Companies Founded

Platform engineer with 13+ years shipping distributed systems, backend services, and data platforms for research, analytics, and production at scale. At LumApps, built event-driven data infrastructure (Pub/Sub ingest, a temporal knowledge graph) that unifies 5+ data silos into one self-service memory layer with a query and write-back contract every consuming system uses. Earlier built large-scale parallel simulation infrastructure on AWS for genetic-algorithm research at EPFL, and shipped high-throughput data pipelines and a distributed templating platform serving 10M+ users at Beekeeper. Python, Java, C++, Kafka, Kubernetes, AWS and GCP: performance, reliability, and researcher productivity at scale are the metrics I optimize for.

WORK EXPERIENCE

LumApps · Lead Software Engineer

03/2026 - Present

Python · GCP · Pub/Sub · FastAPI · Neo4j · Vertex AI · TypeScript · LangChain · LangGraph · Google ADK · MCP · AG-UI · Multi-Agent Systems · ReAct · RAG · Vector Databases · Evaluation Pipelines · LangSmith · Observability · On-Call · Graphiti

- Designed AI Brain, a temporal knowledge graph on Graphiti and Neo4j that unifies 5+ silos (Salesforce, HubSpot, Pendo, conversation transcripts, product usage) into one time-aware memory with a self-service query and write-back contract every agent reads and writes. Event-driven ingest over Pub/Sub and a freshness layer that flags stale facts ground retrieval and cut hallucinations.
- Built and deployed a production multi-agent platform on Python, LangGraph and Google ADK over GCP Vertex AI, with tools exposed as backend services over MCP servers and agent state streamed to the UI over AG-UI. Applied to outbound sales: 2x open rates, 2x approved opportunities, 2 to 3 hours saved per rep per day. Forecast: \$4M in approved opportunities per quarter; at 25% conversion, \$1M in quarterly revenue.
- Owned reliability and performance for production systems end to end: technical discovery, eval pipelines, agent tracing (LangSmith), tool-selection tuning, cost-per-request instrumentation, and on-call for global systems. Reports directly to C-level on outcomes, not progress.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

Kubernetes · Kafka · PostgreSQL · Elastic Search · AWS · Java · Python · ClickHouse · Observability · Grafana · Datadog · Logz.io · On-Call · OpenAI · LangChain · Claude · Langfuse · CrewAI · TypeScript · Vue · Jenkins · GitHub Actions

- Designed and shipped a distributed templating engine, a backend service with APIs powering 15% of all platform assets for 10M+ users. Cut customer setup time 90%: customers go from zero to live in minutes, not days.
- Led Search Platform revamp across 3 teams. Redesigned indexing and ranking to surface what users mean to find, not just what they typed. Measurable lift in user engagement.
- Ran observability and on-call for global production systems (Grafana, Datadog, Logz.io): logs, metrics, dashboards, and alerting.

Dronistics · Founding Engineer

08/2018 - 03/2020

Vue · Java · PostgreSQL · AWS · Docker · Terraform · Infrastructure as Code · CI/CD · Real-time Systems · Flight Control APIs

- Engineered real-time flight control APIs and logistics optimization algorithms. 40% faster deliveries, 99.5% safety record, zero incidents.
- Built cloud infrastructure and DevOps pipeline from scratch. Enterprise-grade reliability that enabled partnerships with Unilever and a CES showcase.

EPFL, Laboratory of Intelligent Systems (Robogen) · Research Engineer

08/2016 - 07/2018

C++ · Python · AWS · Genetic Algorithms · Neural Networks · Evolutionary AI · Robotics · Webots

- Migrated the simulation pipeline to AWS for large-scale parallel evolution runs impractical on local hardware. Secured AWS Cloud Credits for Research, work featured on the AWS Public Sector Blog.
- Engineered Robogen, an open-source platform for co-evolution of robot bodies and brains via genetic algorithms. Rare research direction where morphology and neural control evolve together through artificial selection.

Anand Creations - Forward Deployed Engineering Practice · <https://anand-creations.com>06/2024 - Present

Founder & Principal Forward Deployed Engineer

Independent forward deployed engineering practice, currently the home for the AI products I design, build, and run on my own (SwissNRI, Proplab, PulseView). Open to forward-deployed client engagements: embedding with a team, running technical discovery, and shipping production agentic AI end to end. Take my own products from zero to production: multi-agent systems, RAG grounding, eval pipelines, and observability, the same playbook I bring to any engagement.

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & Builder

Real-time market intelligence built for my own trading portfolio first, then opened to retail traders. AI agents generate AND justify trading signals from technical and news data, with explainability and evaluation built in: if the model can't explain the signal, it doesn't ship. Now serving live users on real-time feeds.

Proplab - AI for Real Estate · <https://proplab.io>09/2025 - Present

Founder & AI Product Builder

Property inspections run on paper, clipboards, and WhatsApp photos. Built an AI-native MVP: a vision pipeline extracts structured signals (room type, condition, defects) from inspection photos, replacing paper-based reports with queryable, AI-readable data; LLM agents then turn those records into marketing-ready listings.

SwissNRI - AI Cross-border Fintech · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

AI-native cross-border tax and compliance platform for Swiss-Indian families, replacing spreadsheets and expensive advisors. RAG-grounded assistant answers DTAA, FEMA and Swiss tax questions in plain language with citations back to the regulation; compliance-first agentic design flags risk before users file, with regulatory guardrails built before features. Zero-to-MVP in 3 months, 40% uplift in satisfaction.

EDUCATION

Quantic School of Business and Technology <i>MBA Business Administration</i>	2019 - 2020
EIT Digital <i>Master (Programme) Innovation & Entrepreneurship</i>	2014 - 2016
Eindhoven University of Technology (TU/e) <i>MSc (Netherlands) Embedded Networking</i>	2015 - 2016
KTH Royal Institute of Technology <i>MSc (Sweden) Embedded Systems</i>	2014 - 2015
Amrita Vishwa Vidyapeetham <i>Bachelor of Engineering Electronics and Communication</i>	2010 - 2014

CERTIFICATES

Building Modern Java Applications AWS
Build LLM Apps with LangChain DeepLearning.AI
Knowledge Graphs for RAG Neo4j
AI Agents in LangGraph LangChain & Tavily
Microsoft Certified Professional (MCPS) Microsoft
MongoDB for Java Developers MongoDB University

AWARDS

Appreciation from John T. Chambers (ex-CEO, Cisco Systems) Cisco Systems Recognized for contributions to strategic projects within Cisco's ecosystem
AWS Cloud Credits for Research Amazon Web Services (2020)
TI India Analog Design Contest Winner Texas Instruments
KTH Opportunities Fund KTH Royal Institute of Technology
