3

Companies Founded

Tech Lead who builds the platforms that other engineers build on. 10+ years shipping production systems for 10M+ users, last 3 spent making LangChain, CrewAI, Strands Agents, and Langfuse work reliably in production. Defined the distributed templating framework now powering 15% of Beekeeper assets, replaced a \$337K vendor with an in-house LLM pipeline in 6 weeks, and grew the AI engineering cohort that now ships features independently. Hands-on with the agent stack end-to-end, from agent reasoning down to the individual tools and API calls, and equally comfortable influencing platform, product, and vendor teams without direct authority.

WORK EXPERIENCE

LumApps · Senior AI Engineer

03/2026 - Present

AI Agents LangChain Python FastAPI GCP OpenAI RAG Neo4j Graphiti Zep AI Governance Observability

- Built and shipped production AI agents (LangChain, FastAPI, GCP) for outbound sales. 2x open rates, 2x approved opportunities, 2 to 3 hours saved per rep per day. Forecast \$4M approved opportunities per quarter, \$1M quarterly revenue at 25% conversion.
- Built AI Brain, an intelligent context layer unifying conversation data, usage analytics, and notes via Neo4j, Graphiti, and Zep. Surfaces signals across product, sales, and CS.
- Expanded scope to own company-wide AI transformation: governance, access patterns, evaluation, and sales enablement across business units.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

AI Agents LangChain CrewAI Strands Agents Langfuse OpenAI Claude Java Python Microservices Kubernetes AWS Kafka PostgreSQL Elastic Search ClickHouse Jenkins GitHub Actions Module Federation

- Defined the Distributed Templating Engine, a reusable framework for asset creation that now powers 15% of all assets on the platform (10M+ users) and cut customer setup time 90%. Reference architecture other teams build on.
- Replaced a \$337K annual vendor contract with an in-house LLM pipeline (GitHub Actions plus OpenAI APIs) in 6 weeks. 12K+ assets translated, product team iterates without external gatekeepers.
- Built and mentored the AI engineering cohort: hands-on upskilling on LangChain, CrewAI, Strands Agents, and Langfuse. Hired for craft, grew engineers who now lead agentic features independently.
- Led the Search Platform revamp across 3 teams. Aligned platform, product, and vendor stakeholders without direct authority, redesigned indexing and ranking, shipped measurable engagement lift.

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

AI Strategy Platform Evaluation Agentic Systems Technical Mentoring Scalability

- Evaluated 20+ startups on architecture, scalability, and AI readiness to inform seed-to-VC investment decisions.
- Advised portfolio companies on AI strategy, agentic platforms, and engineering frameworks that scale.

Dronistics · Founding Engineer

08/2018 - 03/2020

Java Vue PostgreSQL AWS Docker CI/CD Real-time APIs Microservices Logistics Optimization

- Shipped end-to-end autonomous delivery platform (Vue, Java, PostgreSQL). 500+ successful deliveries, partnerships with Unilever, CES Las Vegas showcase.
- Engineered real-time flight control APIs and logistics optimization algorithms. 40% faster deliveries, 99.5% safety record, zero incidents.

C++PythonAWSGenetic AlgorithmsNeural NetworksEvolutionary AIRoboticsWebots

- Engineered Robogen, an open-source platform for co-evolving robot bodies and brains via genetic algorithms. Reference framework adopted by external researchers and students.
- Migrated the simulation pipeline to AWS for large-scale parallel evolution runs. Secured AWS Cloud Credits for Research; work featured on the AWS Public Sector Blog.
- Teaching Assistant for Evolutionary Robotics at EPFL. Supervised 20+ master's students through hands-on projects in genetic algorithms, neural controllers, and embodied AI.

ENTREPRENEURIAL PROJECTS

Founder & Builder

Real-time market intelligence platform powered by AI agents that generate and justify trading signals. Built for explainability: if the model can't explain the signal, it doesn't ship.

- Agentic architecture combining technical and news-based tools; every signal traced back to the inputs and reasoning that produced it.
- Serving live retail users with real-time market feeds after self-validating on personal portfolio.

Founder & Builder

MVP replacing paper-based property inspections with structured, image-backed, timestamped digital protocols.

- Shipped MVP replacing clipboards and WhatsApp photos with structured, timestamped records.
- Building AI marketing assistant that auto-generates property listings from inspection data.

Co-Founder & Technical Lead

Cross-border tax and compliance platform for Swiss-Indian families. The first digital answer to FEMA, DTAA, and Swiss regulations beyond spreadsheets and expensive advisors.

- Zero-to-MVP in 3 months; compliance-first design with regulatory guardrails built before features.
- Customer feedback loops drove 40% uplift in satisfaction.

EDUCATION

Quantic School of Business and Technology	2019 - 2020
MBA Business Administration	
EIT Digital	2014 - 2016
Master (Programme) Innovation & Entrepreneurship	
Eindhoven University of Technology (TU/e)	2015 - 2016
MSc (Netherlands) Embedded Networking	
KTH Royal Institute of Technology	2014 - 2015
MSc (Sweden) Embedded Systems	
Amrita Vishwa Vidyapeetham	2010 - 2014
Bachelor of Engineering Electronics and Communication	

CERTIFICATES

Build LLM Apps with LangChain
DeepLearning.AI
Building Modern Java Applications
AWS
Microsoft Certified Professional (MCPS)
Microsoft
MongoDB for Java Developers
MongoDB University

AWARDS

Appreciation from John T. Chambers (ex-CEO, Cisco Systems)
Cisco Systems
Recognized for contributions to strategic projects within Cisco's ecosystem
AWS Cloud Credits for Research
Amazon Web Services (2020)
TI India Analog Design Contest Winner
Texas Instruments
KTH Opportunities Fund
KTH Royal Institute of Technology
