

Anand Bhaskaran

AI Founder / Builder of Production AI Products / 3x Founder / MBA / Ships Revenue, Not Slides

📍 Zurich, Switzerland · ✉ anandbaskaran3193@gmail.com · 📞 +41763043193 · in anandb3 · 🌐 anandbhaskaran · 🏠 anand-creations.com

\$1.5M+

Revenue Shipped

\$337K

Costs Eliminated

10M+

Users Served

3

Companies Founded

Founder-operator with 13+ years turning AI ideas into products that ship revenue. 3 companies founded on the side (SwissNRI AI fintech, Proplab AI-for-real-estate, PulseView explainable trading AI), all built and shipped under my Anand Creations practice while running Lead AI Engineer at LumApps (2x outbound conversions, \$1M forecast quarterly). At Beekeeper, built the platform's top revenue channel (\$1.5M+ generated, \$500K ARR) and replaced \$337K/year in vendor costs with a 6-week LLM pipeline. MBA-trained (Quantic, 93.2%), speaker at Dev Innovation Summit and Front Conference, ready to go all-in on a €1B+ AI company.

WORK EXPERIENCE

LumApps · Lead AI Engineer

▶ Watch demo

03/2026 - Present

0 to 1 Product Building GCP Vertex AI Python LangChain LangGraph Google ADK MCP AG-UI RAG Multi-Agent Systems Neo4j Graphiti LangSmith Executive Reporting

- Built and shipped production multi-agent workflows for outbound sales, 0 to 1 inside a scaling SaaS. 2x open rates, 2x approved opportunities, 2 to 3 hours saved per rep per day. Forecast \$4M/quarter in opportunities, \$1M/quarter in revenue.
- Designed AI Brain, a temporal knowledge graph on Graphiti and Neo4j that unifies 5+ data silos into one time-aware memory every agent reads and writes. Same architecture I would run in a startup where trust in data is the moat.
- Report directly to C-level on outcomes, not progress. Own agent architecture, eval pipelines, cost telemetry, and on-call for global production systems.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

Revenue Generation GTM Team Building Hiring Python Java TypeScript Vue OpenAI LangChain CrewAI Strands Agents AWS Kubernetes PostgreSQL ClickHouse Elastic Search Kafka Salesforce

- Architected Employee Referral System end-to-end as Tech Lead of Incubation, reporting to CIO. Became the platform's top revenue channel: \$1.5M+ generated, \$500K ARR. Built the team, ran the GTM with Sales and PM.
- Replaced \$337K in annual vendor translation costs with an in-house LLM pipeline shipped in 6 weeks. Founder-mode execution inside a scale-up: identified the spend, built the alternative, killed the contract.
- Built AI Onboarding Specialist and GenAI demo system for Sales. Every new signup guided at scale; every pitch personalized from Salesforce data. Both shipped with instrumentation so we knew if they moved the needle.
- Hired and mentored the AI engineering cohort. Grew engineers who now lead features independently. Co-owned GTM launches across Product and Sales (Seasonal Templates, Re-ignite Revenue, Sentiment Analysis).

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

Startup Advisory VC Diligence AI Strategy Founder Mentoring Investor Relations

- Evaluated 20+ startups on architecture, scalability, and AI readiness to inform seed-to-VC investment decisions. Sit on the technology evaluation panel.
- Mentored Opt Alpha on scaling high-frequency algorithmic trading; advised portfolio founders on hiring, AI strategy, and building companies that actually ship.

Dronistics · Founding Engineer

08/2018 - 03/2020

Founding Engineer 0 to 1 Enterprise Sales Vue Java PostgreSQL AWS Docker CI/CD Real-time Systems

- Founding engineer for autonomous drone delivery (EPFL spin-off). Shipped end-to-end platform (Vue, Java, PostgreSQL, AWS) that powered 500+ real-world deliveries. Enterprise-grade from day one, closed Unilever partnership and CES Las Vegas showcase.
- Engineered flight control APIs and logistics optimization: 40% faster deliveries, 99.5% safety record, zero incidents. Built CI/CD and cloud infra from scratch.

Anand Creations - Forward Deployed Engineering Practice · <https://anand-creations.com>06/2024 - Present

Founder & Principal Forward Deployed Engineer

Independent forward deployed engineering practice and umbrella for the AI products I design, build, and run on my own (SwissNRI, Proplab, PulseView). Personal proof that I can go zero-to-shipped without waiting for permission or a paycheck.

SwissNRI - AI Cross-border Fintech · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

AI-native cross-border tax platform for Swiss-Indian families, replacing spreadsheets and expensive advisors. RAG-grounded assistant answers DTAA, FEMA and Swiss tax questions with citations back to the regulation. Zero-to-MVP in 3 months, 40% uplift in user satisfaction from feedback-driven iteration.

Proplab - AI for Real Estate · <https://proplab.io>09/2025 - Present

Founder & AI Product Builder

AI-native platform for small real estate teams. Vision pipeline extracts structured signals (room type, condition, defects) from inspection photos; LLM agents turn those records into multilingual, marketing-ready listings end-to-end. One workflow from photo capture to published listing, zero copy-paste.

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & Builder

Real-time market intelligence built for my own trading portfolio first, then opened to retail traders. AI agents generate AND justify trading signals with explainability built in: if the model can't explain the signal, it doesn't ship.
