\$1M+

Quarterly Revenue Forecast

\$337K

Costs Eliminated

10M+

Users Served

3

AI Products Founded

Applied AI engineer who owns LLM features from prompt to production. Lead AI Engineer at LumApps building multi-agent workflows on Python, LangGraph and Google ADK: prompts, tools, memory, evals, tracing, and cost-per-request instrumentation. 2x outbound conversions, \$1M forecast in quarterly revenue. Prior LLM pipelines shipped at Beekeeper (\$337K/yr vendor cost eliminated in 6 weeks) and 3 AI products founded on the side (PulseView, Proplab, SwissNRI). ML foundation from EPFL research (neural networks, genetic algorithms, embodied learning). Comfortable across the stack: model, orchestration, infra, UX.

WORK EXPERIENCE

LumApps · Lead Applied AI Engineer

▶ Watch demo

03/2026 - Present

Python LangGraph Google ADK MCP AG-UI GCP Vertex AI OpenAI Anthropic RAG Vector Databases Neo4j Graphiti Prompt Engineering Evaluation Pipelines LangSmith Multi-Agent Systems Latency & Cost Optimization Observability On-Call

- Shipped production multi-agent workflows on Python, LangGraph, Google ADK over Vertex AI. ReAct with self-reflection, tools over MCP, state streamed to the UI over AG-UI. Verification loops and human-in-the-loop checkpoints turn raw outputs into structured, reliable behaviors. 2x open rates, 2x approved opportunities, \$1M forecast quarterly.
- Designed AI Brain, a temporal knowledge graph on Graphiti and Neo4j that unifies 5+ silos (Salesforce, HubSpot, Pendo, product usage) into one time-aware memory every agent reads and writes. Grounds RAG so agents stop hallucinating; long-running workflows keep persistent context.
- Built the evaluation and reliability layer: lightweight eval pipelines, LangSmith tracing, tool-selection tuning, cost-per-request instrumentation, fallback/retry paths for LLM and tool failures, and on-call for global production.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

Python TypeScript Java OpenAI Claude LangChain CrewAI Strands Agents Langfuse Prompt Engineering Vue Kubernetes AWS PostgreSQL Elastic Search Kafka GitHub Actions Grafana Datadog

- Replaced \$337K/yr in vendor translation costs with an in-house LLM pipeline shipped in 6 weeks (GitHub Actions + OpenAI). 12K+ assets translated; product team iterates without a gatekeeper.
- Built AI Onboarding Specialist and a GenAI demo generator: LLM-powered features shipped end to end (prompts, orchestration, UI, evals). Improved demo speed, close rates, time-to-first-value.
- Designed a distributed templating engine that cut customer setup time 90% and powers 15% of all assets on the platform (10M+ users). Product Owner; concept to production.
- Ran observability and global on-call (Grafana, Datadog, Logz.io); built and mentored the AI engineering cohort. Deputy tech lead of FUEL.

Dronistics (EPFL spin-off) · Founding Engineer

08/2018 - 03/2020

Vue Java PostgreSQL AWS Docker Terraform CI/CD Real-time Systems Logistics Optimization

- Shipped end-to-end delivery platform with real-time flight-control APIs and logistics optimization. 500+ autonomous last-mile deliveries; 99.5% safety record.
- Built cloud infra and CI/CD from scratch (AWS, Docker, Terraform). Enabled Unilever partnership and a CES showcase.

EPFL, Laboratory of Intelligent Systems (Robogen) · AI Research Engineer

08/2016 - 03/2020

C++ Python Neural Networks Genetic Algorithms Evolutionary AI Embodied Learning AWS Robotics Webots Open Source

- Engineered Robogen, an open-source platform where robot bodies and neural controllers co-evolve via genetic algorithms.
- Migrated the simulation pipeline to AWS for large-scale parallel evolution. Secured AWS Cloud Credits for Research; featured on the AWS Public Sector Blog.
- TA for Evolutionary Robotics; supervised 20+ master's students on optimization, neural networks, and embodied learning. ML foundation for my applied LLM work today.

PulseView - Explainable AI Market Intelligence · <https://pulse-view.anand-creations.com>

05/2025 - Present

Founder & Builder

Real-time market intelligence for retail traders. AI agents generate AND justify trading signals from technical and news data; if the model cannot explain the signal, it does not ship. Solo end to end: structured outputs, evals, live users on real-time feeds.

Proplab - AI-Native Property Workflows · <https://proplab.io>

09/2025 - Present

Founder & AI Product Builder

Vision pipeline extracts structured signals (room type, condition, defects) from inspection photos, replacing paper reports with queryable, AI-readable data. LLM agents then compose multilingual, marketing-ready listings end to end.

Anand Creations - AI Products & Forward Deployed Engineering · <https://anand-creations.com>

06/2024 - Present

Founder & Principal Builder

Independent studio for AI-native products I design, build, and ship on my own (PulseView, Proplab, SwissNRI). Full-stack, model to UX, concept to real customers.
