

Anand Bhaskaran

Founding Product Engineer · Full-Stack AI Products, Shipped and Operated · Founder · Private Market Investor

📍 Zurich, Switzerland · ✉ anandbaskaran3193@gmail.com · 📞 +41763043193 · in anandb3 · 🌐 anandbhaskaran · 🏠 anand-creations.com

\$1.5M+	\$337K	10M+	3
Revenue Shipped	Costs Eliminated	Users Served	Companies Founded

Founding engineer who ships and runs full-stack AI products end to end: UI, backend, LLM workflows, data, deployment and on-call. Founding AI Engineer (GTM) at LumApps, where I took multi-agent workflows from discovery to production on GCP with eval pipelines, tracing and cost-per-request instrumentation: 2x approved opportunities, \$1M forecast quarterly revenue. Founding engineer at Dronistics (500+ real deliveries on a Vue/Java/PostgreSQL stack built from scratch) and solo builder of SwissNRI and Proplab, document-heavy AI products taken zero-to-MVP in 3 months. Private market investor for 7+ years (SpaceX, Anthropic, OpenAI, Polymarket), so valuations, secondaries and scenario thinking are lived experience, not a domain I need explained.

WORK EXPERIENCE

LumApps · Founding AI Engineer, GTM [▶ Watch demo](#) 03/2026 - Present

PythonTypeScriptFastAPIGCPVertex AILangGraphGoogle ADKLangChainMCPAG-UIRAGEvaluation PipelinesLangSmithObservabilityOn-CallPub/SubNeo4jGraphitiSalesforce

- Built and deployed production multi-agent workflows for outbound sales on Python, LangGraph and Google ADK over GCP Vertex AI: ReAct, self-reflection and hierarchical delegation, tools exposed over MCP servers, agent state streamed to the UI over AG-UI so users see loading, progress and failures. 2x open rates, 2x approved opportunities, 2 to 3 hours saved per rep per day. Forecast: \$1M in quarterly revenue.
- Owned the product from technical discovery to production as the primary hands-on engineer: agent architecture, structured outputs, eval pipelines, agent tracing (LangSmith), tool-selection tuning, cost-per-request instrumentation, deployment and on-call. Report to C-level on outcomes, not progress.
- Designed AI Brain, a temporal knowledge graph on Graphiti and Neo4j unifying 5+ silos (Salesforce, HubSpot, Pendo, transcripts, product usage) into one time-aware memory. Event-driven ingest over Pub/Sub and a freshness layer that flags stale facts, so wrong outputs can be traced to their source and corrected.

Beekeeper AG · Senior Software Engineer (Technical Lead) 03/2020 - 02/2026

JavaVueTypeScriptPythonPostgreSQLOpenAIClaudeLangChainLangfuseKubernetesAWSGitHub ActionsJenkinsKafkaElastic SearchClickHouseGrafanaDatadogLogz.ioOn-Call

- Architected and shipped Employee Referral System end to end (Java, Vue, PostgreSQL, Elastic Search) as Tech Lead reporting to the CIO, then ran it in production at 99.99% SLA. Became the platform's top revenue channel: \$1.5M+ generated, \$500K ARR.
- Replaced \$337K in annual vendor translation costs with an LLM pipeline (GitHub Actions + OpenAI) built in 6 weeks, with validation checks on every output. 12K+ assets translated; product team iterates without external gatekeepers.
- Ran observability and on-call for global production systems (Grafana, Datadog, Logz.io): logs, metrics, dashboards, alerting and recovery when things broke.
- Product Owner and architect of the distributed templating engine: cut customer setup time 90%, powers 15% of all platform assets for 10M+ users. Also owned architecture for Artifacts, Forms and Manager Hub.

Tenity · Startup Mentor & Technology Evaluation Panelist 06/2024 - Present

AI StrategyStartup EvaluationTechnical Due DiligenceTechnical MentoringScalability

- Evaluated 20+ startups on technical architecture, scalability and AI readiness to inform seed-to-VC investment decisions.
- Advised portfolio companies on technical hiring, AI strategy and engineering cultures that ship; mentored Opt Alpha on scaling algorithmic trading systems in production.

Dronistics · Founding Engineer 08/2018 - 03/2020

VueJavaPostgreSQLAWSDockerTerraformCI/CDReal-time SystemsLogistics Optimization

- Shipped the autonomous drone delivery platform end to end (Vue, Java, PostgreSQL): UI, APIs, logistics optimization and flight control. 500+ real-world deliveries, 40% faster, 99.5% safety record.
- Built cloud infrastructure and CI/CD pipeline on AWS from scratch. Reliability that enabled partnerships with Unilever and a CES showcase.

C++PythonAWSGenetic AlgorithmsNeural NetworksRoboticsWebots

- Engineered Robogen, an open-source platform for co-evolution of robot bodies and brains via genetic algorithms.
- Migrated the simulation pipeline to AWS for large-scale parallel evolution runs. Secured AWS Cloud Credits for Research; featured on the AWS Public Sector Blog.
- Teaching Assistant for Evolutionary Robotics; supervised 20+ master's students through hands-on projects.

ENTREPRENEURIAL PROJECTS

Anand Creations - Forward Deployed Engineering Practice · https://anand-creations.com06/2024 - Present

Founder & Principal Forward Deployed Engineer

Independent practice and the home for AI products I design, build, deploy and run alone (SwissNRI, Proplab): full-stack apps with LLM workflows, RAG grounding, eval pipelines, observability and cost control sized to a bootstrapped budget. Built with AI coding tools, reviewed and owned line by line.

SwissNRI - AI Cross-border Fintech · https://www.swissnri.com01/2024 - Present

Co-Founder & Technical Lead

AI-native cross-border tax and compliance platform for Swiss-Indian families. Document-grounded RAG assistant answers DTAA, FEMA and Swiss tax questions with citations back to the regulation; agents flag risk before users file, with guardrails built before features. Zero-to-MVP in 3 months, 40% uplift in satisfaction, running in production.

Proplab - AI for Real Estate · https://proplab.io09/2025 - Present

Founder & AI Product Builder

Document and image processing product for property teams: vision pipeline extracts structured signals (room type, condition, defects) from inspection photos into queryable records; LLM agents turn them into multilingual listings. One workflow from photo to published listing, full stack owned solo.

EDUCATION

Quantic School of Business and Technology2019 - 2020

MBA Business Administration

EIT Digital2014 - 2016

Master (Programme) Innovation & Entrepreneurship

Eindhoven University of Technology (TU/e)2015 - 2016

MSc (Netherlands) Embedded Networking

KTH Royal Institute of Technology2014 - 2015

MSc (Sweden) Embedded Systems

Amrita Vishwa Vidyapeetham2010 - 2014

Bachelor of Engineering Electronics and Communication

CERTIFICATES

Building Modern Java ApplicationsAWS

Build LLM Apps with LangChainDeepLearning.AI

Knowledge Graphs for RAGNeo4j

AI Agents in LangGraphLangChain & Tavily

Microsoft Certified Professional (MCPS)Microsoft

MongoDB for Java DevelopersMongoDB University

AWARDS

Appreciation from John T. Chambers (ex-CEO, Cisco Systems)Cisco SystemsRecognized for contributions to strategic projects within Cisco's ecosystem

AWS Cloud Credits for ResearchAmazon Web Services (2020)
