Forward deployed engineer who owns problems end-to-end, from a customer conversation to the code that solves it. Lead AI Engineer at LumApps shipping Python + GCP + Kubernetes systems that 2x outbound conversions; on the side I run Anand Creations, a forward deployed engineering practice built on exactly this: embed with a team, run technical discovery, build the integrations and data flows that make the product usable. Deep across Python, SQL (PostgreSQL, ClickHouse), REST/webhook/OAuth integrations, and modern AI (Claude, GCP Vertex). Comfortable explaining technical work directly to executives and end users.
