Unusual profile for an Integrated Marketer role: I built the AI outbound system marketing teams use. At LumApps I own the production multi-agent outbound stack (2x open rates, 2x approved opportunities, \$1M forecast quarterly), including personalized sequences, ABM-shaped targeting, and instrumentation that tells us within a week if a channel is working. At Beekeeper I co-owned GTM launches with Sales and PM (Seasonal Templates, Re-ignite Revenue, Sentiment Analysis, Employee Lifecycle) and ran demo systems that generated personalized content per account. MBA (93.2%), 4 international conference talks, and 3 AI products founded on the side. Bias to ship, translate positioning into copy, and measure what actually moved pipeline.

AI-Powered Outbound Pipeline Generation ABM Salesforce HubSpot Campaign Analytics Personalization at Scale
Cross-Functional GTM Instrumentation Python TypeScript

- Built and shipped the production AI outbound system SDRs use every day. Personalized sequences, ABM-shaped targeting from Salesforce/HubSpot, and channel instrumentation. Result: 2x open rates, 2x approved opportunities, 2 to 3 hours saved per rep per day, \$1M forecast in quarterly revenue.
- Own campaign analytics end to end: cost-per-request, conversion funnels, tracing, and per-vertical breakdowns. Kill what does not work; scale what does.
- Cross-functional with Sales, Product, and RevOps. Report directly to C-level on pipeline outcomes, not activity.

GTM Launches Campaign Instrumentation Enterprise Buyers Personalization Localization (70+ languages ready)
Sales & Product Partnership Revenue Ownership Content Automation

- Co-owned cross-functional GTM launches with Sales and PM: Seasonal Templates, Re-ignite Revenue, Sentiment Analysis, Employee Lifecycle. Every launch shipped with instrumentation so we knew within a week if it moved pipeline.
- Architected Employee Referral System end to end and ran its GTM. Became the platform's top revenue channel: \$1.5M+ generated, \$500K ARR. Direct engagement with enterprise buyers from discovery through post-launch.
- Built GenAI demo generator that auto-produced personalized, on-brand content per account from Salesforce data. Improved demo speed and close rates; the same personalization playbook translated into email and ad creative.
- Replaced \$337K/yr in vendor translation costs with an in-house LLM pipeline. Unlocked localized content and campaigns in new languages without a gatekeeper. Bias to ship.
