Companies Founded

AI engineering lead with portfolio enablement experience. Evaluated 20+ startups at Tenity on architecture and AI readiness; leads AI transformation at LumApps across Sales, Marketing, RevOps, and Finance, directly moving topline (additional \$4M in approved opportunities) and expenses; replaced \$437K of vendor spend with an in-house LLM pipeline embedded in the SDLC at Beekeeper. 10+ years shipping production software for 10M+ users across employee platforms, drones, fintech, and trading. Comfortable parachuting into different technical environments, influencing senior R&D leaders, and shipping hands-on. MBA-trained, founded three companies on the side.

WORK EXPERIENCE

LumApps · Senior AI Engineer

03/2026 - Present

AI Transformation AI Agents AI Governance Guardrails AI Infrastructure Eval Frameworks Prompt Engineering LangChain Knowledge Graphs Neo4j RAG OpenAI Python FastAPI GCP Salesforce Sales Enablement

- Leads AI transformation across Sales, Marketing, RevOps, and Finance. Directly moves topline (additional \$4M in approved opportunities) and reduces operating expenses. Reports to C-level on outcomes, not progress.
- Built and deployed production AI agents for outbound sales. 2x open rates, 2x approved opportunities, 2 to 3 hours saved per rep per day across SDR and AE teams.
- Advises on company-wide AI governance, guardrails, and enablement. Architected agents end-to-end (LangChain, FastAPI, GCP) and operates as the in-house authority on what AI should and should not do.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

LLM Pipelines GitHub Actions OpenAI Claude LangChain CrewAI Strands Agents Langfuse AI Engineering Python Java Vue Kubernetes AWS PostgreSQL Kafka ClickHouse Elastic Search

- Replaced \$437K in annual vendor translation costs with an in-house LLM pipeline (GitHub Actions + OpenAI) shipped in 6 weeks. 12K+ assets translated. AI embedded directly into the engineering SDLC, product team iterates without external gatekeepers.
- Built and mentored the AI engineering cohort. Acting hiring manager for AI roles. Hired for craft and curiosity, grew engineers who now lead AI features independently.
- Built AI Onboarding Specialist giving every new signup personalized, high-touch guidance at scale. 100% of customers guided through setup, time-to-first-value reduced without adding headcount.
- Architected Employee Referral System end-to-end. Became the platform's top revenue channel (\$1.5M+ generated, \$500K ARR). Designed for 99.99% SLA.

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

AI Strategy Portfolio Evaluation AI Readiness Engineering Transformation Technical Mentoring Architecture Review

- Technology Evaluation Panel for seed-to-VC stage startups. Evaluated 20+ companies on architecture, scalability, and AI readiness to inform investment decisions.
- Advised multiple portfolio companies on AI strategy, technical hiring, and building engineering cultures that actually ship. Operates across diverse stacks and business contexts.

Dronistics · Founding Engineer

08/2018 - 03/2020

Vue Java PostgreSQL AWS Docker CI/CD Real-time Systems Flight Control APIs Logistics Optimization

- Shipped end-to-end autonomous drone delivery platform (Vue, Java, PostgreSQL). 500+ successful deliveries, every flight a live UX test for autonomous systems in the real world.
- Built cloud infrastructure and DevOps pipeline from scratch. Enterprise-grade reliability that enabled partnerships with Unilever and a CES showcase.

C++PythonAWSGenetic AlgorithmsNeural NetworksEvolutionary AIRoboticsWebots

- Engineered Robogen, an open-source platform for co-evolution of robot bodies and brains via genetic algorithms.
- Migrated the simulation pipeline to AWS for large-scale parallel evolution runs. Secured AWS Cloud Credits for Research; work featured on the AWS Public Sector Blog.
- Teaching Assistant for Evolutionary Robotics at EPFL. Supervised 20+ master's students through hands-on projects in genetic algorithms, neural controllers, and embodied AI.

ENTREPRENEURIAL PROJECTS

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & Builder

Built for my own trading portfolio first: a platform that explains its signals, not just shows them. Retail traders deserve the same explainable analysis that institutions pay for.

- Real-time market analysis via AI agents that generate and justify trading signals using technical and news-based data.
- Core product principle: if the model can't explain the signal, it doesn't ship. Explainability over complexity (a small example of the governance instinct I bring to enablement work).

Proplab - AI Real Estate Tools · <https://proplab.io>09/2025 - Present

Founder & Builder

Property inspections run on paper, clipboards, and WhatsApp photos. Built MVP for a fully digital, image-backed, timestamped inspection protocol that replaces the entire manual workflow.

- Shipped MVP replacing paper-based inspection workflows with structured, image-backed, timestamped records.
- Building AI marketing assistant that auto-generates property listings from inspection data. One workflow, zero copy-paste.

SwissNRI - Cross-border Fintech Platform · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

Swiss-Indian families navigating FEMA, DTAA, and Swiss regulations had zero digital help. Just spreadsheets and expensive advisors. Built the first platform addressing this.

- Zero-to-MVP in 3 months. Early users acquired through Swiss-Indian community partnerships.
- Compliance-first design: regulatory guardrails for both jurisdictions built before features.
