\$337K

Costs Eliminated

10M+

Users Served

3

Companies Founded

AI engineer who ships agents that act, not just dashboards that report. Built AI Brain at LumApps, a knowledge-graph context layer (Neo4j, Graphiti, Zep) that grounds production agents with business intelligence to drive company's strategy. 12+ years turning messy data into product capability: outbound agents that 2x sales conversions, LLM pipelines that eliminated \$337K in cost, search platforms serving 10M+ users. Founder mindset for open problems, Zurich-based.

WORK EXPERIENCE

LumApps · Senior AI Engineer

03/2026 - Present

[Python](#) [LangChain](#) [FastAPI](#) [Neo4j](#) [Graphiti](#) [Zep](#) [Knowledge Graphs](#) [AI Agents](#) [OpenAI](#) [RAG](#) [Langfuse](#) [GCP](#)

- Built AI Brain, a knowledge-graph context layer (Neo4j, Graphiti, Zep) that unifies conversation data, usage analytics, and notes into structured, queryable intelligence. Grounds production AI agents and surfaces business patterns that drive company strategy across product, sales, and CS.
- Built and deployed production AI agents for outbound sales. 2x open rates, 2x approved opportunities, 2 to 3 hours saved per rep per day. Forecast to generate \$4M in approved opportunities per quarter; that is \$1M in quarterly revenue.
- Designed agentic workflows end-to-end: tool design, reasoning loops, grounding, context windows. Owned architecture (Python, LangChain, FastAPI, GCP), telemetry (Langfuse), and rollout.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

[Python](#) [Java](#) [OpenAI](#) [Claude](#) [LangChain](#) [CrewAI](#) [Strands Agents](#) [Langfuse](#) [PostgreSQL](#) [Elastic Search](#) [ClickHouse](#)
[Kafka](#) [Kubernetes](#) [AWS](#) [Embeddings](#) [Semantic Search](#)

- Replaced \$337K in annual translation costs with an LLM pipeline built in 6 weeks. 12K+ assets translated; product team now iterates without external gatekeepers. Classic case of building the data infrastructure that turns information into capability.
- Led Search Platform revamp across 3 teams. Redesigned indexing, ranking, and retrieval to surface what users mean to find, not just what they typed. Measurable lift in engagement; foundation for downstream embeddings and semantic search work.
- Built GenAI demo system for sales. Auto-generates personalized content from structured Salesforce data so every pitch feels custom-built. Improved demo speed and close rates.
- Built AI Onboarding Specialist giving every new signup personalized, high-touch guidance at scale. 100% of customers guided through setup, time-to-first-value reduced without adding headcount.

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

[AI Strategy](#) [Agentic Workflows](#) [Data Architecture](#) [Startup Evaluation](#) [Technical Mentoring](#)

- Evaluated 20+ startups on AI readiness, data architecture, and scalability to inform seed-to-VC investment decisions.
- Advised portfolio companies on AI agent design, data strategy, and turning signals into shippable product intelligence.

Dronistics · Founding Engineer

08/2018 - 03/2020

[Vue](#) [Java](#) [PostgreSQL](#) [AWS](#) [Real-time Systems](#) [Logistics Optimization](#) [Autonomous Systems](#)

- Shipped end-to-end autonomous delivery platform (Vue, Java, PostgreSQL). 500+ successful deliveries; every flight a live test for autonomous decision systems in the real world.
- Engineered real-time flight control APIs and logistics optimization algorithms. 40% faster deliveries, 99.5% safety record, zero incidents. Partnerships with Unilever and a CES showcase.

EPFL, Laboratory of Intelligent Systems (Robogen) · Research Engineer

08/2016 - 07/2018

[C++](#) [Python](#) [AWS](#) [Genetic Algorithms](#) [Neural Networks](#) [Evolutionary AI](#) [Robotics](#) [Webots](#)

- Engineered Robogen, an open-source platform for co-evolution of robot bodies and brains via genetic algorithms. Rare research direction where morphology and neural control evolve together through artificial selection.
- Migrated the simulation pipeline to AWS for large-scale parallel evolution runs impractical on local hardware. Secured AWS Cloud Credits for Research; work featured on the AWS Public Sector Blog.
- Foundational AI experience (optimization, search, fitness landscapes, learning from environment) that informs how I approach modern agentic systems today.

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>

05/2025 - Present

Founder & Builder

Built for my own trading portfolio first: a platform where AI agents generate AND justify trading signals using technical and news-based data. Retail traders deserve the same explainable analysis institutions pay for.

- Real-time market analysis via AI agents that generate signals AND explain them. Core principle: if the model can't justify the signal, it doesn't ship.
- Opened to retail traders after self-validating. Live users, real money, real feedback loops on agent quality.

Proplab - AI Real Estate Tools · <https://proplab.io>

09/2025 - Present

Founder & Builder

Property inspections still run on paper, clipboards, and WhatsApp photos. Built an MVP that turns the entire workflow into structured, image-backed, timestamped data that AI can actually reason over.

- Shipped MVP replacing paper-based workflows with structured, queryable inspection records. Data atoms designed for downstream AI use.
- Building AI marketing assistant that auto-generates listings from inspection data. Structured input, agentic output, zero copy-paste.

SwissNRI - Cross-border Fintech Platform · <https://www.swissnri.com>

01/2024 - Present

Co-Founder & Technical Lead

Swiss-Indian families navigating FEMA, DTAA, and Swiss regulations had zero digital help. Just spreadsheets and expensive advisors. Built the first platform addressing this.

- Zero-to-MVP in 3 months. Early users acquired through Swiss-Indian community partnerships.
- Compliance-first design: regulatory guardrails built before features. 40% uplift in customer satisfaction from feedback-driven iteration.
