10M+

Users Served

3

Companies Founded

Technical co-founder profile: builds applied AI products end-to-end, from problem discovery to production traffic. Lead AI Engineer at LumApps shipping multi-agent systems on GCP (2x outbound conversions, \$1M forecast quarterly). 3 AI companies founded on the side (SwissNRI fintech, Proplab real-estate vision AI, PulseView explainable trading AI), all live and shipping. 13+ years across product, architecture, hiring, and GTM; MBA-trained (Quantic, 93.2%); ready to be the CPTO who turns an outlier idea into a €1B applied-AI company.

WORK EXPERIENCE

LumApps · Lead Applied AI Engineer [▶ Watch demo](#) 03/2026 - Present

Applied AI 0 to 1 Product + Tech Ownership GCP Vertex AI Python LangChain LangGraph Google ADK MCP AG-UI RAG Multi-Agent Systems Neo4j Graphiti LangSmith Evaluation Pipelines

- Own product and tech end-to-end for a 0 to 1 AI product: multi-agent workflows (Python, LangGraph, Google ADK on GCP Vertex AI) exposed to reps via MCP servers with agent state streamed over AG-UI. 2x open rates, 2x approved opportunities, \$1M/quarter forecast revenue.
- Designed AI Brain, a temporal knowledge graph on Graphiti and Neo4j that unifies 5+ silos (Salesforce, HubSpot, Pendo, transcripts, product usage) into one time-aware memory every agent reads and writes. The moat for any applied-AI company: trust in data.
- Report directly to C-level on outcomes. Own architecture, eval pipelines (LangSmith), cost telemetry, tool-selection tuning, on-call. Product-tech leadership without a middle layer.

Beekeeper AG · Senior Software Engineer (Technical Lead) 03/2020 - 02/2026

Product Ownership Applied AI Team Building Hiring Python Java TypeScript Vue OpenAI LangChain CrewAI Strands Agents AWS Kubernetes PostgreSQL ClickHouse Elastic Search Kafka Salesforce Grafana

- Architected Employee Referral System end-to-end as Tech Lead of Incubation, reporting to CIO. Became the platform's top revenue channel (\$1.5M+ generated, \$500K ARR). Built the team, owned the product, ran GTM with Sales and PM.
- Replaced \$337K in annual vendor translation costs with an in-house LLM pipeline shipped in 6 weeks. Product Owner mindset: identified the spend, framed the solution, shipped, killed the contract.
- Product Owner of Beekeeper Template Engine: cut customer setup 90%, now powers 15% of assets created on the platform (10M+ users). Owned the technical investigations, epic definition, and vision-setting.
- Built AI Onboarding Specialist and GenAI demo system for Sales; ran observability and on-call for global production; hired and mentored the AI engineering cohort.

Tenity · Startup Mentor & Technology Evaluation Panelist 06/2024 - Present

Founder Mentoring VC Diligence AI Strategy Startup Evaluation Product Strategy

- Evaluated 20+ startups on architecture, scalability, and AI readiness for seed-to-VC investment decisions. Sit on the technology evaluation panel.
- Mentored Opt Alpha on scaling high-frequency algorithmic trading; advised founders on hiring, AI strategy, and building companies that actually ship.

Dronistics · Founding Engineer 08/2018 - 03/2020

Founding Engineer 0 to 1 Enterprise Partnerships Vue Java PostgreSQL AWS Docker CI/CD Real-time Systems

- Founding engineer for EPFL spin-off autonomous drone delivery. Shipped end-to-end platform (Vue, Java, PostgreSQL, AWS) powering 500+ real-world deliveries. Closed Unilever partnership and CES Las Vegas showcase.
- Engineered flight control APIs and logistics optimization: 40% faster deliveries, 99.5% safety record. Built CI/CD and cloud infra from scratch.

Anand Creations - Forward Deployed Engineering Practice

Founder & Principal Forward Deployed Engineer

Independent forward deployed engineering practice and umbrella for the applied-AI products I design, build, and run on my own (SwissNRI, Proplab, PulseView). Proof of CPTO-mode execution: zero-to-shipped without waiting for permission or a paycheck.

SwissNRI - AI Cross-border Fintech

Co-Founder & Technical Lead

AI-native cross-border tax platform for Swiss-Indian families. RAG-grounded assistant answers DTAA, FEMA and Swiss tax questions with citations back to the regulation; compliance-first agentic design flags risk before users file. Zero-to-MVP in 3 months, 40% uplift in satisfaction.

Proplab - AI for Real Estate

Founder & AI Product Builder

Applied-AI platform for small real estate teams. Vision pipeline extracts structured signals (room type, condition, defects) from inspection photos; LLM agents turn those records into multilingual, marketing-ready listings end-to-end.

PulseView - AI Market Intelligence

Founder & Builder

Real-time market intelligence platform for retail traders. AI agents generate AND justify trading signals with explainability built in: if the model can't explain the signal, it doesn't ship.
