

\$1.5M+	\$337K	10M+	3
Revenue Shipped	Costs Eliminated	Users Served	Companies Founded

Product-minded AI engineer who ships agentic systems customers rely on for critical decisions. Currently at LumApps, building production multi-agent workflows on GCP that forecast \$1M in quarterly revenue. My work centers on the guarantees production AI demands: retrieval with provenance and freshness, eval pipelines with gold sets and experiments, tracing and cost-latency instrumentation, and human-in-the-loop checkpoints so an agent never ships a wrong action. 13+ years owning systems end-to-end, from an LLM pipeline that eliminated \$337K in vendor cost to three companies founded 0 to 1. Based in Zurich; every system I build has a metric attached and a customer on the other side.

WORK EXPERIENCE

LumApps · Lead Software Engineer03/2026 - Present

PythonTypeScriptLangGraphGoogle ADKMCPGCPVertex AIMulti-Agent SystemsReActStructured OutputsRAGEvaluation PipelinesLangSmithLLMOpsObservabilityOn-CallNeo4jGraphitiAG-UI

- Architected and shipped production-grade agentic workflows on Python, LangGraph and Google ADK over GCP Vertex AI: tool use over MCP servers, planning, memory, and structured outputs, using ReAct, self-reflection and hierarchical delegation, with agent state streamed to the UI over AG-UI. 2x open rates, 2x approved opportunities; forecast \$1M in quarterly revenue.
- Designed AI Brain, a temporal knowledge graph on Graphiti and Neo4j that unifies 5+ silos into one time-aware memory every agent reads and writes. A freshness layer flags stale facts and grounds RAG retrieval with provenance, the correctness and auditability guarantee a high-stakes domain needs to trust an AI answer.
- Own LLMOps end-to-end: eval pipelines with gold sets and metrics, agent tracing (LangSmith), tool-selection tuning, cost-per-request and latency instrumentation, safe deployment, and on-call for global production systems.

Beekeeper AG · Senior Software Engineer (Technical Lead)03/2020 - 02/2026

PythonJavaTypeScriptOpenAIClaudeLangChainLangfuseCrewAIAWSKubernetesPostgreSQLElastic SearchObservabilityGrafanaDatadog

- Replaced \$337K in annual vendor translation costs with an LLM pipeline built in 6 weeks. 12K+ assets translated, product team now iterates without external gatekeepers.
- Built AI Onboarding Specialist giving every new signup personalized, high-touch guidance at scale. 100% of customers guided through setup, time-to-first-value reduced without adding headcount.
- Ran observability and on-call for global production systems (Grafana, Datadog, Logz.io): logs, metrics, dashboards, and alerting to keep customer-facing systems reliable.
- Architected Employee Referral System end-to-end. Became the platform's top revenue channel (\$1.5M+ generated, \$500K ARR). Designed for 99.99% SLA because customer trust is measured in uptime.

Tenity · Startup Mentor & Technology Evaluation Panelist06/2024 - Present

AI StrategyStartup EvaluationTechnical MentoringScalability

- Evaluated 20+ startups on technical architecture, scalability, and AI readiness to inform seed-to-VC investment decisions.
- Advised portfolio companies on AI strategy and building engineering cultures that ship fast in fast-paced, VC-backed environments.

Dronistics · Founding Engineer08/2018 - 03/2020

VueJavaPostgreSQLAWSDockerReal-time SystemsSafety-Critical SystemsLogistics Optimization

- Shipped end-to-end autonomous drone delivery platform 0 to 1 (Vue/Java/PostgreSQL). 500+ successful deliveries, every flight a live test of an autonomous system in the real world.
- Engineered real-time flight control APIs and logistics optimization algorithms for a safety-critical system. 40% faster deliveries, 99.5% safety record, zero incidents.

Anand Creations - Forward Deployed Engineering Practice

<https://anand-creations.com>

06/2024 - Present

Founder & Principal Forward Deployed Engineer

Independent forward deployed practice: I embed with a customer's team, run technical discovery, and ship production agentic AI inside their environment, from a one-week AI Opportunity Assessment through evals, tracing, and rollout. Also the home for the AI products I build and run.

- Flagship engagement, the GTM AI Brain: a temporal knowledge graph (Graphiti on Neo4j) unifying 5+ silos into one time-aware memory every agent reads and writes, with event-driven ingest over Pub/Sub and a per-agent query and write-back contract grounded for correctness and provenance.

SwissNRI - AI Cross-border Fintech

<https://www.swissnri.com>

01/2024 - Present

Co-Founder & Technical Lead

AI-native cross-border tax and compliance platform for Swiss-Indian families, a regulated domain where wrong answers carry real cost. RAG-grounded assistant answers DTAA, FEMA and Swiss tax questions in plain language with citations back to the regulation; compliance-first agentic design flags risk before users file, with regulatory guardrails built before features. Zero-to-MVP in 3 months, 40% uplift in satisfaction.

PulseView - AI Market Intelligence

<https://pulse-view.anand-creations.com>

05/2025 - Present

Founder & Builder

Real-time market intelligence for retail traders. AI agents generate AND justify trading signals from technical and news data, with explainability and evaluation built in: if the model can't explain the signal, it doesn't ship. Now serving live users on real-time feeds.
