\$1.5M+

Revenue Shipped

\$337K

Costs Eliminated

10M+

Users Served

3

Companies Founded

Senior engineer building at the intersection of AI and CI/CD in production. At Beekeeper I shipped an LLM pipeline on GitHub Actions in 6 weeks that replaced a \$337K annual vendor and now translates 12K+ assets. At LumApps I run production multi-agent systems on GCP with tools exposed over MCP, evals, and cost telemetry. 13+ years shipping to 10M+ users on Docker, Kubernetes, and modern CI/CD (Jenkins, GitHub Actions). Comfortable owning features end to end, working directly with Product, and picking up new stacks quickly (Go included).

WORK EXPERIENCE

LumApps · Lead AI Engineer [▶ Watch demo](#) 03/2026 - Present

Python TypeScript GCP Multi-Agent Systems MCP Agent Skills LangGraph Google ADK RAG Evaluation Pipelines Observability Cost Instrumentation Docker CI/CD

- Built production multi-agent workflows (Python, LangGraph, Google ADK on GCP Vertex AI) with tools exposed over MCP and state streamed to the UI. Directly parallel to the agent skills / agentic foundation Chainguard is extending into customer-facing products.
- Own the AI platform end to end: architecture, eval pipelines, LangSmith tracing across model, orchestration, and infra layers, cost-per-request telemetry, and on-call. Same discipline the AI x CI/CD role needs to ship reliably.
- Report directly to C-level on outcomes. 2x open rates, 2x approved opportunities, \$1M forecast in quarterly revenue on the outbound product built on this platform.

Beekeeper AG · Senior Software Engineer (Technical Lead) 03/2020 - 02/2026

Docker Kubernetes AWS EKS GitHub Actions Jenkins CI/CD Java Python TypeScript PostgreSQL Elastic Search Kafka OpenAI LangChain Langfuse Grafana Datadog Incident Triage On-Call

- Shipped an LLM pipeline on GitHub Actions + OpenAI APIs in 6 weeks that replaced a \$337K annual vendor. 12K+ assets translated on every merge; hardened workflow that product engineers extend without breaking.
- Ran production on Docker + Kubernetes (AWS EKS) for 10M+ users. Owned Jenkins → GitHub Actions migration, containerized services, and the CI/CD pipeline for critical release paths. Enforced comprehensive unit, integration, and E2E test coverage.
- Architected Employee Referral System end to end (Java, PostgreSQL, Elastic Search on Kubernetes). Became the platform's top revenue channel: \$1.5M+ revenue, \$500K ARR at 99.99% SLA.
- Ran observability and global on-call (Grafana, Datadog, Logz.io, Langfuse for LLM traces). Diagnosed and triaged incidents across container, service, and infra layers.

Dronistics · Founding Engineer 08/2018 - 03/2020

Docker AWS Terraform Infrastructure as Code CI/CD Java Vue PostgreSQL Zero-to-One Product

- Founding engineer for an EPFL spin-off. Shipped the full autonomous drone delivery platform (Vue/Java/PostgreSQL, containerized on Docker) that powered 500+ real-world deliveries.
- Built AWS infrastructure and CI/CD pipeline from scratch (Docker, Terraform for IaC). Enterprise-grade reliability that enabled a Unilever partnership and a CES showcase.

Anand Creations - Forward Deployed AI Practice · <https://anand-creations.com>06/2024 - Present

Founder & Principal

My independent AI practice and the home for AI products I ship myself (PulseView, Proplab, SwissNRI). Every backend, container image, CI pipeline, and observability layer shipped solo. Same rigor I bring to team production work.

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & Builder

Real-time market intelligence for retail traders. TypeScript across the stack, containerized services, event-driven ingest from live technical and news feeds. Explainability built into the eval loop: if the model can't justify the signal, it doesn't ship.

Proplab - AI for Real Estate · <https://proplab.io>09/2025 - Present

Founder & AI Product Builder

AI-native MVP for property inspections. Vision pipeline extracts structured signals from photos; LLM agents turn records into multilingual, marketing-ready listings end to end. Shipped on containerized services with modern CI/CD.
