Product owner who bridges business and engineering: as Technical Product Manager at Obermatt I owned product roadmaps end-to-end and introduced agile methodologies that lifted a remote engineering team's productivity 20%. At Beekeeper I was Product Owner for the Distributed Templating Engine, running technical investigations, vision-setting, and epic definition for a system that now powers 15% of all platform assets for 10M+ users. My AI depth is current: at LumApps I own an AI-ready data pipeline (AI Brain, a RAG-grounded knowledge layer unifying 5+ systems) that doubles outbound conversions, backed by certifications in RAG architectures and knowledge graphs. MBA-trained to build the business case, define the KPIs, and defend the ROI to executives.

WORK EXPERIENCE

LumApps · Lead Software Engineer

03/2026 - Present

RAG Vector Databases Prompt Engineering Data Governance Data Pipelines LangChain LangGraph Google ADK GCP Vertex AI MCP Multi-Agent Systems Evaluation Pipelines Python TypeScript Neo4j Graphiti Salesforce

- Shaped the information architecture for AI Brain, a RAG-grounded knowledge and data pipeline unifying 5+ systems (Salesforce, HubSpot, Pendo, conversation transcripts, product usage) into one time-aware layer every agent reads and writes. Event-driven ingest, a per-agent query and write-back contract, and a freshness layer for data quality, built for interoperability across systems.
- Built and deployed production multi-agent workflows for outbound sales on LangGraph and Google ADK over GCP Vertex AI, with prompt engineering and vector-grounded retrieval. 2x open rates, 2x approved opportunities. Forecast: \$4M in approved opportunities per quarter; at 25% conversion, \$1M in quarterly revenue.
- Owned the complete product lifecycle from concept to production: technical discovery, eval pipelines, tracing, tool-selection tuning, and cost-per-request instrumentation, reporting outcomes and ROI directly to C-level.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

Product Ownership Agile Roadmapping Stakeholder Management Java Python TypeScript Vue PostgreSQL Kubernetes AWS OpenAI LangChain Kafka Elastic Search Observability

- Product Owner for the Distributed Templating Engine: ran technical investigations, solutioning, vision-setting, and epic definition for a system that cut customer setup time 90% and now powers 15% of all assets on the platform (10M+ users).
- Architected Employee Referral System end-to-end as Tech Lead reporting to CIO. Became the platform's top revenue channel (\$1.5M+ generated, \$500K ARR). Built the strategic roadmap and drove adoption.
- Acting hiring manager for AI roles: defined the bar, ran the process, closed candidates, and mentored the AI engineering cohort into engineers who now lead features independently.

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

AI Strategy Stakeholder Alignment Technical Evaluation Scalability

- Evaluated 20+ startups on technical architecture, scalability, and AI readiness to inform seed-to-VC investment decisions.
- Advised multiple portfolio companies on technical hiring, AI strategy, and building engineering cultures that actually ship.

Obermatt · Technical Product Manager

07/2018 - 01/2021

Product Ownership Roadmapping Agile Methodologies Team Leadership Stakeholder Management CI/CD Docker

- Bridged business and engineering to deliver scalable, reliable solutions. Built strategic roadmaps that improved customer satisfaction and retention.
- Directed a remote engineering team. Introduced agile methodologies; productivity up 20%.
- Improved CI/CD with Docker; deployment times down 30%.

Anand Creations - Forward Deployed Engineering Practice · <https://anand-creations.com>06/2024 - Present

Founder & Principal Forward Deployed Engineer

Independent forward deployed practice: I embed with a customer's team, run technical discovery, and ship production agentic AI inside their environment, from a one-week AI Opportunity Assessment through evals, tracing, and rollout. Also the home for the AI products I build and run.

- Flagship engagement, the GTM AI Brain: a temporal knowledge graph (Graphiti on Neo4j) unifying 5+ silos into one time-aware memory every agent reads and writes, with event-driven ingest and a per-agent query and write-back contract.

SwissNRI - AI Cross-border Fintech · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

AI-native cross-border tax and compliance platform for Swiss-Indian families. RAG-grounded assistant answers DTAA, FEMA and Swiss tax questions in plain language with citations back to the regulation; compliance-first agentic design flags risk before users file, with regulatory guardrails and data governance built before features. Zero-to-MVP in 3 months, 40% uplift in satisfaction.

EDUCATION

Quantic School of Business and Technology	2019 - 2020
<i>MBA Business Administration</i>	
EIT Digital	2014 - 2016
<i>Master (Programme) Innovation & Entrepreneurship</i>	
Eindhoven University of Technology (TU/e)	2015 - 2016
<i>MSc (Netherlands) Embedded Networking</i>	
KTH Royal Institute of Technology	2014 - 2015
<i>MSc (Sweden) Embedded Systems</i>	
Amrita Vishwa Vidyapeetham	2010 - 2014
<i>Bachelor of Engineering Electronics and Communication</i>	

CERTIFICATES

Build LLM Apps with LangChain
DeepLearning.AI
Knowledge Graphs for RAG
Neo4j
AI Agents in LangGraph
LangChain & Tavily
Building Modern Java Applications
AWS
Microsoft Certified Professional (MCPS)
Microsoft

AWARDS

Appreciation from John T. Chambers (ex-CEO, Cisco Systems)
Cisco Systems
Recognized for contributions to strategic projects within Cisco's ecosystem
AWS Cloud Credits for Research
Amazon Web Services (2020)
KTH Opportunities Fund
KTH Royal Institute of Technology
