Companies Founded

AI engineer with an electronics and embedded-systems background (B.Tech Electronics & Communication, MSc Embedded Systems) who now ships production LLM systems for the enterprise. At LumApps I own the prompt library, few-shot templates, context-injection strategy, and eval pipelines behind multi-agent workflows that 2x outbound conversions. Fluent at translating domain-specific business logic into precise prompts, iterating with SMEs, and running eval, governance, and cost telemetry (LangSmith, Langfuse) until outputs are accurate, compliant, and production-safe.

WORK EXPERIENCE

LumApps · Lead AI Engineer

[▶ Watch demo](#)

03/2026 - Present

Prompt Engineering Prompt Chaining Few-Shot Learning Context Injection RAG LangSmith Eval Pipelines A/B Testing LLM-as-Judge Hallucination Mitigation Governance Python GCP Vertex AI LangChain LangGraph Google ADK MCP Multi-Agent Systems Neo4j Graphiti

- Own the prompt library for a production multi-agent platform: few-shot templates, prompt chaining, context injection, and versioned system prompts per agent. Iterated with SMEs until outputs met accuracy and compliance bars. 2x open rates, 2x approved opportunities, 2 to 3 hours saved per rep per day.
- Built eval pipelines and A/B tests on LangSmith with cost-per-request telemetry: golden datasets, LLM-as-judge scorers, regression checks on every prompt change, dashboards for precision, hallucination rate, and token spend.
- Designed AI Brain, a temporal knowledge graph on Graphiti and Neo4j unifying 5+ enterprise silos into one time-aware memory. Grounds RAG retrieval and gives every prompt clean, traceable domain context.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

Prompt Engineering LLM Pipelines OpenAI Claude LangChain CrewAI Strands Agents Langfuse Python Java TypeScript Vue Kubernetes AWS Kafka PostgreSQL Elastic Search GitHub Actions Grafana Datadog Observability On-Call

- Replaced \$337K in annual vendor translation costs with an in-house LLM pipeline shipped in 6 weeks: prompt templates per locale, few-shot examples per content type, glossary-grounded context injection. 12K+ assets translated with compliance guardrails.
- Built AI Onboarding Specialist: prompt-driven guide that turns new-signup context into personalized, high-touch setup. 100% of customers guided through onboarding without added headcount.
- Ran observability and on-call for production LLM systems (Grafana, Datadog, Langfuse): prompt-level traces, cost dashboards, drift alerts.

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

AI Strategy Prompt Strategy LLM Evaluation Startup Evaluation Technical Mentoring

- Evaluated 20+ startups on technical architecture, AI readiness, and prompt/eval maturity to inform seed-to-VC investment decisions.
- Advised portfolio companies on prompt strategy, LLM eval design, and building AI cultures that ship responsibly.

Dronistics · Founding Engineer

08/2018 - 03/2020

Vue Java PostgreSQL AWS Docker Real-time Systems Flight Control APIs Industrial Systems Safety-Critical Software

- Shipped end-to-end autonomous drone delivery platform (Vue, Java, PostgreSQL). 500+ successful deliveries with enterprise-grade reliability that enabled Unilever partnership and CES showcase.
- Engineered real-time flight control APIs and logistics optimization for industrial hardware operations. 40% faster deliveries, 99.5% safety record, zero incidents.

C++PythonAWSGenetic AlgorithmsNeural NetworksEvolutionary AIRobotics

- Engineered Robogen, an open-source platform for co-evolution of robot bodies and brains via genetic algorithms. Foundational optimization and search work that underpins how I approach LLM prompt tuning today.
- Migrated the simulation pipeline to AWS for large-scale parallel evolution runs. Secured AWS Cloud Credits for Research; work featured on the AWS Public Sector Blog.
- Teaching Assistant for Evolutionary Robotics at EPFL. Supervised 20+ master's students through hands-on projects in genetic algorithms and neural controllers.

ENTREPRENEURIAL PROJECTS

Anand Creations - Forward Deployed Engineering Practice · https://anand-creations.com06/2024 - Present

Founder & Principal Forward Deployed Engineer

Independent forward deployed engineering practice, home for the AI products I design, build, and run on my own (SwissNRI, Proplab, PulseView). Every product runs on hand-crafted prompt libraries, eval pipelines, and RAG grounding; the same playbook I bring to any enterprise engagement.

SwissNRI - AI Cross-border Fintech · https://www.swissnri.com01/2024 - Present

Co-Founder & Technical Lead

AI-native cross-border tax platform for Swiss-Indian families. RAG-grounded assistant answers DTAA, FEMA, and Swiss tax questions in plain language with citations back to the regulation. Compliance-first prompt design flags risk before users file; regulatory guardrails built before features. Zero-to-MVP in 3 months, 40% uplift in satisfaction.

PulseView - AI Market Intelligence · https://pulse-view.anand-creations.com05/2025 - Present

Founder & Builder

Real-time market intelligence for retail traders. AI agents generate AND justify trading signals from technical and news data, with explainability and eval built in: if the model can't explain the signal via its prompt-traceable reasoning, it doesn't ship.
