Companies Founded

Solution architect who designs and ships AI, data, and platform systems end-to-end. Owns the AI architecture at LumApps (multi-agent platform with knowledge-graph context, Langfuse evals; reports to C-level on business outcomes). Six years technical lead at Beekeeper architecting distributed systems for 10M+ users: shipped \$1.5M+ in new revenue, eliminated \$337K in vendor cost through an LLM platform built in 6 weeks. Three companies founded on the side, plus startup architecture advisory at Tenity. MBA, EPFL research background.

WORK EXPERIENCE

LumApps · Senior AI Engineer

03/2026 - Present

AI Architecture Data Platform Solution Design Cloud-Native Distributed Systems Python LangChain Neo4j GCP APIs Knowledge Graphs

- Owns the AI and data architecture across the company. Translates business transformation goals into scalable technical solutions, shapes the AI roadmap, and aligns engineering, product, and revenue teams around it.
- Designed AI Brain, a knowledge-graph context layer (Neo4j, Graphiti, Zep) that unifies 8+ data silos into a structured, queryable intelligence platform. The data architecture that grounds production AI agents.
- Shipped production agentic systems for outbound sales: 2x open rates, 2x approved opportunities. Forecast \$4M in approved opportunities per quarter. AI architecture translated directly into measurable business value.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

Distributed Systems Microfrontends APIs Data Architecture Java Python Vue Kafka PostgreSQL Elastic Search ClickHouse Kubernetes AWS OpenAI LangChain

- Architected Employee Referral System end-to-end as Tech Lead of the Incubation team. \$1.5M+ revenue, \$500K ARR, 99.99% SLA. Distributed system spanning microfrontends, Java services, PostgreSQL, Elastic Search, and Kafka.
- Designed and shipped LLM translation platform in 6 weeks. Eliminated \$337K in annual vendor cost; 12K+ assets translated. AI use-case identified, scoped, architected, and delivered end-to-end.
- Architected distributed Templating Engine that cut customer setup time 90% and now powers 15% of all platform assets across 10M+ users. Cross-team architecture spanning Vue microfrontends, Java backend, Kafka events.
- Led Search Platform revamp across 3 teams. Redesigned indexing, ranking, and retrieval (the data and integration architecture the platform reasons over). Hired and mentored the AI engineering cohort.

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

Architecture Review Stakeholder Advisory Scalability AI Readiness Distributed Systems

- Evaluated 20+ startups on architecture, scalability, and AI readiness. Findings inform seed-to-VC investment decisions; direct exposure to architecting under ambiguity.
- Mentored Opt Alpha on scaling high-frequency algorithmic trading. Architecture for high-availability, low-latency environments where correctness is regulated.

Obermatt · Technical Product Manager (concurrent side role)

07/2018 - 01/2021

Solution Architecture Stakeholder Management Roadmap Ownership Docker CI/CD Agile

- Built strategic technology roadmaps that improved customer satisfaction and retention. Translated business priorities into scalable engineering execution across a matrix of stakeholders.
- Drove architectural change: agile rollout (productivity up 20%) and Docker-based CI/CD (deployment times down 30%). Hands-on platform improvement.

Cloud Architecture

AWS

APIs

Distributed Systems

CI/CD

Real-time Systems

- Architected end-to-end cloud-native platform (Vue, Java, PostgreSQL, AWS). 500+ autonomous deliveries; enterprise partnerships with Unilever and a CES Las Vegas showcase.
- Built CI/CD pipeline and AWS infrastructure from scratch. Real-time APIs and integration architecture for flight control and logistics. 40% faster deliveries, 99.5% safety record.

EPFL Research

AI Foundations

AWS

Distributed Computing

C++

Python

- Engineered Robogen at one of Europe's leading AI labs. Open-source platform combining distributed simulation, ML, and cloud architecture.
- Migrated simulation pipeline to AWS for large-scale parallel runs. Secured AWS Cloud Credits for Research; work featured on the AWS Public Sector Blog.
- Teaching Assistant for Evolutionary Robotics. Supervised 20+ master's students; early reps at translating complex architectural concepts to stakeholder audiences.

ENTREPRENEURIAL PROJECTS

Co-founded an AI-native platform for Swiss-Indian families navigating FEMA, DTAA, and Swiss tax regulations. Distributed compliance platform in a regulated, high-stakes domain.

- Designed the platform architecture from blank page: RAG-grounded compliance assistant, AI agent layer, regulatory guardrails. Zero-to-MVP in 3 months in a compliance-heavy domain.

Founded a real-time multi-agent market intelligence platform. End-to-end architecture from data ingestion to explainable signals for live users.

- Architected a multi-agent system that generates AND justifies trading signals. Live users, real money, evaluation loop on every signal.

Founded an AI-native platform for small real estate teams. Vision models + LLM agent architecture from inspection to published listing.

- End-to-end architecture from photo capture to published listing: vision pipeline extracts structured signals, LLM agents generate multilingual listings, human approval gate before publish.

EDUCATION		CERTIFICATES	AWARDS
Quantic School of Business and Technology	2019 - 2020	Microsoft Certified Professional (MCPS)	Appreciation from John T. Chambers (ex-CEO, Cisco Systems)
MBA Business Administration		Microsoft	Cisco Systems
EIT Digital	2014 - 2016	Build LLM Apps with LangChain	Recognized for contributions to strategic projects within Cisco's ecosystem
Master (Programme) Innovation & Entrepreneurship		DeepLearning.AI	
Eindhoven University of Technology (TU/e)	2015 - 2016	Building Modern Java Applications	AWS Cloud Credits for Research
MSc (Netherlands) Embedded Networking		AWS	Amazon Web Services (2020)
KTH Royal Institute of Technology	2014 - 2015	MongoDB for Java Developers	TI India Analog Design Contest Winner
MSc (Sweden) Embedded Systems		MongoDB University	Texas Instruments
Amrita Vishwa Vidyapeetham	2010 - 2014		KTH Opportunities Fund
Bachelor of Engineering Electronics and Communication			KTH Royal Institute of Technology
