3	\$1.5M+	10M+	4
AI Products Founded	Enterprise Revenue	Users Served	Conference Talks

Forward Deployed Engineer by practice, not just by title. Runs Anand Creations as an independent Forward Deployed Engineering practice; embeds with teams to diagnose adoption blockers, contribute production code, and turn field learning into durable patterns. Lead AI Engineer at LumApps driving governed, measurable adoption of a production agentic system (2x conversions, \$1M forecast quarterly) with evals, tracing, context management, and human-in-the-loop guardrails. 13+ years shipping enterprise-grade systems for Fortune-500 customers (\$1.5M+ revenue at Beekeeper, Unilever partnership at Dronistics). 4 international conference talks and published writing on production agentic AI, memory, and reliability, the shape of thought leadership this role expects.

WORK EXPERIENCE

LumApps · Lead AI Engineer (Agentic SDLC) [▶ Watch demo](#) 03/2026 - Present

Python TypeScript LangGraph Google ADK MCP AG-UI Vertex AI OpenAI Anthropic Agentic SDLC AI Governance
Model Evaluation Context Management Prompt Design RAG Neo4j Observability On-Call

- Drive governed, measurable adoption of a production agentic system across the org. Multi-agent workflows on Python, LangGraph, Google ADK, MCP, and AG-UI. Human-in-the-loop guardrails and verification loops for AI safety. 2x open rates, 2x approved opportunities, \$1M forecast quarterly.
- Designed AI Brain, a temporal knowledge graph on Graphiti/Neo4j that unifies 5+ silos (Salesforce, HubSpot, Pendo, product usage) into one time-aware store. Context management and grounding that keeps agents auditable and stops hallucination.
- Own the reliability layer: eval pipelines, LangSmith tracing, tool-selection tuning, cost-per-request instrumentation, fallback paths, and on-call. Report to C-level on outcomes; cross-functional coordination with Sales, Product, and Ops without formal authority.

Beekeeper AG · Senior Software Engineer (Technical Lead) 03/2020 - 02/2026

TypeScript Vue Java Python Kubernetes AWS Docker Terraform PostgreSQL Elastic Search Kafka GitHub Actions
CI/CD Grafana Datadog Enterprise Customers Distributed Systems

- Architected Employee Referral System end to end for enterprise customers. Became the platform's top revenue channel: \$1.5M+ generated, \$500K ARR. Direct engagement with strategic accounts, from discovery through post-launch stewardship.
- Replaced \$337K/yr in vendor translation costs with an in-house LLM pipeline shipped in 6 weeks (GitHub Actions CI/CD + OpenAI). Turned a field blocker into a durable product capability, then transitioned ownership to the product team.
- Led Search Platform revamp across 3 teams (indexing, ranking, distributed templating engine that powers 15% of assets for 10M+ users). Cross-functional coordination without formal authority.
- Ran observability and global on-call (K8s, AWS, Grafana, Datadog, Logz.io). Hired and mentored the AI engineering cohort; engineers now lead features independently.

Tenity · Startup Mentor & Technology Evaluation Panelist 06/2024 - Present

AI Governance AI Adoption Enterprise Advisory Cross-Functional Technical Strategy

- Evaluated 20+ startups for seed-to-VC decisions on architecture, scalability, and AI adoption. Cross-functional coordination without authority is the entire job.
- Advised portfolio companies on production AI adoption: prompt design, evals, governance, and safe rollout patterns for enterprise workflows.

Dronistics (EPFL spin-off) · Founding Engineer 08/2018 - 03/2020

Founding Engineer Enterprise Customer Engagement Vue Java PostgreSQL AWS Docker Terraform CI/CD
Real-time Systems

- Founding engineer for an autonomous drone delivery startup. Shipped full stack (Vue, Java, PostgreSQL, real-time APIs, AWS/Docker/Terraform infra) from empty repo to 500+ deliveries.
- Direct engagement with strategic enterprise customers (Unilever) and a CES Las Vegas showcase. Turned field feedback into product roadmap.

Anand Creations - Forward Deployed Engineering Practice · <https://anand-creations.com>06/2024 - Present

Founder & Principal Forward Deployed Engineer

Independent Forward Deployed Engineering practice. Embed with teams, run technical discovery, resolve adoption blockers, and ship production agentic AI end to end without becoming a permanent dependency. Home for the AI products I build and ship myself (SwissNRI, Proplab, PulseView), each a real reference for the patterns I bring to client engagements.

PulseView - Explainable AI Market Intelligence · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & Builder

Real-time AI agents that generate AND justify trading signals from technical and news data. Explainability by design: if the model cannot justify the signal, it does not ship. Live users on real-time feeds; AI-safety principles baked in.

SwissNRI - AI Cross-border Compliance · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

AI-native compliance platform for cross-border finances. RAG-grounded assistant answers regulatory questions with citations back to the source; compliance-first agentic design flags risk before users file. Zero-to-MVP in 3 months, 40% uplift in satisfaction.

EDUCATION

- Quantic School of Business and Technology

2019 - 2020

MBA Business Administration
- EIT Digital

2014 - 2016

Master (Programme) Innovation & Entrepreneurship
- Eindhoven University of Technology (TU/e)

2015 - 2016

MSc (Netherlands) Embedded Networking
- KTH Royal Institute of Technology

2014 - 2015

MSc (Sweden) Embedded Systems
- Amrita Vishwa Vidyapeetham

2010 - 2014

Bachelor of Engineering Electronics and Communication

CERTIFICATES

- AI Agents in LangGraph

LangChain & Tavily
- Knowledge Graphs for RAG

Neo4j
- Build LLM Apps with LangChain

DeepLearning.AI
- Building Modern Java Applications

AWS

AWARDS

- AWS Cloud Credits for Research

Amazon Web Services (2020)
- Appreciation from John T. Chambers (ex-CEO, Cisco Systems)

Cisco Systems

Recognized for contributions to strategic projects within Cisco's ecosystem
- TI India Analog Design Contest Winner

Texas Instruments
- KTH Opportunities Fund

KTH Royal Institute of Technology
