10M+

Users Served

3

Companies Founded

Senior AI architect who designs, ships, and operates production LLM and agent systems, then turns them into the paved-road patterns the rest of the org builds on. At LumApps, owns the agent platform end-to-end (Python, FastAPI, LangChain, GCP, RAG, evals, verification loops): 2x conversions, \$4M forecast in approved opportunities per quarter. At Beekeeper, 6 years as Tech Lead through the Series B to F scale: architected systems serving 10M+ users, replaced a \$337K vendor with a 6-week LLM pipeline, built the AI engineering cohort that raised standards across teams. Co-founded SwissNRI on the side, compliance-first cross-border fintech with regulatory guardrails built before features; Zurich-based, judgement over jargon.

WORK EXPERIENCE

LumApps · Senior AI Engineer

03/2026 - Present

AI Architecture Python FastAPI LangChain RAG Agents Evals Verification Loops OpenAI GCP Governance Observability

- Architected and shipped the production AI agent platform for outbound sales (Python, FastAPI, LangChain, GCP, RAG). Verification loops, evals, observability, and human-in-the-loop checkpoints built in from day one.
- Outcomes the GTM org measures by: 2x open rates, 2x approved opportunities, 2 to 3 hours saved per rep per day. Forecast: \$4M in approved opportunities per quarter.
- Owns company-wide AI governance: where agents can act, where humans verify, how outcomes get measured. Reports to C-level on outcomes, not progress.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

AI Architecture Python Java Kubernetes AWS Kafka Event-Driven PostgreSQL Elastic Search ClickHouse OpenAI Claude LangChain CrewAI Strands Agents Langfuse Vue TypeScript GitHub Actions Jenkins CI/CD Mentoring

- Built and mentored the AI engineering cohort. Hired for craft and curiosity, defined the pro-code standards for agent development that scaled beyond any individual. Same shape as an AI Developer Guild.
- Designed distributed templating engine that cut customer setup time 90%. Now powers 15% of all assets created on the platform for 10M+ users. The paved-road pattern: customers stopped re-solving the same problem.
- Replaced \$337K in annual vendor translation costs with an in-house LLM pipeline shipped in 6 weeks (GitHub Actions + OpenAI). 12K+ assets translated; production GenAI in a sensitive enterprise environment.
- Architected Employee Referral System end-to-end as Tech Lead reporting to CIO. Top revenue channel on the platform: \$1.5M+ generated, \$500K ARR, 99.99% SLA, distributed services on Kafka + PostgreSQL.

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

Architecture Review AI Strategy Mentoring Scalability Fintech

- Evaluated 20+ startups on technical architecture, scalability, and AI readiness to inform seed-to-VC investment decisions.
- Mentored Opt Alpha on scaling high-frequency algorithmic trading systems in production.

Dronistics (EPFL Spin-off) · Founding Engineer

08/2018 - 03/2020

Cloud Architecture Vue Java PostgreSQL AWS Docker CI/CD Real-time APIs Distributed Systems

- Shipped end-to-end autonomous delivery platform (Vue, Java, PostgreSQL, AWS) with real-time flight control APIs. 500+ deliveries powering a Unilever partnership and a CES Las Vegas showcase. 40% faster, 99.5% safety, zero incidents.
- Built cloud infrastructure and CI/CD pipeline from scratch. Enterprise-grade reliability that earned customer trust from the first deployment.

C++

Python

AWS

Genetic Algorithms

Neural Networks

Evolutionary AI

Robotics

Webots

- Engineered Robogen, an open-source platform for co-evolution of robot bodies and brains via genetic algorithms.
- Migrated the simulation pipeline to AWS for large-scale parallel evolution runs impractical on local hardware. Secured AWS Cloud Credits for Research; work featured on the AWS Public Sector Blog.
- Foundational AI experience (optimization, search, fitness landscapes, learning from environment) that informs how I approach modern LLM and agentic systems today.

ENTREPRENEURIAL PROJECTS

SwissNRI - Cross-border Fintech Platform · <https://www.swissnri.com>

01/2024 - Present

Co-Founder & Technical Lead

Compliance-first cross-border fintech for Swiss-Indian families navigating FEMA, DTAA, and Swiss regulations. Regulatory guardrails built into the architecture before features.

- Zero-to-MVP in 3 months. Compliance-first design with regulatory guardrails for both jurisdictions built before features.
- Customer feedback loops drove 40% uplift in satisfaction. Roadmap owned by what users actually asked for.

PulseView - Explainable AI Market Intelligence · <https://pulse-view.anand-creations.com>

05/2025 - Present

Founder & Builder

Real-time AI agents that generate AND justify trading signals from technical and news data. Core principle: if the model cannot explain the signal, it does not ship. Verification before output, every time.

- Built the full stack solo: agent runtime, real-time market data integrations, signal generation and justification layer, web frontend.
- Live retail users. Explainability and auditability as the product, not a feature.

Proplab - AI for Real Estate Operations · <https://proplab.io>

09/2025 - Present

Founder & Builder

Property inspections ran on paper, clipboards, and WhatsApp photos. Redesigned the workflow before automating it: built MVP for a fully digital, image-backed, timestamped inspection process.

- Shipped MVP replacing paper-based inspection workflows with structured, image-backed, timestamped records.
- Building AI marketing assistant that auto-generates property listings from inspection data.
