Companies Founded

Hands-on AI engineer who ships production agentic systems end-to-end. At LumApps, built multi-agent outbound systems with structured outputs and AI Brain, a knowledge-graph RAG layer (Neo4j, Graphiti, Zep) with Langfuse-backed evaluation. Six years technical lead at Beekeeper across CrewAI, Strands Agents, LangChain, OpenAI. Three companies founded on the side; consulting-fluent from Tenity advisory and Obermatt PM. Cursor and Claude Code are my daily toolkit.

WORK EXPERIENCE

LumApps · Senior AI Engineer

03/2026 - Present

Python LangChain FastAPI RAG Agentic Systems Structured Outputs Neo4j Graphiti Zep Langfuse
Evaluation Harnesses OpenAI GCP Cursor Claude Code

- Designed and shipped production agentic systems: LLM agents with structured outputs, deterministic orchestration, grounded in client knowledge bases. 2x open rates, 2x approved opportunities, 2 to 3 hours saved per rep per day.
- Built AI Brain, a knowledge-graph RAG layer (Neo4j, Graphiti, Zep) that grounds agents in conversation data, usage analytics, and notes. Unifies 8+ data silos so agents reason over typed relationships.
- Stood up the evaluation harness: Langfuse for observability, replay-driven evals on a golden set, prompt regression gates before rollout. Quality decisions made on measured results, not vibes.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

Python Java OpenAI Claude LangChain CrewAI Strands Agents Langfuse RAG Evaluation CI/CD Kubernetes
AWS PostgreSQL Elastic Search

- Built and operated multiple production LLM systems on real client traffic: AI Onboarding Specialist, GenAI demo generator, LLM translation pipeline. Real users, real failure modes, full evaluation and observability stack (Langfuse, CrewAI, Strands Agents).
- Replaced \$337K in annual vendor translation costs with an LLM pipeline shipped in 6 weeks. 12K+ assets translated; automated scoring and quality gates from day one.
- Led Search Platform revamp across 3 teams. Redesigned indexing, ranking, and retrieval (the RAG foundation that downstream agents reason over).
- Co-owned GTM launches with Sales and PM. Customer-facing technical delivery: clean handovers, measurable outcomes, killed what did not move the metric within a week.

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

AI Advisory Agent Architecture Stakeholder Communication Client-facing Delivery Startup Evaluation

- Evaluated 20+ startups on AI architecture, RAG/agent design, and production readiness. Direct stakeholder communication with founders and investment committees.
- Advised portfolio companies on agentic workflows, evaluation pipelines, and clean technical handovers.

Obermatt · Technical Product Manager (concurrent side role)

07/2018 - 01/2021

Stakeholder Management Consulting-style Delivery Docker CI/CD Agile Remote Team Leadership

- Translated business priorities into engineering execution. Direct work with non-technical stakeholders; clean delivery handovers.
- Led a remote engineering team. Introduced agile + CI/CD with Docker; productivity up 20%, deployment times down 30%.

Dronistics · Founding Engineer

08/2018 - 03/2020

AWS Cloud-Native CI/CD Docker Real-time APIs Enterprise Delivery

- Architected end-to-end platform (Vue, Java, PostgreSQL, AWS). 500+ autonomous deliveries; enterprise partnerships with Unilever and a CES Las Vegas showcase.
- Built CI/CD pipeline and cloud infrastructure from scratch. Real-time flight control APIs and logistics optimization: 40% faster deliveries, 99.5% safety record.

C++

Python

Genetic Algorithms

Teaching & Mentoring

- Engineered Robogen, an open-source AI platform at one of Europe's top labs. Foundational work on optimization, search, and learning that informs how I architect agent reasoning loops today.
- Migrated simulation pipeline to AWS; secured AWS Cloud Credits for Research; work featured on the AWS Public Sector Blog.
- Teaching Assistant for Evolutionary Robotics. Supervised 20+ master's students; early reps at translating technical depth into non-expert stakeholder understanding.

ENTREPRENEURIAL PROJECTS

SwissNRI - AI Cross-border Fintech · <https://www.swissnri.com>

01/2024 - Present

Co-Founder & Technical Lead

AI-native platform for Swiss-Indian families navigating FEMA, DTAA, and Swiss tax regulations. Production RAG over regulated knowledge in a professional-services domain.

- RAG-grounded tax assistant with citations back to source regulation; AI agents flag DTAA/FEMA risks before users file. Zero-to-MVP in 3 months.

Proplab - AI for Real Estate · <https://proplab.io>

09/2025 - Present

Founder & AI Product Builder

AI-native platform for small real estate teams. Vision models turn inspection photos into structured records; LLM agents turn those records into marketing-ready listings.

- End-to-end agent workflow from photo capture to published listing: vision pipeline extracts structured signals, LLM agents generate multilingual listings, human approval gate before publish.

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>

05/2025 - Present

Founder & Builder

Production agentic system for explainable market analysis. Built solo while operating as principal engineer at LumApps.

- Real-time multi-agent system that generates signals AND justifies them. Live users, real money, evaluation loop on every signal.

EDUCATION	CERTIFICATES	AWARDS
Quantic School of Business and Technology 2019 - 2020 MBA Business Administration	Build LLM Apps with LangChain DeepLearning.AI Microsoft Certified Professional (MCPS) Microsoft Building Modern Java Applications AWS MongoDB for Java Developers MongoDB University	Appreciation from John T. Chambers (ex-CEO, Cisco Systems) Cisco Systems Recognized for contributions to strategic projects within Cisco's ecosystem AWS Cloud Credits for Research Amazon Web Services (2020) TI India Analog Design Contest Winner Texas Instruments KTH Opportunities Fund KTH Royal Institute of Technology
EIT Digital 2014 - 2016 Master (Programme) Innovation & Entrepreneurship		
Eindhoven University of Technology (TU/e) 2015 - 2016 MSc (Netherlands) Embedded Networking		
KTH Royal Institute of Technology 2014 - 2015 MSc (Sweden) Embedded Systems		
Amrita Vishwa Vidyapeetham 2010 - 2014 Bachelor of Engineering Electronics and Communication
