Companies Founded

Full-stack builder and product-minded engineer who owns problems end to end, from customer need to shipped, AI-powered feature. At LumApps I built and shipped a production AI agent that 2x outbound conversions and is forecast to generate \$1M in quarterly revenue. I found and ship products solo too (PulseView, Proplab, SwissNRI, zero-to-MVP in months), building AI-native with Claude and Cursor to prototype in hours and iterate on real user outcomes. MBA-trained product thinker: I write the spec, design the flow, build the thing, and stay accountable to the metric.

WORK EXPERIENCE

LumApps · Lead AI Engineer

03/2026 - Present

AI Product Full-Stack AI Agents Multi-Agent Systems MCP LLMs RAG TypeScript Python GCP Rapid Prototyping AI-Assisted Development

- Own AI features end to end: from problem statement to a shipped multi-agent product on GCP. 2x open rates, 2x approved opportunities, forecast \$1M in quarterly revenue.
- Shipped multi-agent orchestration (ReAct, self-reflection, tools over MCP servers) that saves reps 2 to 3 hours per day: a real user outcome, not a demo.
- Built the AI Brain behind the agents: a knowledge-graph and RAG retrieval layer (Graphiti, Neo4j) that pulls the right context so outputs stay grounded and reliable.
- Build AI-native and fast, prototyping in hours and iterating to production on real user outcomes with evals and instrumentation.
- Work across product and engineering: write the spec, design the flow, build it, and report outcomes to C-level.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

Full-Stack AI Products Vue TypeScript Java Python Product Sense Success Metrics AWS Rapid Iteration

- Shipped AI-powered, customer-facing products used by 10M+ users (onboarding agent, GenAI demo system, LLM pipeline): reliable and delightful, not just novel.
- Replaced \$337K in vendor cost with an LLM pipeline built in 6 weeks: rapid, high-leverage prototyping straight to production.
- Co-owned features with Product and Sales, each shipped with success metrics and feedback loops so we knew within a week if it moved the needle.
- Full-stack ownership: architecture, frontend (Vue, microfrontends), and backend, plus mentoring the engineers around me.

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

Product Strategy AI Readiness Mentoring Rapid Iteration Startups

- Advised 20+ startups on turning ambiguous problems into shipped products and pragmatic AI adoption.
- Coached founding teams on product-engineering tradeoffs and moving quickly on evidence.

Dronistics · Founding Engineer

08/2018 - 03/2020

0-to-1 Full-Stack Vue AWS APIs Founder Speed

- Built and shipped a full-stack product from 0 to 1 (Vue, Java, PostgreSQL, AWS), with real users in the field. 500+ deliveries, 99.5% safety, zero incidents.
- Moved at founder speed: every flight a live test, iterating on real-world feedback toward partnerships with Unilever and a CES showcase.

EPFL, Laboratory of Intelligent Systems (Robogen) · Research Engineer

08/2016 - 07/2018

Machine Learning AWS Python Open Source Teaching

- Built Robogen, an open-source AI platform adopted by researchers and students, scaled on AWS. Secured AWS Cloud Credits for Research; featured on the AWS Public Sector Blog.
- Taught 20+ master's students hands-on, an early habit of turning complex ideas into usable tools.

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>

05/2025 - Present

Founder & Builder

Real-time market intelligence built solo end to end (agent runtime, data integrations, web frontend). A multi-agent system that generates signals with the evidence chain that justifies them; explainability and evaluation built in, so if the model can't explain it, it doesn't ship. Live retail users.

Proplab - AI for Real Estate · <https://proplab.io>

09/2025 - Present

Founder & Builder

AI product built end-to-end on Replit: a vision pipeline turns inspection photos into structured records, then agents turn them into multilingual, marketing-ready listings.

- One workflow from photo capture to published listing, shipped solo to live users with zero copy-paste.

SwissNRI - Cross-border Fintech Platform · <https://www.swissnri.com>

01/2024 - Present

Co-Founder & Technical Lead

AI-native cross-border tax and compliance platform. RAG-grounded assistant answers regulatory questions with citations to source. Zero-to-MVP in 3 months, 40% uplift in satisfaction from feedback-driven iteration.
