Companies Founded

Forward deployed engineer and technical leader who builds the team and the systems. I run Anand Creations, an FDE practice: I embed with customers, ship production AI inside their environment, and turn what works into reusable capabilities. 13+ years building and leading: I hired and mentored the AI engineering cohort at Beekeeper (deputy tech lead), led 3 teams through a platform revamp, and founded three companies. I use AI agents and modern tooling aggressively to move fast, and I set a high bar: speed, ownership, pragmatism, customer impact.

WORK EXPERIENCE

LumApps · Senior AI Engineer

03/2026 - Present

- Forward Deployed Engineering
- AI-Native Development
- Multi-Agent Systems
- MCP
- LangGraph
- Reusable Capabilities
- Production Systems
- Python
- GCP

- Own AI delivery end to end for the business: discovery to production, using AI agents and modern tooling aggressively to move at high velocity. 2x conversions, forecast \$1M in quarterly revenue.
- Build production agents (LangGraph, MCP) and codify reference architectures other teams reuse, turning one-off deployments into platform capability.
- Report outcomes to C-level and feed field insights back into product direction.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

- Technical Leadership
- Hiring & Mentoring
- Team Building
- Production Systems
- Developer Tooling
- AWS
- Kubernetes
- Java
- Python
- LangChain
- OpenAI

- Hired and mentored the AI engineering cohort (deputy tech lead of FUEL): set the hiring bar and grew engineers who now lead features independently.
- Led 3 teams through a search platform revamp and shipped a distributed templating engine now powering 15% of all platform assets: reusable capability at scale.
- Replaced \$337K in annual cost with an in-house LLM pipeline in 6 weeks and shipped AI products used by 10M+ users.
- Co-owned GTM launches with Product and Sales, each instrumented so we could prove customer impact within a week.

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

- Technical Judgment
- Talent Evaluation
- AI Strategy
- Mentoring
- Architecture Review

- Applied a high technical bar evaluating 20+ companies for investors: talent, architecture, and AI readiness judgment.
- Mentored founding teams and advised on AI strategy and engineering culture that ships.

Dronistics · Founding Engineer

08/2018 - 03/2020

- 0-to-1
- Founding Engineer
- AWS
- APIs
- Production Systems
- Real-time Systems

- 0-to-1 build in a fast-moving, ambiguous environment: shipped the platform, real-time APIs, and cloud stack from scratch. 500+ deliveries, 99.5% safety record, zero incidents.
- Landed enterprise partnerships (Unilever) and a showcase at CES Las Vegas on reliability built in from day one.

EPFL, Laboratory of Intelligent Systems (Robogen) · Research Engineer

08/2016 - 07/2018

- Machine Learning
- AWS
- Python
- C++
- Teaching

- Built Robogen, an open-source ML platform, and scaled it on AWS. Secured AWS Cloud Credits for Research; featured on the AWS Public Sector Blog.
- Led and taught 20+ master's students hands-on: early practice at raising the technical bar in others.

ENTREPRENEURIAL PROJECTS

Founder & Principal Forward Deployed Engineer

Independent FDE practice: I embed with a customer's team, run discovery, and ship production AI inside their environment, then turn repeatable patterns into reusable modules and reference architectures. Flagship: the GTM AI Brain, a knowledge-graph layer every agent shares.

- Operate as a one-person FDE org: discovery to production to reusable capability, using AI agents and automation aggressively to increase leverage, the exact motion this role scales into a team.

Founder & Builder

Real-time market intelligence built solo with AI-native workflows, from agent runtime and market integrations to the web frontend. A multi-agent system that generates signals with the evidence chain that justifies them; if the model can't explain a signal, it doesn't ship. Live retail users.

Co-Founder & Technical Lead

AI-native cross-border tax and compliance platform. RAG-grounded assistant answers regulatory questions with citations back to the source; compliance-first design with guardrails built before features. Zero-to-MVP in 3 months.
