Forward deployed engineer who ships production agentic AI into live customer environments and stays accountable to the metric. As Founding AI Engineer (GTM) at LumApps I lead technical discovery through production on GCP Vertex AI: multi-agent workflows on LangGraph and Google ADK (ReAct, self-reflection, hierarchical delegation) with MCP tool servers that 2x outbound conversions and forecast \$1M in quarterly revenue, grounded by a temporal knowledge-graph AI Brain that unifies 5+ data silos for RAG. Every release ships with eval pipelines, granular tracing, and cost-per-request telemetry, and I report to C-level on outcomes. 13+ years across 10M+ users, \$337K in vendor cost replaced by an LLM pipeline at Beekeeper, three companies founded; I turn field friction into reusable modules and product asks.

WORK EXPERIENCE

LumApps · Founding AI Engineer, GTM [▶ Watch demo](#) 03/2026 - Present

Python GCP Vertex AI LangGraph Google ADK MCP Multi-Agent Systems ReAct RAG Vector Databases Neo4j Graphiti Pub/Sub Evaluation Pipelines LangSmith Observability AG-UI FastAPI TypeScript LangChain Salesforce On-Call

- Took outbound sales agents from prototype to production on GCP Vertex AI: multi-agent workflows on Python, LangGraph and Google ADK (ReAct, self-reflection, hierarchical delegation), tools over MCP servers, agent state streamed to the UI over AG-UI. 2x open rates, 2x approved opportunities, 2 to 3 hours saved per rep per day. Forecast: \$4M in approved opportunities per quarter, \$1M in quarterly revenue at 25% conversion.
- Designed AI Brain, a temporal knowledge graph on Graphiti and Neo4j that unifies 5+ legacy silos (Salesforce, HubSpot, Pendo, transcripts, product usage) into one time-aware memory every agent reads and writes. Event-driven ingest over Pub/Sub for structured and unstructured data, a write-back contract per agent, and a freshness layer that flags stale facts, grounding RAG to cut hallucinations.
- Led technical discovery through production: agent architecture, eval pipelines for accuracy and safety, granular tracing (LangSmith), tool-selection tuning, latency and cost-per-request instrumentation, on-call for global systems. Translate AI constraints for C-level and report on outcomes, not progress.

Beekeeper AG · Senior Software Engineer (Technical Lead) 03/2020 - 02/2026

Python Java TypeScript OpenAI Claude LangChain CrewAI Strands Agents Langfuse RAG Kubernetes AWS Kafka PostgreSQL Elastic Search ClickHouse Grafana Datadog GitHub Actions On-Call

- Replaced \$337K in annual vendor translation costs with an in-house LLM pipeline (GitHub Actions, OpenAI APIs) shipped in 6 weeks. 12K+ assets translated; product team iterates without external gatekeepers.
- Architected Employee Referral System end-to-end as Tech Lead reporting to CIO. Became the platform's top revenue channel (\$1.5M+ generated, \$500K ARR). Designed for 99.99% SLA on a platform serving 10M+ users.
- Wired a GenAI demo system into Salesforce and live customer data, auto-generating personalized content from CRM context: connective tissue between LLMs and legacy silos. Improved demo speed and close rates.
- Hired and mentored the AI engineering cohort; led Search Platform revamp across 3 teams. Co-owned GTM launches with Product and Sales, each instrumented so we knew within a week if it moved the needle.

Tenity · Startup Mentor & Technology Evaluation Panelist 06/2024 - Present

Technical Discovery AI Strategy AI Readiness Startup Evaluation Scalability

- Led technical discovery sessions with founders and engineering teams across 20+ startups on architecture, scalability, and AI readiness to inform seed-to-VC investment decisions.
- Mentored Opt Alpha on scaling high-frequency algorithmic trading systems in production; advised portfolio companies on AI strategy, technical hiring, and engineering cultures that ship.

Real-time Systems

Flight Control APIs

Logistics Optimization

- Shipped end-to-end autonomous drone delivery platform (Vue, Java, PostgreSQL, AWS). 500+ real-world deliveries; enterprise-grade reliability enabled a Unilever partnership and a CES showcase.
- Engineered real-time flight control APIs, logistics optimization, and CI/CD from scratch. 40% faster deliveries, 99.5% safety record, zero incidents.

C++

Python

AWS

Genetic Algorithms

Neural Networks

Evolutionary AI

Robotics

Webots

- Engineered Robogen, an open-source platform for co-evolution of robot bodies and brains via genetic algorithms. Morphology and neural control evolve together through artificial selection.
- Migrated the simulation pipeline to AWS for large-scale parallel evolution runs impractical on local hardware. Secured AWS Cloud Credits for Research; work featured on the AWS Public Sector Blog.

ENTREPRENEURIAL PROJECTS

Founder & Principal Forward Deployed Engineer

Independent forward deployed engineering practice and home for the AI products I build and run myself (SwissNRI, Proplab). Open to embedded client engagements: run technical discovery, wire agents into existing APIs and data silos, ship production agentic AI with evals, tracing, and rollout.

Co-Founder & Technical Lead

AI-native cross-border tax and compliance platform for Swiss-Indian families. RAG-grounded assistant answers DTAA, FEMA and Swiss tax questions in plain language with citations back to the regulation; compliance-first agents flag risk before users file, with regulatory guardrails built before features. Zero-to-MVP in 3 months, 40% uplift in satisfaction.

Founder & AI Product Builder

Vision pipeline extracts structured signals (room type, condition, defects) from unstructured inspection photos into queryable, AI-readable data. LLM agents then turn those records into multilingual, marketing-ready listings: one workflow from photo to published listing.

EDUCATION

Quantic School of Business and Technology

2019 - 2020

MBA Business Administration

EIT Digital

2014 - 2016

Master (Programme) Innovation & Entrepreneurship

Eindhoven University of Technology (TU/e)

2015 - 2016

MSc (Netherlands) Embedded Networking

KTH Royal Institute of Technology

2014 - 2015

MSc (Sweden) Embedded Systems

Amrita Vishwa Vidyapeetham

2010 - 2014

Bachelor of Engineering Electronics and Communication

CERTIFICATES

AI Agents in LangGraph

LangChain & Tavily

Knowledge Graphs for RAG

Neo4j

Build LLM Apps with LangChain

DeepLearning.AI

Building Modern Java Applications

AWS

Microsoft Certified Professional (MCPS)

Microsoft

MongoDB for Java Developers

MongoDB University

AWARDS

Appreciation from John T. Chambers (ex-CEO, Cisco Systems)

Cisco Systems

Recognized for contributions to strategic projects within Cisco's ecosystem

AWS Cloud Credits for Research
