

Anand Bhaskaran

Entrepreneur in Residence / 3x Founder / AI Product Builder / MBA

📍 Zurich, Switzerland · ✉ anandbaskaran3193@gmail.com · 📞 +41763043193 · in anandb3 · 🌐 anandbhaskaran · 🏠 anand-creations.com

\$1.5M+

Revenue Shipped

\$337K

Costs Eliminated

10M+

Users Served

3

Companies Founded

Serial founder and AI product builder. 3 companies founded on the side, \$1.5M+ in revenue shipped inside Beekeeper as tech lead of a new incubation vertical, and current Lead AI Engineer at LumApps building production multi-agent systems that forecast \$1M in quarterly revenue. I take zero-to-one AI products end to end: market research, product strategy, engineering, GTM with sales and product, and the metric on the other side. MBA-trained, Zurich-based, and I optimize for outcomes not artefacts.

WORK EXPERIENCE

LumApps · Lead AI Engineer [▶ Watch demo](#) 03/2026 - Present

Python LangGraph Google ADK GCP Vertex AI MCP AG-UI Multi-Agent Systems RAG Vector Databases
Evaluation Pipelines Neo4j Graphiti Product Strategy GTM

- Built and shipped a production AI outbound sales product end to end: Python, LangGraph, Google ADK on GCP Vertex AI, with tools over MCP and state streamed to the UI over AG-UI. 2x open rates, 2x approved opportunities, 2 to 3 hours saved per rep per day, \$1M forecast in quarterly revenue. Own the roadmap, the eval bar, and the on-call pager.
- Designed AI Brain, a temporal knowledge graph on Graphiti and Neo4j that unifies 5+ silos (Salesforce, HubSpot, Pendo, transcripts, product usage) into one time-aware memory every agent reads and writes. Grounds RAG and cuts hallucinations.
- Report directly to C-level on outcomes, not progress. Own product bets, eval strategy, cost-per-request instrumentation, and the sales enablement narrative alongside the engineering.

Beekeeper AG · Senior Software Engineer (Technical Lead, Incubation) 03/2020 - 02/2026

Java Python Vue Kubernetes AWS OpenAI LangChain Product Ownership GTM Market Research
Hiring & Team Building Cross-functional Leadership

- Architected Employee Referral System end to end as tech lead of the Incubation team, reporting to CIO. Ran market research, competitor analysis, product scope, and GTM with Sales and PM. Became the platform's top revenue channel: \$1.5M+ generated, \$500K ARR. Founder work inside a company.
- Replaced \$337K in annual vendor translation costs with an LLM pipeline I shipped in 6 weeks. 12K+ assets translated, product team iterates without external gatekeepers. Zero-to-production motion is a habit.
- Co-owned GTM launches with Product and Sales (Seasonal Templates, Re-ignite Revenue, Sentiment Analysis, GenAI Demo System). Each shipped with instrumentation so we knew within a week if it moved the needle. Multi-hat by default: product, sales, engineering.
- Hired and grew the AI engineering cohort as acting hiring manager. Recruited for craft and curiosity, mentored engineers who now lead features independently. Built the team as I built the product.

Tenity · Startup Mentor & Technology Evaluation Panelist 06/2024 - Present

AI Strategy Startup Evaluation Technical Mentoring Venture Building

- Evaluated 20+ startups on architecture, scalability, and AI readiness to inform seed-to-VC investment decisions. Same lens I use to size venture opportunities.
- Mentored Opt Alpha on scaling high-frequency algorithmic trading systems, and advised multiple portfolio companies on AI strategy, technical hiring, and building engineering cultures that ship.

Dronistics · Founding Engineer 08/2018 - 03/2020

Vue Java PostgreSQL AWS Docker Zero-to-One Product Enterprise Partnerships

- Founding engineer for an EPFL spin-off. Shipped the full autonomous drone delivery platform (Vue/Java/PostgreSQL) that powered 500+ real-world last-mile deliveries.
- Built cloud infrastructure and DevOps pipeline from scratch. Enterprise reliability that enabled a Unilever partnership and a CES Las Vegas showcase.

Anand Creations - Forward Deployed Engineering Practice · <https://anand-creations.com>06/2024 - Present

Founder & Principal

My independent practice and the home for the AI products I design, build, and run myself (SwissNRI, Proplab, PulseView). Same playbook I would bring to a Base360 venture: pick the wedge, ship the MVP fast, wire in evals and telemetry, learn from real users, and compound.

PulseView - Explainable AI Market Intelligence (B2C) · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & Builder

Real-time market intelligence for retail traders. AI agents generate AND justify trading signals from technical and news data. Built for my own portfolio first, then opened to live users. Core product principle: if the model can't explain the signal, it doesn't ship.

SwissNRI - AI Cross-border Fintech (B2C) · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

AI-native cross-border tax and compliance platform for Swiss-Indian families. RAG-grounded assistant answers DTAA, FEMA and Swiss tax questions with citations back to the regulation. Zero-to-MVP in 3 months, 40% uplift in user satisfaction from feedback-driven iteration.
