swiss regulations. Zero-to-MVP in 3 months with feedback-driven iteration.

- Zero-to-MVP in 3 months. Early users acquired through community partnerships.
- Customer feedback loops drove 40% uplift in satisfaction.
