Companies Founded

Hands-on AI architect, 10+ years building production systems. Owns AI agent architecture end-to-end at LumApps (LangChain, FastAPI, GCP, eval harness): \$4M/quarter approved pipeline forecast, 2x open rates. Six years as Technical Lead at Beekeeper architecting distributed, event-driven systems (Kafka, microservices, Kubernetes) and shipping production LLM pipelines, including one that replaced a \$337K vendor contract in 6 weeks. Built SwissNRI under FEMA, DTAA, and Swiss regulatory constraints; mentored AI engineering cohorts at Beekeeper and 20+ startups at Tenity. MBA, Zurich-based.

WORK EXPERIENCE

LumApps · Senior AI Engineer

03/2026 - Present

Python FastAPI LangChain GCP AI Agents Multi-Agent RAG OpenAI Evals Langfuse Neo4j Graphiti Zep MLOps AI Governance CI/CD

- Designed, built, and deployed production AI agents for outbound sales. Architecture: LangChain, FastAPI, GCP, RAG, multi-agent runtime, eval harness (offline and online), governance. 2x open rates, 2x approved opportunities, \$4M/quarter approved pipeline forecast.
- Owned the full LLM application lifecycle: prompt management, evals, drift monitoring, reproducibility, auditability. Cloud-native, observability-first, designed for production reliability.
- Expanded scope to own company-wide AI transformation strategy, governance, and sales enablement. Defines architectural standards across product, sales, and CS; bridges engineering with risk and compliance.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

Python Java Kubernetes AWS OpenAI Claude LangChain CrewAI Strands Agents Langfuse Kafka Event-Driven Architecture Microservices Distributed Systems PostgreSQL Elastic Search ClickHouse Jenkins GitHub Actions Observability MLOps

- Replaced \$337K annual vendor translation contract with a production LLM pipeline (GitHub Actions, OpenAI APIs) shipped in 6 weeks. 12K+ assets translated; model and prompt lifecycle, evals, and auditability owned in-house.
- Built AI Onboarding Specialist, a production agent guiding 100% of new signups through personalized setup at scale. Architected end-to-end from design through monitoring.
- Architected Employee Referral System end-to-end as Tech Lead of the Incubation team (reporting to CIO). Event-driven, microservices, Kafka-backed, designed for 99.99% SLA. Platform's top revenue channel (\$1.5M+ generated, \$500K ARR).
- Acting hiring manager for the AI engineering cohort. Led architecture and design reviews, mentored engineers who now lead features independently, raised engineering standards across teams.

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

Architecture Review AI Strategy MLOps Scalability Fintech Risk Assessment

- Led architecture and AI-readiness reviews for 20+ startups (scalability, model risk, MLOps maturity) to inform seed-to-VC investment decisions.
- Mentored Opt Alpha on scaling high-frequency algorithmic trading systems in production. Advised on observability, reliability, and platform architecture.

Dronistics · Founding Engineer

08/2018 - 03/2020

Vue Java PostgreSQL AWS Docker CI/CD Distributed Systems Real-time APIs Cloud-Native Infrastructure-as-Code

- Shipped end-to-end autonomous drone delivery platform (Vue, Java, PostgreSQL, AWS). Distributed system architecture, real-time flight control APIs, 500+ successful deliveries.
- Built CI/CD pipeline and AWS infrastructure from scratch. Infrastructure-as-code, enterprise-grade reliability that enabled Unilever partnership and CES Las Vegas showcase.

C++PythonAWSGenetic AlgorithmsNeural NetworksMulti-Agent SystemsDistributed ComputingWebots

- Engineered Robogen, an open-source platform for co-evolution of robot bodies and brains via genetic algorithms. Multi-agent autonomous systems, distributed simulation pipeline.
- Migrated simulation pipeline to AWS for large-scale parallel evolution runs. Infrastructure-as-code, secured AWS Cloud Credits for Research, featured on the AWS Public Sector Blog.
- Foundational AI experience (optimization, search, fitness landscapes, learning from environment) that informs how I design modern LLM and agentic systems today.

ENTREPRENEURIAL PROJECTS

SwissNRI - Cross-border Fintech Platform · https://www.swissnri.com01/2024 - Present

Co-Founder & Technical Lead

Cross-border fintech platform for Swiss-Indian families navigating FEMA, DTAA, and Swiss regulatory constraints. Compliance-first architecture built into the foundation, not bolted on.

- Zero-to-MVP in 3 months. Regulatory guardrails for both jurisdictions designed into the architecture before features.
- Customer feedback loops drove 40% uplift in satisfaction. Roadmap owned by what users actually asked for.

PulseView - AI Market Intelligence · https://pulse-view.anand-creations.com05/2025 - Present

Founder & Builder

Real-time stock market analysis platform where AI agents generate AND justify trading signals. Explainability and auditability as core architectural constraints, not afterthoughts.

- Production AI agents for real-time market analysis. Signal generation and justification, with explainability built into the architecture.
- Opened to retail traders after self-validating. Now serving live users with real-time market feeds.

Proplab - AI Real Estate Tools · https://proplab.io09/2025 - Present

Founder & Builder

AI-powered tools for small real estate teams. MVP replacing paper-based property inspections with structured, image-backed, timestamped digital records.

- Shipped MVP replacing paper-based inspection workflows with structured, image-backed, timestamped records.
- Building AI marketing assistant that auto-generates property listings from inspection data.
