Companies Founded

Zurich-based AI engineer and technical advisor with 13+ years shipping production systems for enterprise customers on AWS. Lead AI Engineer at LumApps building multi-agent workflows (LangGraph, ADK, Bedrock/Vertex, MCP) that 2x sales conversions and forecast \$1M in quarterly revenue. Six years at Beekeeper on AWS/Kubernetes/Kafka, including LLM pipelines that eliminated \$337K in vendor cost and a search platform serving 10M+ frontline users. Frequent speaker (Front Conference, Developer Week USA) and published on the AWS Public Sector Blog. Regularly runs technical deep-dives, PoCs and enablement for startups (Tenity panelist) and my own AI product portfolio at Anand Creations.

WORK EXPERIENCE

LumApps · Lead AI Engineer

▶ Watch demo

03/2026 - Present

AWS GCP Vertex AI Bedrock Python LangGraph Google ADK MCP AG-UI Multi-Agent Systems ReAct RAG
Vector Databases MLOps Evaluation Pipelines LangSmith Neo4j Graphiti FastAPI On-Call

- Designed and shipped production multi-agent workflows for outbound sales (Python, LangGraph, Google ADK on Vertex AI) using ReAct, self-reflection and hierarchical delegation, with tools exposed over MCP servers and agent state streamed to the UI via AG-UI. 2x open rates, 2x approved opportunities, 2 to 3 hours saved per rep per day. Forecast: \$4M approved opportunities per quarter, \$1M in revenue.
- Architected AI Brain, a temporal knowledge graph on Graphiti and Neo4j that unifies Salesforce, HubSpot, Pendo, transcripts and product usage into one time-aware memory. Event-driven ingest over Pub/Sub, per-agent read/write contracts, and a freshness layer that grounds RAG retrieval and cuts hallucinations.
- Own the full delivery lifecycle: agent architecture, MLOps (eval pipelines, LangSmith tracing, tool-selection tuning, cost-per-request telemetry) and global on-call. Report directly to C-level on outcomes.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

AWS Kubernetes OpenAI Claude Bedrock LangChain CrewAI Strands Agents Langfuse Java Python TypeScript
Vue Kafka PostgreSQL Elastic Search ClickHouse Grafana Datadog GitHub Actions On-Call

- Replaced \$337K in annual vendor translation cost with an in-house LLM pipeline (OpenAI + GitHub Actions on AWS) shipped in 6 weeks. 12K+ assets translated, product team iterates without external gatekeepers.
- Architected Employee Referral System end-to-end on AWS/Kubernetes/PostgreSQL. Became the platform's top revenue channel: \$1.5M+ generated, \$500K ARR, 99.99% SLA.
- Built AI Onboarding Specialist and GenAI demo generator using OpenAI, Claude, CrewAI and Strands Agents on AWS. 100% of new signups guided through setup; sales demos auto-personalized from Salesforce data.
- Ran observability and on-call for global production systems on AWS (Grafana, Datadog, Logz.io, Kafka, Elastic Search); mentored the AI engineering cohort and co-owned GTM launches with Product and Sales.

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

AI Strategy Cloud Architecture Review Pre-sales / Technical Advisory Startup Evaluation MLOps Scalability

- Trusted technical advisor to 20+ seed-to-VC fintech and AI startups: evaluated architecture, scalability, cloud posture and AI readiness to inform investment decisions.
- Ran technical deep-dives and enablement sessions on cloud AI adoption; mentored Opt Alpha on scaling high-frequency algorithmic trading systems in production.

Dronistics · Founding Engineer

08/2018 - 03/2020

AWS Docker Terraform CI/CD Vue Java PostgreSQL Real-time Systems Infrastructure as Code

- Shipped an end-to-end autonomous drone delivery platform on AWS (Vue/Java/PostgreSQL, Docker, Terraform, CI/CD from scratch) that ran 500+ real-world deliveries and enabled partnerships with Unilever and a CES showcase.
- Engineered real-time flight control APIs and logistics optimization: 40% faster deliveries, 99.5% safety record, zero incidents.

AWS

C++

Python

Genetic Algorithms

Neural Networks

Evolutionary AI

Deep Learning

Webots

- Built Robogen, an open-source platform for co-evolution of robot morphologies and neural controllers via genetic algorithms. Foundational ML work (optimization, search, fitness landscapes) that underpins today's agentic craft.
- Migrated the simulation pipeline to AWS for large-scale parallel evolution runs impractical on local hardware. Secured AWS Cloud Credits for Research; featured on the AWS Public Sector Blog.
- Teaching Assistant for Evolutionary Robotics; supervised 20+ MSc students through hands-on projects in genetic algorithms, neural controllers and embodied AI.

ENTREPRENEURIAL PROJECTS

Anand Creations - Forward Deployed Engineering Practice · <https://anand-creations.com>06/2024 - Present

Founder & Principal Forward Deployed Engineer

Independent AI advisory and forward-deployed engineering practice. Runs technical discovery, PoC engagements and reference architecture work for teams adopting agentic AI on cloud platforms. Home to the AI products I design, build and operate myself (SwissNRI, Proplab, PulseView) end-to-end: multi-agent systems, RAG grounding, evaluations and observability.

SwissNRI - AI Cross-border Fintech · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

AI-native cross-border tax and compliance platform for Swiss-Indian families. RAG-grounded assistant answers DTAA, FEMA and Swiss tax questions with citations back to the regulation; compliance-first agentic design flags risk before users file. Zero-to-MVP in 3 months on AWS, 40% uplift in user satisfaction. Regulated fintech domain.

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & Builder

Real-time market intelligence platform. AI agents generate and justify trading signals from technical and news data with explainability and evaluation built in: if the model can't explain the signal, it doesn't ship. Serving live retail users on real-time feeds.

EDUCATION

Quantic School of Business and Technology2019 - 2020

MBA Business Administration

EIT Digital2014 - 2016

Master (Programme) Innovation & Entrepreneurship

Eindhoven University of Technology (TU/e)2015 - 2016

MSc (Netherlands) Embedded Networking

KTH Royal Institute of Technology2014 - 2015

MSc (Sweden) Embedded Systems

Amrita Vishwa Vidyapeetham2010 - 2014

Bachelor of Engineering Electronics and Communication

CERTIFICATES

Building Modern Java ApplicationsAWS

Knowledge Graphs for RAGNeo4j

AI Agents in LangGraphLangChain & Tavily

Build LLM Apps with LangChainDeepLearning.AI
