Forward deployed engineer who owns AI delivery end to end: I embed with a customer's team, translate business outcomes into a technical plan, and drive 0-to-1 prototypes through MVP to production. Through my practice, Anand Creations, delivery is the job: map the workflow, sequence the work, ship on time, then codify reusable patterns and evals so the next deployment is faster. I run to the metric, not the milestone: at LumApps my agent deployments 2x conversions and forecast \$1M in quarterly revenue against baselines and KPIs, reported to C-level; at Beekeeper an LLM pipeline cut \$337K in cost. MBA-trained translator between engineers and executives, with sector depth in financial services and comfort embedding onsite with customers.

WORK EXPERIENCE

LumApps · Senior AI Engineer

03/2026 - Present

Forward Deployed Engineering AI/LLM Delivery ROI & KPIs Evals Multi-Agent Systems MCP LangGraph RAG GCP Adoption Python

- Owned delivery end to end, from discovery to production: translated business goals into a roadmap with milestones and acceptance criteria, and reported ROI to C-level (2x conversions, forecast \$1M in quarterly revenue) against baselines and KPIs.
- Drove 0-to-1 agent prototypes through MVP to production (Python, LangGraph, MCP), codifying reusable solution patterns and eval pipelines and feeding field insights back into product strategy.
- Built AI Brain, a knowledge-graph retrieval layer integrating 5+ systems, and led adoption so the agents became part of the daily workflow.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

Technical Delivery ROI & KPIs Reusable Patterns AWS Kubernetes Java Python LangChain OpenAI Stakeholder Management GitHub Actions

- Delivered an in-house LLM pipeline in 6 weeks with evaluation gates, eliminating \$337K in annual vendor cost. Value case, baseline, and measured outcome, not just a ship.
- Turned deployments into operating leverage: a distributed templating engine and reusable module framework now power 15% of all assets created on the platform (10M+ users).
- Co-owned GTM launches with Product and Sales, each instrumented with baselines and KPIs so we knew within a week if it moved the metric. Employee Referral became the top revenue channel (\$1.5M+, \$500K ARR).
- Hired and mentored the AI engineering cohort and held delivery reliability high (99.99% SLA designs, milestones hit).

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

Executive Advisory Technical Discovery Pattern Recognition Financial Services AI Strategy

- Advised executives and investors: ran technical discovery across 20+ companies, pattern-matching architecture and AI readiness into go/no-go investment decisions.
- Mentored Opt Alpha on scaling high-frequency algorithmic trading systems; advised portfolio companies on AI strategy in financial services.

Dronistics · Founding Engineer

08/2018 - 03/2020

0-to-1 Delivery APIs AWS Python Java Real-time Systems Reliability

- 0-to-1 delivery: shipped the platform, real-time APIs, and cloud stack from scratch. 500+ deliveries, 40% faster, 99.5% safety record, zero incidents.
- Delivered enterprise-grade reliability that landed partnerships with Unilever and a showcase at CES Las Vegas.

Machine Learning

AWS

Python

C++

Open Source

- Built Robogen, an open-source ML platform, and migrated the pipeline to AWS for large-scale parallel runs. Secured AWS Cloud Credits for Research; featured on the AWS Public Sector Blog.
- Taught 20+ master's students hands-on: translating a complex system into something others could build with.

ENTREPRENEURIAL PROJECTS

Anand Creations - Forward Deployed Engineering Practice · <https://anand-creations.com>

06/2024 - Present

Founder & Principal Forward Deployed Engineer

Independent practice: I embed with a customer's team, run technical discovery, and take AI from prototype to production, then distill repeatable patterns, evals, and reference architectures so each deployment is faster than the last.

- Flagship engagement, the GTM AI Brain: a knowledge-graph memory (Graphiti on Neo4j) unifying 5+ systems into one time-aware layer every agent reads and writes, with event-driven ingest over Pub/Sub and a per-agent query and write-back contract.

SwissNRI - Cross-border Fintech Platform · <https://www.swissnri.com>

01/2024 - Present

Co-Founder & Technical Lead

AI-native cross-border tax and compliance platform (financial services). RAG-grounded assistant answers DTAA, FEMA and Swiss tax questions with citations back to the regulation; compliance-first design with guardrails built before features. Zero-to-MVP in 3 months.

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>

05/2025 - Present

Founder & Builder

Real-time market intelligence (financial services) built solo, from agent runtime and market integrations to the web frontend. A multi-agent system that generates trading signals with the evidence chain that justifies them; if the model can't explain a signal, it doesn't ship. Live retail users.
