

\$1.5M+	\$337K	10M+	3
Revenue Shipped	Costs Eliminated	Users Served	Companies Founded

Product-minded engineer who ships end-to-end (schema to UI to production) and treats AI as the leverage layer, not the feature. 13+ years of full-stack building including founding-engineer roles (Dronistics EPFL spin-off, SwissNRI regulated fintech) and 6 years at Beekeeper serving 10M+ users. Currently Lead AI Engineer at LumApps on GCP: event-driven ingest over Pub/Sub, LangGraph workflow orchestration, React/TypeScript UIs streamed over AG-UI, and an AI leverage discipline (evals, tracing, cost telemetry) that lets a small team move like a big one. Remote-first from Zurich, comfortable travelling to London on a hybrid cadence. I want to help close the advice gap at Clove because financial advice, done well, is exactly the kind of high-trust product I love building.

WORK EXPERIENCE

LumApps · Lead AI Engineer

▶ Watch demo

03/2026 - Present

TypeScriptReactPythonGCPEvent-DrivenPub/SubWorkflow OrchestrationLangGraphMCPAPI DesignAG-UI

Product EngineeringAI Force Multiplier

- Ship end-to-end on a Python/TypeScript stack over GCP: API design, workflow orchestration (LangGraph, Google ADK), event-driven ingest over Pub/Sub, and React UIs streamed from agent state via AG-UI. Own features from schema to polished UI, no PM handoff.
- Set how we build with AI: evals, tracing (LangSmith), tool-selection tuning, cost-per-request telemetry and MCP tool servers. The guardrails that let a small team ship like a big one, exactly the pattern-setting the JD calls out.
- 2x open rates, 2x approved opportunities, 2 to 3 hours saved per rep per day. Forecast \$4M/quarter in approved opportunities. Report directly to C-level on outcomes.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

Full-StackTypeScriptVueJavaPythonKafkaEvent-DrivenPostgreSQLElastic SearchAWSKubernetesOpenAI

LangChainAnalyticsProduct Engineering

- Owned features from schema to polished UI across a full-stack Vue/TypeScript/Java monolith on Kubernetes (event streams over Kafka). 10M+ frontline users, 99.99% SLA on the Employee Referral System (\$1.5M+ revenue, \$500K ARR).
- Replaced \$337K in annual vendor cost with an in-house LLM pipeline shipped in 6 weeks. Prototype, measure, ship, iterate: the exact loop the JD describes.
- Built AI Onboarding Specialist and GenAI demo generator: consumer-facing flows that used AI to make each user feel personally guided. Product-taste-driven, instrumented from day one.
- Co-owned GTM launches with Product and Sales; every feature shipped with analytics baked in so we knew within a week whether it moved the needle. Mentored the AI cohort; set patterns others build on.

Dronistics · Founding Engineer

08/2018 - 03/2020

0 to 1Founding EngineerFull-StackVueJavaPostgreSQLAWSAPI DesignReal-Time SystemsDockerCI/CD

- Founding engineer at an EPFL spin-off. Took the product from a blank page to a live commercial platform (Vue/Java/PostgreSQL on AWS) that ran 500+ real-world deliveries. Set the patterns, wrote the first tests, drew the first architecture.
- Enterprise-grade reliability that customers and partners could trust (Unilever partnership, CES showcase). High-trust product taste applied end-to-end, from flight-control APIs to the operator UI.

SwissNRI - 0 to 1 AI-native Financial Advice Platform · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

Direct parallel to Clove's mission. Closing the advice gap for Swiss-Indian families locked out of affordable cross-border tax and financial guidance. Full product from blank page: React/TS onboarding, GCP backend, RAG-grounded adviser assistant answering DTAA, FEMA and Swiss tax with citations back to the regulation, and compliance-first agentic design that flags risk before users act. High-trust and regulated by design. Zero-to-MVP in 3 months, 40% uplift in user satisfaction from feedback-driven iteration.

Anand Creations - AI-Native Building Practice · <https://anand-creations.com>06/2024 - Present

Founder & Principal Forward Deployed Engineer

Where I set the personal patterns for how to build with AI: prototype in a day, ship in a week, measure in production. Independent forward-deployed practice and the home for the AI products I run myself. Full-stack ownership, opinionated tooling (Claude Code, MCP servers, evals-as-tests, cost telemetry) and a hard rule that the human experience beats the technical demo.

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & Builder

Real-time market intelligence for retail investors. Agents ingest technical and news data, form a hypothesis and generate AND justify a signal with cited evidence: if the model cannot explain the signal, it does not ship. Explainability, evaluation and back-testing baked into a polished consumer UI. Built for my own portfolio first, then opened up. Small-team, 0 to 1, product-taste-driven.

EDUCATION

Quantic School of Business and Technology	2019 - 2020
<i>MBA Business Administration</i>	
EIT Digital	2014 - 2016
<i>Master (Programme) Innovation & Entrepreneurship</i>	
Eindhoven University of Technology (TU/e)	2015 - 2016
<i>MSc (Netherlands) Embedded Networking</i>	
KTH Royal Institute of Technology	2014 - 2015
<i>MSc (Sweden) Embedded Systems</i>	
Amrita Vishwa Vidyapeetham	2010 - 2014
<i>Bachelor of Engineering Electronics and Communication</i>
