Companies Founded

Forward deployed engineer who turns messy, real-world requirements into production AI. Through my practice, Anand Creations, I embed with teams, run discovery, and ship agentic workflows, integrations, and automations that connect a platform to customers' live systems (Salesforce, HubSpot, event streams, APIs). I build for production, not demos: eval harnesses, guardrails, granular tracing, and cost-per-request telemetry, with reusable modules distilled from each engagement. 13+ years shipping software to 10M+ users on multi-tenant SaaS; at LumApps my agent deployments 2x conversions and forecast \$1M in quarterly revenue; at Beekeeper I replaced \$337K in cost with an LLM pipeline gated by evals.

WORK EXPERIENCE

LumApps · Senior AI Engineer

03/2026 - Present

- Forward Deployed Engineering · Agentic Workflows · Integrations · MCP · RAG · Retrieval · Evals · Observability · Pub/Sub · APIs
- Python · GCP
- Shipped production agentic workflows (Python, LangGraph, MCP) that integrate with Salesforce and internal systems and perform real end-to-end tasks. 2x conversions, forecast \$1M in quarterly revenue.
 - Built AI Brain: event-driven ingest over Pub/Sub from 5+ systems (Salesforce, HubSpot, product usage) into a knowledge-graph and RAG retrieval layer. Data pipelines plus retrieval, done right.
 - Owned reliability in production: eval harnesses, guardrails, granular tracing, and cost-per-request telemetry, from discovery through rollout.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

- Python · Java · Kafka · Event-Driven · PostgreSQL · Kubernetes · AWS · Multi-tenant SaaS · Integrations · OpenAI · Claude
- GitHub Actions
- Replaced \$337K in annual vendor cost with an in-house LLM pipeline gated by evaluation frameworks that measured quality before anything shipped.
 - Built a GenAI system that integrates Salesforce and live customer data into automated workflows: tool integration and automation end to end.
 - Owned architecture, reliability, and instrumentation for products used by 10M+ users on a multi-tenant SaaS (Kafka event streams, PostgreSQL, Kubernetes, AWS).
 - Turned solutions into reusable capability (a distributed templating engine now powering 15% of platform assets) and mentored the engineers who extended them.

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

- Technical Discovery · Ambiguity to Shipped · AI Strategy · Architecture Review · Mentoring
- Ran structured technical discovery across 20+ startups: constraints, success criteria, and architecture, translating ambiguity into clear plans.
 - Advised on AI strategy and reliability, and mentored teams to ship.

Dronistics · Founding Engineer

08/2018 - 03/2020

- APIs · Integrations · AWS · CI/CD · Observability · Real-time Systems · Python
- Built real-time APIs and integrations and owned them in production (debugging, instrumentation, on-call). 500+ deliveries, 99.5% safety record, zero incidents.
 - Built the cloud infrastructure and CI/CD from scratch; reliability that enabled partnerships with Unilever and a CES showcase.

Machine LearningAWSPythonC++Evaluation

- Built Robogen, an open-source ML platform, and scaled it on AWS. Secured AWS Cloud Credits for Research; featured on the AWS Public Sector Blog.
- Foundational AI experience (optimization, search, evaluation) that informs how I reason about agent behavior and its failure modes today.

ENTREPRENEURIAL PROJECTS

Anand Creations - Forward Deployed Engineering Practice · https://anand-creations.com06/2024 - Present

Founder & Principal Forward Deployed Engineer

Independent FDE practice: I embed with a customer's team, run discovery, and ship production AI (agentic workflows, integrations, automations) inside their environment, then turn each engagement into reusable modules, reference architectures, and playbooks. Flagship: the GTM AI Brain, a knowledge-graph retrieval layer every agent shares.

- Operate as a one-person FDE org: messy problem to shipped, integrated, observable system, then distilled into reusable capability, the exact motion this role runs.

SwissNRI - Cross-border Fintech Platform · https://www.swissnri.com01/2024 - Present

Co-Founder & Technical Lead

AI-native cross-border tax and compliance platform in a regulated, privacy-sensitive domain. RAG-grounded assistant answers regulatory questions with citations back to source; guardrails and data-privacy-by-design built before features. Zero-to-MVP in 3 months.

PulseView - AI Market Intelligence · https://pulse-view.anand-creations.com05/2025 - Present

Founder & Builder

Real-time market intelligence built solo, from data-pipeline integrations to the web frontend. A multi-agent system with explainability and evaluation built in: if the model can't explain a signal, it doesn't ship. Live retail users.

EDUCATION	CERTIFICATES	AWARDS
Quantic School of Business and Technology2019 - 2020 MBA Business Administration	Build LLM Apps with LangChainDeepLearning.AI	Appreciation from John T. Chambers (ex-CEO, Cisco Systems) Cisco Systems Recognized for contributions to strategic projects within Cisco's ecosystem
EIT Digital2014 - 2016 Master (Programme) Innovation & Entrepreneurship	Building Modern Java ApplicationsAWS	AWS Cloud Credits for Research Amazon Web Services (2020)
Eindhoven University of Technology (TU/e)2015 - 2016 MSc (Netherlands) Embedded Networking	MongoDB for Java DevelopersMongoDB University	TI India Analog Design Contest Winner Texas Instruments
KTH Royal Institute of Technology2014 - 2015 MSc (Sweden) Embedded Systems	Microsoft Certified Professional (MCPS)Microsoft	KTH Opportunities Fund KTH Royal Institute of Technology
Amrita Vishwa Vidyapeetham2010 - 2014 Bachelor of Engineering Electronics and Communication
