AI transformation lead who owns the whole arc: set the thesis, structure ambiguous problems from first principles, then drive enterprise adoption until it sticks, not just the pilots. I also run my own forward deployed practice, Anand Creations, embedding with teams to take GenAI from idea to adopted, repeatable operating processes, and I codify each win into reusable blueprints and reference architectures. AI-native and hands-on: I build daily with Claude and agentic tooling, configure and prototype agents myself, and hold my own with a client's engineers. Business oriented and metric-led, and comfortable carrying the room with C-suite.

WORK EXPERIENCE

LumApps · Lead AI Engineer

03/2026 - Present

AI Transformation · Enterprise Adoption · GenAI Strategy · Agentic Tooling · Claude · Reference Architectures · Stakeholder Management · ROI · Python

- Own AI transformation from thesis and architecture through rollout and adoption, reporting to C-level. 2x conversions and a forecast \$1M in quarterly revenue.
- Translated abstract GenAI into repeatable operating processes and a reusable context layer (AI Brain) that teams run day-to-day, not a one-off pilot.
- Act as voice of the field: feed customer and field insights back into product strategy and roadmap.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

Enterprise Adoption · Change Management · Repeatable Playbooks · GenAI Content · Cross-functional Delivery · OpenAI · Claude · Java · Python · Solution Engineering

- Drove enterprise AI adoption: an AI Onboarding Specialist guided 100% of new customers from first login into daily, integrated use.
- Codified repeatable playbooks: a distributed templating engine now powering 15% of all assets created on the platform (10M+ users).
- Built a GenAI system that generates customer-tailored content from CRM data, accelerating sales cycles and improving close rates.
- Co-owned cross-functional GTM launches with Product and Sales, each instrumented for time-to-value, and mentored the AI engineering cohort.

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

Consulting · First-Principles Problem Solving · AI Strategy · Executive Advisory · Change Management

- Structured ambiguous problems from first principles across 20+ companies: hypotheses, workstreams, and clear recommendations for founders and investors.
- Advised executives on AI strategy and change, giving direct feedback and defending reasoning under scrutiny.

Dronistics · Founding Engineer

08/2018 - 03/2020

Complex Delivery · Ambiguity · Enterprise Partnerships · AWS · APIs · Founding Engineer

- Delivered a complex, cross-functional platform from zero to production on time. 500+ deliveries, 99.5% safety record, zero incidents.
- Carried enterprise relationships directly: partnerships with Unilever and a showcase at CES Las Vegas.

EPFL, Laboratory of Intelligent Systems (Robogen) · Research Engineer

08/2016 - 07/2018

Machine Learning · Quantitative · AWS · Python · Teaching

- Built Robogen, an open-source AI platform, and scaled it on AWS. A rigorous, quantitative foundation for breaking hard problems apart.
- Taught 20+ master's students hands-on: translating complex concepts into something people could act on.

ENTREPRENEURIAL PROJECTS

Founder & Principal

Independent practice: I embed with a customer's team, set the transformation thesis, and take GenAI from idea to adopted, then codify each engagement into reusable blueprints, operating processes, and reference architectures so the next rollout is faster than the last.

- Turn one-off wins into repeatable blueprints and playbooks, the exact leave-behind this role rewards. Flagship: the GTM AI Brain shared across every agent.

Founder & Builder

AI product built end-to-end on Replit that turns raw inputs into multilingual, marketing-ready content: a vision pipeline structures the data, then agents generate publish-ready listings. AI at the center of content creation, one workflow with zero copy-paste.

- Built the full agent workflow solo, from data capture to published marketing content, keeping the human in control of the creative.

Founder & Builder

Real-time market intelligence where a multi-agent system generates signals with the evidence chain that justifies them. Explainability and evaluation built in: if the model can't explain its output, it doesn't ship. Live retail users.
