10M+	500+	99.5%	3
Users Served	Robot Deliveries	Fleet Safety Record	Companies Founded

Infrastructure and platform engineer who has built cloud foundations and CI/CD from scratch at startup scale, and shipped code all the way to physical robots. At Dronistics I built the AWS cloud stack, real-time APIs, and deployment pipeline for an autonomous drone fleet: edge devices in the field with a 99.5% safety record and zero incidents. 13+ years across AWS and GCP, Kubernetes, Docker, Terraform, and GitHub Actions, with the instrumentation and developer tooling that make a team faster (a templating engine now powering 15% of a platform used by 10M+ users). I have founded three companies, so early-stage ownership and the simple-now, durable-where-it-counts trade-off are second nature.

WORK EXPERIENCE

LumApps · Senior AI Engineer

03/2026 - Present

GCP CI/CD Docker Observability LangSmith On-Call APIs Python Infrastructure-as-Code

- Built and shipped production services on GCP with automated CI/CD and containerized deploys.
- Instrumented agents with LangSmith tracing and cost-per-request telemetry, plus dashboards and alerting, and carried on-call for global production systems.
- Owned reliability from discovery through rollout, making trade-offs to protect the critical path.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

Kubernetes AWS Docker CI/CD GitHub Actions Jenkins Observability Grafana Datadog On-Call Secrets Management Developer Tooling Kafka PostgreSQL Java

- Ran production services for 10M+ users on Kubernetes and AWS: containers, secrets, and reliability at scale.
- Built CI/CD pipelines (GitHub Actions, Jenkins) for fast, repeatable builds and deploys, including an LLM automation pipeline shipped in 6 weeks.
- Built developer tooling and reusable frameworks (a distributed templating engine now powering 15% of platform assets): developer experience that removed friction for the team.
- Ran observability and carried on-call for global production systems (Grafana, Datadog, Logz.io): logs, metrics, dashboards, and alerting across a data stack of Kafka, PostgreSQL, Elastic Search and ClickHouse.

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

Cloud Architecture Scalability Reliability Technical Advisory System Design

- Reviewed cloud architecture, scalability, and reliability across 20+ startups to inform investment decisions.
- Advised founders on infrastructure choices and engineering practices that scale.

Dronistics · Founding Engineer

08/2018 - 03/2020

AWS Infrastructure from Scratch CI/CD Docker Edge Devices Robot Fleet Real-time Systems APIs

- Built the AWS cloud infrastructure and CI/CD pipeline from scratch for an autonomous drone fleet: edge devices deployed, configured, and updated in the field.
- Engineered real-time control APIs and connectivity between cloud and robots. 500+ deliveries, 99.5% safety record, zero incidents, on partnerships with Unilever and a CES showcase.
- Rolled out over-the-air updates and safe rollbacks to drones in the field, with secure cloud-to-robot connectivity.

EPFL, Laboratory of Intelligent Systems (Robogen) · Research Engineer

08/2016 - 07/2018

AWS Distributed Computing ML Workloads Robotics Python C++

- Migrated the simulation pipeline to AWS for large-scale parallel compute (ML workloads impractical on local hardware). Secured AWS Cloud Credits for Research; featured on the AWS Public Sector Blog.
- Built Robogen, an open-source robotics platform (C++, Python) adopted by researchers and students.

ENTREPRENEURIAL PROJECTS

Founder & Principal Engineer

Independent practice where I build and ship production systems end to end, then distill them into reusable modules, reference architectures, and internal tooling. I run my own cloud, CI/CD, and observability so I can go from laptop to production fast, and durable where it counts.

- Own the full delivery loop solo: infrastructure, deploy pipelines, and observability, then turn each build into reusable capability.

Founder & Builder

A full-stack product built and deployed end-to-end on a single platform (Replit): data model, backend, and UI shipped solo, from zero to live users. Practice at keeping deployment simple while shipping fast.

Co-Founder & Technical Lead

Security-sensitive fintech platform: cross-border tax and compliance with data-privacy-by-design and guardrails built before features. Zero-to-MVP in 3 months on a hardened, compliance-first stack.

EDUCATION	CERTIFICATES	AWARDS
Quantic School of Business and Technology 2019 - 2020 MBA Business Administration	Building Modern Java Applications AWS Build LLM Apps with LangChain DeepLearning.AI MongoDB for Java Developers MongoDB University Microsoft Certified Professional (MCPS) Microsoft	AWS Cloud Credits for Research Amazon Web Services (2020) Appreciation from John T. Chambers (ex-CEO, Cisco Systems) Cisco Systems Recognized for contributions to strategic projects within Cisco's ecosystem TI India Analog Design Contest Winner Texas Instruments KTH Opportunities Fund KTH Royal Institute of Technology
EIT Digital 2014 - 2016 Master (Programme) Innovation & Entrepreneurship		
Eindhoven University of Technology (TU/e) 2015 - 2016 MSc (Netherlands) Embedded Networking		
KTH Royal Institute of Technology 2014 - 2015 MSc (Sweden) Embedded Systems		
Amrita Vishwa Vidyapeetham 2010 - 2014 Bachelor of Engineering Electronics and Communication
