

Anand Bhaskaran

AI Sales Engineer / Solutions Architect / Production Agentic AI (LangGraph, ADK, MCP) / Evals, Tracing & Customer Outcomes

📍 Zurich, Switzerland · ✉ anandbaskaran3193@gmail.com · 📞 +41763043193 · in anandb3 · 🌐 anandbhaskaran · 🌐 anand-creations.com

\$1.5M+	\$337K	10M+	3
Revenue Shipped	Costs Eliminated	Users Served	Companies Founded

AI engineer and trusted technical advisor who ships production agents for a living and uses AI observability daily. Currently Lead AI Engineer at LumApps: production multi-agent workflows on Python, LangGraph, Google ADK and MCP over GCP, instrumented end-to-end with evals, LangSmith tracing and cost-per-request telemetry. I am the buyer Arize sells to, so I can articulate its value with authority. Founder of Anand Creations, my forward-deployed practice for running discovery, POCs and productionization on live customer data. 6 years co-owning GTM launches with Sales, Product and CIO at Beekeeper (10M+ users), and 20+ startup discovery + advisory engagements at Tenity. Zurich-based, EMEA-remote, happy to travel to customers across the region.

WORK EXPERIENCE

LumApps · Lead AI Engineer [▶ Watch demo](#) 03/2026 - Present

PythonTypeScriptLangGraphGoogle ADKMCPOpenAIAI ObservabilityLangSmithEvaluation PipelinesTracingCost TelemetryMLOpsGCPVertex AI

- Ship production multi-agent workflows (Python, LangGraph, Google ADK, MCP servers) on GCP Vertex AI with full observability: evals-as-tests, LangSmith tracing, tool-selection tuning and cost-per-request telemetry. Daily hands-on user of the exact category Arize AX competes in.
- 2x open rates, 2x approved opportunities, \$1M/quarter revenue forecast. Concrete before/after numbers I use to translate technical wins into board-ready ROI stories.
- Report to C-level on outcomes; run cross-functional reviews with Sales and Product. Fluent in translating stochastic agent behavior into language a CDO and a CFO can both act on.

Beekeeper AG · Senior Software Engineer (Technical Lead) 03/2020 - 02/2026

PythonJavaTypeScriptOpenAIClaudeLangChainCrewAISTRANDS AGENTSLangfuseAWSKubernetesKafkaPostgreSQLClickHouseGTMDiscovery

- Co-owned GTM launches with Product and Sales (Seasonal Templates, Re-ignite Revenue, Sentiment Analysis). Each shipped with instrumentation so we could pitch measurable impact within a week. Exactly the story-arc a Sales Engineer needs.
- Replaced \$337K in annual vendor cost with an in-house LLM pipeline (OpenAI + GitHub Actions) shipped in 6 weeks. A crisp PoC narrative I have used to unblock enterprise buyers on 'AI is too expensive to ship'.
- Architected Employee Referral System (\$1.5M+ revenue, \$500K ARR, 99.99% SLA) and led Search Platform revamp across 3 teams. Production data engineering on AWS, Kubernetes, Kafka, PostgreSQL and ClickHouse.
- Mentored the AI engineering cohort and ran discovery with prospects and CIO. Comfortable moving between board-level pitch and hands-on prototype in the same day.

Tenity · Startup Mentor & Technology Evaluation Panelist 06/2024 - Present

Trusted AdvisorDiscoveryTechnical PoCGenAI StacksMLOps AdvisoryFintechAI Strategy

- Trusted technical advisor to 20+ fintech and AI startups. Ran discovery on GenAI stacks, evaluated architectures and turned findings into investment recommendations. Same discovery-to-value motion an AI Sales Engineer runs with prospects.
- Mentored Opt Alpha on scaling algorithmic trading; advised portfolio companies on where AI observability and evals genuinely earn their keep.

Dronistics · Founding Engineer 08/2018 - 03/2020

Founding EngineerAutonomous DronesEnterprise SalesPoCAWSVueJavaPostgreSQLReal-Time Systems

- Founding engineer at an EPFL autonomous drone spin-off (nod to the JD's own team background). Shipped the end-to-end platform (Vue/Java/PostgreSQL on AWS) that ran 500+ real-world deliveries.
- Ran enterprise sales conversations that landed a Unilever partnership and a CES showcase. First-hand experience taking an unproven AI platform through PoC, procurement and production with a Fortune 500 buyer.

Anand Creations - Forward Deployed Engineering Practice · <https://anand-creations.com>06/2024 - Present

Founder & Principal Forward Deployed Engineer

Independent FDE practice. I run discovery with teams adopting agentic AI, ship PoCs, then take agents from zero to production on their live data with evals, tracing and cost telemetry from day one. Direct match for the customer-facing FDE profile the JD invites: bridge, pitch, prototype, close.

PulseView - AI Market Intelligence with Evals Built In · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & Builder

Production AI platform on live market data. Agents generate AND justify signals with cited evidence and back-testing: if the model cannot explain the signal, it does not ship. A working demo of what disciplined eval-driven agent development actually looks like, and a story I use when talking to prospects about observability.

SwissNRI - Compliance-First Regulated Fintech · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

Live production platform for Swiss-Indian cross-border tax and compliance decisions. RAG-grounded assistant answers DTAA, FEMA and Swiss tax with citations back to the regulation; agentic layer flags risk with regulator-verifiable outputs. Proof point when selling into regulated GenAI buyers.

EDUCATION

Quantic School of Business and Technology	2019 - 2020
MBA Business Administration	
EIT Digital	2014 - 2016
Master (Programme) Innovation & Entrepreneurship	
Eindhoven University of Technology (TU/e)	2015 - 2016
MSc (Netherlands) Embedded Networking	
KTH Royal Institute of Technology	2014 - 2015
MSc (Sweden) Embedded Systems	
Amrita Vishwa Vidyapeetham	2010 - 2014
Bachelor of Engineering Electronics and Communication	

CERTIFICATES

AI Agents in LangGraph
LangChain & Tavily
Knowledge Graphs for RAG
Neo4j
Build LLM Apps with LangChain
DeepLearning.AI

AWARDS

AWS Cloud Credits for Research
Amazon Web Services (2020)
Appreciation from John T. Chambers
(ex-CEO, Cisco Systems)
Cisco Systems
