22%	\$1.5M+	\$337K	3
CAGR (USD) / 13Y	Revenue Shipped	Costs Eliminated	Companies Founded

13 years ago I started my own portfolio and never stopped optimizing it for performance and value creation: 22% CAGR (USD) across cycles, with high-conviction positions in Anthropic (\$18B round), SpaceX (\$125B round), Indian consumer/financial/IT compounders and a Ray Dalio-informed risk framework. Operator side: Lead AI Engineer at LumApps (Bridgepoint-owned PE portfolio company), driving GTM AI that 2x conversions and forecasts \$1M/quarter in revenue. Founded 3 companies, ran 6 years of hands-on product/data engineering at Beekeeper (\$1.5M+ revenue channel built, \$337K in vendor cost cut), and mentor buy-side / fintech founders at Tenity including Opt Alpha (algo trading). Unconventional profile: I bring the investor lens, the operator scars and an AI leverage layer that most PE value-creation officers cannot.

Salesforce

C-Level Reporting

- Operate inside a Bridgepoint PE portfolio company. Own the GTM AI thesis end-to-end: production multi-agent workflows that 2x open rates, 2x approved opportunities and forecast \$4M/quarter pipeline (~\$1M revenue at 25% conversion). Report directly to C-level on value-creation outcomes.
- Consult with commercial leadership on how AI compounds sales productivity across the portfolio: measurable rep-hour savings (2 to 3 hours per rep per day), cost-per-request instrumentation and value-creation KPIs the PE owner can underwrite.
- Architected AI Brain, a temporal knowledge graph unifying Salesforce, HubSpot, Pendo, transcripts and product usage. Same playbook I would use to build a shared performance-and-diligence layer across an investment group's portfolio.

Cost Optimization

AWS

Java

Python

PostgreSQL

- Architected Employee Referral System end-to-end, reporting to CIO: became the platform's top revenue channel with \$1.5M+ generated and \$500K ARR at 99.99% SLA. Ran the business case, the tech and the GTM with Sales and PM.
- Replaced \$337K in annual vendor cost with an in-house LLM pipeline shipped in 6 weeks. Direct P&L impact, rigorous payback analysis, ruthless prioritization.
- Co-owned GTM launches with Product and Sales (Seasonal Templates, Re-ignite Revenue, Sentiment Analysis). Each shipped with instrumentation so we could challenge assumptions and know within a week whether the initiative moved the metric.
- Led Search Platform revamp across 3 teams; mentored the AI engineering cohort; global on-call. Practical, hands-on operator across product, engineering and commercial.

Investment Due Diligence

Corporate Governance

Portfolio Advisory

Founder / CFO Coaching

Algorithmic Trading

Fintech

Business Model Analysis

- Portfolio-style diligence on 20+ fintech and AI startups for seed-to-VC investment decisions: business model, moat, unit economics, governance and ESG readiness. Challenged founders and CFOs on the numbers, not just the story.
- Mentored Opt Alpha on scaling algorithmic trading in production. Advised multiple portfolio companies on operating rhythm, hiring and value-creating AI adoption.

Logistics

Industrial Operations

Enterprise Sales

Founding Team

Real-Time Systems

AWS

PostgreSQL

- Founding engineer at an EPFL spin-off. Built the commercial platform that ran 500+ real-world deliveries and enabled partnerships with Unilever and a CES showcase. Ownership over product, tech and enterprise commercials.
- First-hand experience of logistics, last-mile trade and industrial operations: exactly the kind of hands-on operating context Ampersand's portfolio touches (logistics, trade, industrial businesses).

ENTREPRENEURIAL PROJECTS

Personal Investing Track Record - 22% CAGR (USD), 13 Years

01/2012 - Present

Self-Directed Investor

13+ years managing my own multi-asset portfolio for performance and value creation. 22% CAGR (USD) across cycles, with disciplined position sizing and drawdown control. Notable high-conviction positions: Anthropic (entered at \$18B round), SpaceX (entered at \$125B round) and Indian consumer / financial / IT compounders as a core EM sleeve. Risk framework informed by Ray Dalio's Principles and Big Debt Crises. Every position underwritten with a written thesis on business model, moat, unit economics, capital allocation and governance, with pre-defined invalidation triggers.

PulseView - AI Market Intelligence & Algo Trading

https://pulse-view.anand-creations.com

05/2025 - Present

Founder & Builder

Production AI platform I built for my own portfolio first, then opened to retail. Ingests price and news time series, runs technical + sentiment signals, and executes rules-based algo strategies with agents that generate AND justify every signal (if the model cannot explain it, it does not ship). Explainability, evaluation and back-testing baked in. Living proof that AI can compound an investor's edge without giving up governance.

Anand Creations - Forward Deployed Engineering Practice

https://anand-creations.com

06/2024 - Present

Founder & Principal Forward Deployed Engineer

Independent practice embedding with CEO/CFO/CIO of portfolio-style companies to unlock AI-driven value creation: technical diligence, agent architecture, evaluation and observability. Same operator playbook I would bring across Ampersand's diversified portfolio: sit with management, challenge assumptions, ship the improvement, measure the outcome.
