Companies Founded

Founding-engineer profile built for an Incubation Accelerator: ships AI products from prototype to PMF, then scales them on enterprise infrastructure. At LumApps, owns production AI agents for outbound sales (\$4M/quarter approved pipeline forecast, 2x open rates). At Beekeeper, founded the Incubation squad behind Employee Referral (\$1.5M+ revenue, \$500K ARR) and a 6-week LLM pipeline that killed a \$337K vendor contract. Full-stack (Python, Node.js, Vue, React, Java), agentic architectures, cloud-native, three companies founded on the side.

WORK EXPERIENCE

LumApps · Senior AI Engineer

03/2026 - Present

Python Node.js LangChain FastAPI GCP AI Agents Multi-Agent OpenAI RAG Neo4j Graphiti Zep CI/CD

- Designed, built, and deployed production AI agents for outbound sales. 2x open rates, 2x approved opportunities, 2 to 3 hours saved per rep per day across SDR and AE teams. Forecast to generate \$4M in approved opportunities per quarter; at 25% conversion that is \$1M in quarterly revenue.
- Owned end-to-end product lifecycle: rapid prototype, architecture (LangChain, FastAPI, GCP), agent runtime, eval harness, production rollout. Cloud-native from day one.
- Built AI Brain, an intelligent context layer that unifies conversation data, usage analytics, and notes. Multi-agent system surfacing patterns that drive strategy across product, sales, and CS.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

Java Python TypeScript Node.js Vue React Microservices Kubernetes AWS OpenAI Claude LangChain CrewAI Strands Agents Langfuse Kafka PostgreSQL Elastic Search ClickHouse Jenkins GitHub Actions

- Founded and led Beekeeper's Incubation team (reporting to CIO). Architected Employee Referral System end-to-end, designed for 99.99% SLA. Became the platform's top revenue channel (\$1.5M+ generated, \$500K ARR).
- Replaced \$337K in annual vendor translation costs with an LLM pipeline shipped in 6 weeks. 12K+ assets translated; product team now iterates without external gatekeepers.
- Built AI Onboarding Specialist, an intelligent agent guiding 100% of new signups through personalized, high-touch setup at scale. Time-to-first-value reduced without adding headcount.
- Designed distributed templating engine that cut customer setup time 90%. Powers 15% of all platform assets for 10M+ users. Microservices architecture, Kafka-backed, cloud-native.

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

AI Strategy Startup Evaluation Technical Mentoring Scalability

- Evaluated 20+ startups on technical architecture, scalability, and AI readiness to inform seed-to-VC investment decisions.
- Mentored Opt Alpha on scaling high-frequency algorithmic trading systems in production.

Dronistics · Founding Engineer

08/2018 - 03/2020

Vue Java PostgreSQL AWS Docker CI/CD Real-time Systems Cloud-Native

- Shipped end-to-end autonomous drone delivery platform (Vue, Java, PostgreSQL, AWS) from zero. 500+ successful deliveries, each one a live UX test for the system in production.
- Built cloud infrastructure and CI/CD pipeline from scratch. Enterprise-grade reliability that enabled Unilever partnership and CES Las Vegas showcase.

C++

Python

AWS

Genetic Algorithms

Neural Networks

Multi-Agent Systems

Webots

- Engineered Robogen, an open-source platform for co-evolution of robot bodies and brains via genetic algorithms. Multi-agent autonomous systems where morphology and neural control evolve together.
- Migrated simulation pipeline to AWS for large-scale parallel evolution runs. Secured AWS Cloud Credits for Research; work featured on the AWS Public Sector Blog.
- Foundational AI experience (optimization, search, fitness landscapes, learning from environment) that informs how I design modern LLM and agentic systems today.

ENTREPRENEURIAL PROJECTS

Founder & Builder

Built for my own trading portfolio first: a platform that explains its signals, not just shows them. Retail traders deserve the same explainable analysis that institutions pay for.

- Real-time market analysis via AI agents that generate and justify trading signals using technical and news-based data.
- Opened to retail traders after self-validating. Now serving live users with real-time market feeds.

Founder & Builder

Property inspections run on paper, clipboards, and WhatsApp photos. Built MVP for a fully digital, image-backed, timestamped inspection protocol that replaces the entire manual workflow.

- Shipped MVP replacing paper-based inspection workflows with structured, image-backed, timestamped records.
- Building AI marketing assistant that auto-generates property listings from inspection data. One workflow, zero copy-paste.

Co-Founder & Technical Lead

Swiss-Indian families navigating FEMA, DTAA, and Swiss regulations had zero digital help. Just spreadsheets and expensive advisors. Built the first platform addressing this.

- Zero-to-MVP in 3 months. Early users acquired through Swiss-Indian community partnerships.
- Customer feedback loops drove 40% uplift in satisfaction. Roadmap owned by what users actually asked for.
